1. NATURE OF OPERATIONS

Bettermoo(d) Food Corporation (the "Company") was incorporated under the laws of the Province of Ontario, and on August 6, 2019, was continued into British Columbia. The Company's head office and registered and records office is located at 1199 West Hastings Street, Suite 800, Vancouver, British Columbia, Canada, V6E 3T5. The Company's shares trade on the Canadian securities Exchange under the trading symbol "MOOO," on the OTCQB under the trading symbol "MOOOF," and on the Borse Frankfurt Exchange under the symbol "015."

The Company is an innovative food and beverage company focused on developing and delivering high quality products through online and in-store retail platforms and uses social media to deliver educational experiences for their customer base while demonstrating and pioneering plant-based technologies. The Company's principal products are Moodrink, a vegan oat-based beverage, and Moobert, a vegan nut-based cheese alternative product.

On March 13, 2023, the Company completed a share consolidation of its common shares on the basis of 1 new common share for every existing 10 common shares. The share consolidation has been retroactively presented in the condensed interim consolidated financial statements by adjusting all share amounts, including per share amounts.

These condensed interim consolidated financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. Different bases of measurement may be appropriate if the Company was not expected to continue operations for the foreseeable future. At October 31, 2023, the Company has not achieved profitable operations, has accumulated losses of \$46,287,065 since inception and expects to incur further losses in the development of its business.

The Company's continued existence is dependent upon its ability to raise additional capital and to identify and acquire a suitable business opportunity. Failure to do so would have an adverse effect on the financial position of the Company and its ability to continue as a going concern. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. If the going concern assumption were not appropriate for these financial statements, then adjustments may be necessary in the carrying values of assets and liabilities, the reported expenses, and the statement of financial position classifications used. Such adjustments could be material.

2. BASIS OF PREPARATION

(a) Statement of Compliance

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), Interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC"), and in accordance with International Accounting Standard ("IAS") 34, *Interim Financial Reporting*.

The condensed interim consolidated financial statements were authorized for issue by the Audit Committee and approved and authorized for issue by the Board of Directors on December 20, 2023.

(b) Basis of Measurement

These condensed interim consolidated financial statements have been prepared on a historical basis, except for certain financial instruments that have been measured at fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The condensed interim consolidated financial statements are presented in Canadian dollars, which is the functional currency of the Company and its subsidiary, Bettermoo(d) Holdings Corp. The functional currency of Bella's Organic GmbH is the European Euro ("Euro"). The functional currency of Happy Supplements Inc. is the United States Dollar ("USD").

(c) Basis of Consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries at the end of the reporting period:

	Incorporated	Nature	July 31, 2023	July 31, 2022
Bettermoo(d) GmbH	Lower Austria, Austria	Consumer products	80%	80%
Bettermoo(d) Holdings Corp.	BC, Canada	Consumer products	100%	100%
Happy Tea Supplements LLC	Florida, USA	Consumer products	100%	100%

The results of the subsidiaries will continue to be included in the condensed interim consolidated financial statements of the Company until the date that the Company's control over the subsidiary ceases. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity to obtain benefits from its activities. Intercompany balances and transactions, including unrealized income and expenses arising from intercompany transactions, are eliminated on consolidation.

Non-controlling interest represents the portion of a subsidiary's earnings and losses and net assets that is not held by the Company.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the audited financial statements for the year ended July 31, 2023. The accompanying unaudited condensed interim financial statements should be read in conjunction with the Company's audited financial statements for the year ended July 31, 2023.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant judgments

Management has made critical judgments in the process of applying accounting policies. The one has the most significant effect on the amounts recognized in the financial statements include:

- i. The assessment of the Company's ability to continue as a going concern and its ability to execute its strategy by funding future working capital requirements requires judgment. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, such as expectations of future events that are believed to be reasonable under the circumstances. The factors considered by management are disclosed in Note 1.
- ii. Management is required to assess the functional currency of the Company. In concluding that the Canadian dollar is the functional currency, management considered the currency that mainly influences the operating expenditures in the jurisdiction in which the Company operates.
- iii. Management has applied judgement in determining whether or not the fair value of the services received pursuant to certain agreement can be reliably measured. As a result, the Company has measured the transaction based on the fair value of the equity instruments issued therein
- iv. The determination of whether a set of assets acquired, and liabilities assumed in an acquisition constitute a business may require the Company to make certain judgments, taking into account all facts and circumstances. A business is presumed to be an integrated set of activities and assets capable of being conducted and managed for the purpose of providing a return in the form of dividends, lower costs, or economic benefits. The acquisition of Bettermoo(d) as described in Note 5 did not constitute a business and was accounted for as an asset acquisition transaction. The acquisition of Bella's as described in Note 5 did constitute a business and was accounted for as a business and was accounted for

Significant estimates

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the current and subsequent fiscal financial years:

- i. The Company determines its allowance for inventory obsolescence based upon expected inventory turnover, inventory aging, the expiry dates of the products, and current and future expectations with respect to product sales. Assumptions underlying the allowance for inventory obsolescence include future sales trends, marketing strategy and others. These estimates could materially change from period to period due to changes in various factors.
- ii. The Company uses the Black-Scholes option pricing model to value options and warrants granted during the year. The Black-Scholes model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. The model requires management to make estimates that are subjective and may not be representative.
- iii. The determination of whether facts and circumstances suggest that the carrying value of intangible assets may exceed their recoverable amount is an area of significant estimate. Determining if there are any facts and circumstances indicating impairment loss or reversal of impairment losses is a subjective process involving judgment, estimates, and interpretations. Determining the recoverable amount of the individual asset or cash generating unit is subject to estimates and judgments. These estimates and judgments are inherently subjective given the company's stage of operations with no revenue producing history.

5. INVENTORY

Inventory is comprised raw materials related to the production of Moobert and related dairy alternative cheese products. During the three months ended October 31, 2023, the Company recorded a \$Nil write-down on its inventory (year ended July 31, 2023 - \$Nil) and expensed \$Nil of inventory as cost of sales (year ended July 31, 2023 - \$10,643).

6. PREPAID EXPENSES

Prepaid expenses relate to a rental deposit for the Bella's facility and prepayments rendered to thirdparty vendors for services to be incurred related to marketing and investor relations activities. During the three months ended October 31, 2023, the Company impaired prepaid expenses of \$Nil (year ended July 31, 2023 - \$Nil).

The Company's was not in use for the three months ended October 31, 2023, therefore, no depreciation was recognized for the period.

8. PRODUCT FORMULATIONS

Product Formulations

The Company has recognized product formulations and patents for the production of Moodrink, a plantbased dairy alternative beverage derived from oats from the acquisition of Bettermoo(d). As the Company has yet to utilize these formulations in active production, no amortization has been recognized related to these product formulations.

The Company has recognized product formulations for the production of Moobert and other variants of vegan plant-based dairy alternative cheese products from the acquisition of Bella's. Activity from the acquisition date to the three months ended October 31, 2023 are minimal; therefore, no depreciation has been recognized on the product formulations for the period between acquisition and year-end.

As at October 31, 2023, the Company has recognized \$221,000 (July 31, 2023 - \$221,000) in product formulations further to the impairment assessment noted below.

9. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

10. LOAN PAYABLE

On May 21, 2020, the Company received a Small Business Administration ("SBA") loan of US \$50,857 through an accredited lender under the Paycheck Protection Program (the "PPP") program pursuant to the Federal Government Cares Act. The loan bears interest at 1% per annum and is repayable over 18 months, with principal and interest deferred for the first year. The PPP allows for full loan forgiveness if the Company meets certain eligibility requirements, which is subject to the lender's evaluation of the Company's use of the proceeds. As at October 31, 2023, the Company determined that it could not reasonably assure whether it has met the requirements, as a result \$Nil was recognized into government grant in relation to the loan forgiveness during the year.

The SBA loan was accounted for using the effective interest rate method and was discounted using a rate of 12% per annum, with discount portion recognized as government grant. The loan was fully accreted during the seven months ended July 31, 2022. The Company recognized an interest expense of \$Nil (year ended July 31, 2023 – \$Nil) for the three months ended October 31, 2023. Fluctuations are due to foreign exchange differences calculated as at the reporting date. The payments due on the SBA loan is summarized as follows:

The Company applies the fair value method using the Black-Scholes option pricing model in accounting for its stock options granted. The fair value of stock options issued was calculated using the following weighted average assumptions:

	Three Months ended October 31, 2023	Year ended July 31, 2023
Risk-free interest rate	-	4.26%
Expected option life in years	-	2
Expected share price volatility*	-	100%
Expected forfeiture rate	-	-
Expected dividend yield	Nil	Nil

*The share price volatility was determined based on the Company's historical volatility and comparable entities' historical volatility in share price due to the Company's limited trading history.

12. SHARE CAPITAL (continued)

e) Stock options

The Company has a stock option plan to grant incentive stock options to directors, officers, employees and consultants. Under the plan, the aggregate number of common shares that may be subject to option at any one time may not exceed 10% of the issued common shares of the Company as of that date, including options granted prior to the adoption of the plan. The exercise price of these options is not less than the Company's closing market price on the day prior to the grant of the options less the applicable discount permitted by the CSE and will not otherwise be less than \$0.10 per share. Options granted may not exceed a term of five years. All options vest when granted unless otherwise specified by the Board of Directors.

Stock options transactions and the number of stock options outstanding as at October 31, 2023 and July 31, 2023 are summarized as follows:

	October	31, 2023	July 31	, 2023

13. NON-CONTROLLING INTEREST

The Company's 80% interest in Bella's is consolidated into the Company's condensed interim consolidated financial statements. The 20% interest attributable to a minority shareholder is presented as "non-controlling interest" within shareholders' equity on the condensed interim consolidated statement of financial position.

The following table summarizes the non-controlling interest relating to Bella's as at October 31, 2023 and July 31, 2023:

14. FINANCIAL INSTRUMENTS

The carrying values of cash, amounts receivable, accounts payable and accrued liabilities and loan payable approximate their fair values due to their short-term nature.

a) Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The maximum credit risk the Company is exposed to is 100% of cash and its receivables. The Company's cash is held at a large Canadian financial institution. At July 31, 2023, amounts receivable of \$217,631 included \$210,810 of receivables related to refundable government goods and services tax and trade receivables of \$6,821.

b) Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its financial obligations as they fall due. The Company's objective to managing liquidity risk is to ensure that it has sufficient liquidity available to meet its liabilities when due. The accounts payable and accrued liabilities are typically due in 30 days, which are settled using cash. As at July 31, 2023, the Company has a working capital deficiency of \$332,780.

Management is considering different alternatives to secure adequate debt or equity financing to meet the Company's short term and long-term cash requirement.

At present, the Company's operations do not generate positive cash flow. The Company's primary source of funding has been the issuance of equity securities. Despite previous success in acquiring financing, there is no guarantee of obtaining future financings.

c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates, will affect the Company's operations, income, or the value of the financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the returns. The Company is exposed to market risk as follows:

i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. The Company is not exposed to significant interest rate risk due to the short-term to maturity of its financial instruments. The Company had no interest rate swap or financial contracts in place as at July 31, 2023. Interest rate risk is minimal as promissory notes have a fixed interest rate.

ii) Price risk

The Company has limited exposure to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's profit or loss due to movements in individual equity prices or general movements in the level of the stock market.

15. CAPITAL MANAGEMENT

The Company's objective when managing capital is to safeguard its ability to continue as a going concern. In order to facilitate the management of its capital requirements, the Company prepares periodic budgets that are updated as necessary. The Company manages its capital structure and adjusts it to effectively support the Company's objectives. In order to pay for general administrative costs, the Company will raise additional amounts as needed.

The Company reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company considers shareholders' equity and working capital as components of its capital base. The Company may access capital through the issuance of shares or the disposition of assets. Management historically funds the Company's expenditures by issuing share capital rather than using capital sources that require fixed repayments of principal and/or interest. The Company is not subject to externally imposed capital requirements and does not have exposure to asset-backed commercial paper or similar products. The Company believes it will be able to raise additional equity capital as required, but recognizes the uncertainty attached thereto. There were no changes to the Company's approach to capital management during the three months ended October 31, 2023.

16. CONTINGENCIES

The Company may be involved in legal claims or disputes that arise in the normal course of operations. Management is of the opinion that the outcome of such claim(s) or potential claim(s), if any, will not have a material adverse impact on the Company's financial position or results of operations. Accordingly, no provision was made for the outstanding claim as at the date of the condensed interim consolidated financial statements.

17. SEGMENTED INFORMATION

The Company has two reportable operating segments, Moodrink and Moofrais & Moobert. Moodrink is a vegan oat-based beverage in the development stages in Canada. Moofrais & Moobert is a vegan nutbased cheese alternative product that is manufactured and distributed for sale in Austria. The segments are separately managed for reporting purposes.

Performance is measured based on segment net income before incomes taxes, as included in the internal management reports reviewed by the Company's chief operating decision maker. Management has determined that this measure is the most relevant in evaluating segment results.

The following table summarizes the Company's reportable operating segments for the period ended October 31, 2023:
