Notes to Condensed Interim Financial Statements

(Expressed in Canadian Dollars)

(Unaudited)

October 31, 2014

1. Nature and Continuation of Operations

Randsburg International Gold Corp. (the "Company") was incorporated under the laws of British Columbia.

The condensed interim financial statements of Randsburg International Gold Corp. for the three and nine month period ended October 31, 2014 and 2013 were reviewed by and authorized for issue by the Board of Directors on December 29, 2014.

The Company's principal business activity is the acquisition and exploration of mineral property interests in Canada. The Company is considered to be in the exploration stage and substantially all of the Company's efforts are devoted to financing and developing these property interests. The Company has not determined whether its properties contain ore reserves which are economically recoverable. The recovery of the amounts shown for mining properties is dependent upon the existence of economically ore reserves, the ability of the Company to obtain necessary financing to complete the exploration and development of its properties, and upon future profitable production or proceeds from the disposal of its properties.

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), applicable to a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize on its assets and settle its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying financial statements.

2. Going Concern

The Company has incurred operating losses over the last several years, earns no operating revenues and has a working capital deficiency of \$1,252,823 as at October 31, 2014; (January 31, 2014 - \$1,177,567). While the Company has been successful in obtaining its required financing in the past, through additional equity and non-arm's length loans, there is no assurance that such financing will be available or be available on favorable terms. The Company's ability to continue as a going concern is uncertain and is dependent upon the generation of profits from mineral properties, obtaining additional financing or maintaining continued support from its shareholders and creditors. In the event that additional financial support is not received or operating profits are not generated, the carrying values of the Company's assets may be adversely affected.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration in which it has an interest, in accordance with industry standards for the current stage of exploration. These procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, non-compliance with regulatory requirements or aboriginal land claims.
