

Blackhawk Growth Corp.

## **BLACKHAWK'S LIFE AI CORP ADVANCES ITS ASTHMA ATTACK PREDICTION PROJECT.**

Vancouver, British Columbia – October 5, 2023 – Blackhawk Growth Corp. (CSE:BLR; Frankfurt:0JJ) (the “**Corporation**” or “**Blackhawk**”), is pleased to report on the progress of its asthma attack prediction project, Asthmatic AI after visiting with scientific collaborators this past week.

Whilst the Company progresses with the pre-transaction requirements to complete the Hardenbrook Group acquisition, we are pleased to provide an update on Hardenbrook’s portfolio company Asthmatic AI.

Asthma is a long-term disease that causes inflammation and swelling of the airways. This results in the narrowing of the airways that carry air from the nose and mouth to the lungs. Asthma symptoms can be triggered by allergens like dust or pet dander, certain foods, environmental factors and exercise. Asthma can be deadly and there is no cure for it (in the US ten people die from asthma every day). According to the Asthma and Allergy Foundation of America, asthma is one of the most common and costly diseases in the United States. From 2008-2013 the average annual economic cost of asthma was more than \$81.9 billion in the US including medical costs and loss of work and school days, with a significant burden to the health care cost of families dealing with asthma.

Life AI Corp’s scientific collaborators have started recruiting subjects are collecting data to build machine learning models and AI algorithm for the development of reliable asthma attack prediction.

Life AI Corp is working on several new globally scalable health tech focused AI companies that are conducting research at a leading research institution, collecting data and creating machine learning models for new product development in a variety of health domains.

Justin Hanka, Chief Executive Officer of Blackhawk Growth Corp said “We are pleased to see the progress of this exciting project unfold. Asthma is a debilitating condition which causes broad health, societal, emotional, and financial distress to families. We are excited by the hope that these asthma attack prediction models integrated to wearables will offer to individuals and families dealing with the condition”.

Life AI Corp is conducting leading research in asthma attack prediction and prevention, early detection of autism and prediction of negative mood states such as depression and anxiety for early prevention and intervention. It is also developing a learning model for human performance optimization and longevity. With enough clinical data, Health AI models can be productized and integrated to digital devices such as smart watches and mobile devices to accurately support health monitoring, deliver health interventions and promote health optimization and longer living.

Blackhawk is also pleased to announce that it has amended and restated investment agreement with Riverfort Global Opportunities PPC LTD ("RiverFort"). The outstanding amount has been fixed to CAD\$2,207,500 with no additional interest or fees to accrue during an extended 36 month term. The outstanding balance has been reduced by \$1,000,000 in consideration of Blackhawk novating the loan agreement with MindBio Therapeutics Corp to RiverFort. Interest is payable in the event of default of loan terms.. RiverFort may convert any portion of the loan at CAD \$0.05. This restructure enables Blackhawk to release itself from any immediate short term liabilities to RiverFort and reduces the dependency on repayment of the existing debt that was accrued and to be repaid by MindBio Therapeutics Corp following the successful spin-out earlier this year.

### **About Hardenbrook Group**

Hardenbrook Group, is an investment company that leverages a merchant banking model and works with world class research-intensive organizations including large tier 1 universities to identify valuable intellectual property to invest, commercialize and take public on stock exchanges in North America. Its portfolio company Life AI Corp is conducting clinical health research and product development across several domains and is working toward a spin out and public listing in 2024.

### **About Blackhawk Growth**

Blackhawk is an investment holding company looking to create substantial value for its shareholders through the acquisition and development of high growth companies.
