#### 1. NATURE OF OPERATIONS AND GOING CONCERN

Arrowstar Resources Ltd. (the "Company") was incorporated on October 14, 1987 under the laws of British Columbia. The Company's head office address is 2300 -1177 West Hastings Street Vancouver, B.C. V6E 2K3. The Company is listed on the TSX Venture exchange ("TSX-V") under the symbol AWS. To date, the Company has not earned operating revenue.

During the year ended December 31, 2014, all of the issued common shares and equity instruments of the Company were consolidated on the basis of 10 pre-consolidation common shares/equity instruments for 1 post-consolidation common share/equity instrument. As a result of the consolidation, all share and per-share information in the financial statements has been restated to reflect the consolidation.

The Company is in the process of acquiring its exploration and evaluation assets and has not yet determined whether the properties contain reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

As at March 31, 2015, the Company has a working capital deficit of \$661,320 (December 31, 2014 – \$612,744) and an accumulated deficit of \$22,385,043 (December 31, 2014 - \$22,326,223). The Company expects to incur further losses in the development of its business. These material uncertainties may cast significant doubt on the Company's ability to continue as a going concern. The Company's ability to continue its operations and to realize its assets at their carrying values is dependent upon obtaining additional financing and generating revenues sufficient to cover its operating costs.

These condensed consolidated interim financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and thus be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these financial statements.

### 2. SIGNIFICANT ACCOUNTING POLICIES

#### Statement of compliance

These financial statements have been prepared and presented in Canadian dollars in accordance with IAS 34 'Interim Financial Reporting' ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

The financial statements were authorized for issue by the Board of Directors on May 29, 2015.

#### **Basis of presentation**

The financial statements have been prepared on the historical cost basis except for certain non-current assets and financial instruments, which are measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The comparative figures presented in these financial statements are in accordance with IFRS and have not been audited.

The preparation of financial statements in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These financial statements do not include all of the information required for full annual financial statements. The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

#### 2. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

#### Basis of presentation (cont'd...)

The significant accounting policies for the quarter are consistent with those disclosed in the audited annual financial statements for the year ended December 31, 2014 except as specified below. The accompanying financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2014.

#### **Basis of consolidation**

These consolidated financial statements of the Company include the balances of its subsidiary, Gulfside Alaska Inc. (USA), which is a wholly owned subsidiary incorporated in the state of Alaska, USA.

The Company consolidates its subsidiary on the basis that it controls the subsidiary through its ability to govern its financial and operating policies.

All intercompany transactions and balances are eliminated on consolidation.

#### New standards and interpretations not yet adopted

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC that are mandatory for accounting periods beginning on or after January 1, 2015. The following have not yet been adopted by the Company and are being evaluated to determine their impact.

- IFRS 9: New standard that replaced IAS 39 for classification and measurement, effective for annual periods beginning on or after January 1, 2018.

#### 11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 Inputs that are not based on observable market data.

The fair value of cash and marketable securities are measured at Level 1 of the fair value hierarchy. The carrying value of receivables, and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

#### **Financial risk factors**

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

#### Credit risk

Credit risk is the risk of loss associated with counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and receivables. Management believes that the credit risk concentration with respect to financial instruments included in receivables is remote and has deposited cash in high credit quality financial institutions.

#### Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As of December 31, 2015 the Company had cash balance of \$102,901 (December 31, 2014 - \$136,845) to settle current liabilities of \$783,741 (December 31, 2014 - \$769,289). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

#### Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. Amounts exposed to market risk include marketable securities of \$1,700 (December 31, 2014 - \$1,100).

#### 11. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

#### **Financial risk factors** (cont'd...)

#### Interest rate risk

The Company has cash balances and no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade demand investments issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

#### Foreign currency risk

The Company is exposed to foreign currency risk on fluctuations related to assets and liabilities that are denominated in US Dollars. Amounts exposed to foreign currency risk include cash of US\$822 as of March 31, 2015 (December 31, 2014 – US\$870).

#### Price risk

The Company is exposed to price risk with respect to commodity and equity prices. Equity price risk is defined as the potential adverse impact on the Company's profit or loss due to movements in individual equity prices or general movements in the level of the stock market. Commodity price risk is defined as the potential adverse impact on profit or loss and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices, individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company. Fluctuations in value may be significant.

#### **12. CAPITAL MANAGEMENT**

The Company defines capital that it manages as shareholders' equity, consisting of issued common shares, stock options and warrants.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of exploration and evaluation assets. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The property in which the Company currently has an interest is in the exploration stage; as such the Company has historically relied on the equity markets to fund its activities. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to externally imposed capital restrictions.
