

Canada House announces its first Toronto clinic in North York's Champagne Centre to extend its reach to new patients

This is the first of many urban centre clinics being launched as part of Canada House's expansion plans

TORONTO, Feb. 21, 2019 -- Canada House Wellness Group Inc. ("Canada House" or the "Company") (CSE:CHV) is pleased to announce the opening of its first Toronto clinic this Spring at the Champagne Centre, a multidisciplinary medical complex in North York. As a pioneer in cannabinoid therapy clinics, Canada House Clinics (CHC) is expanding to larger centres due to a significant and growing demand amongst key demographics including Boomers and Seniors, in addition to the Veterans historically serviced by its clinics.

"Building on our special relationship with Veterans, Canada House is helping all Canadians who are serious about using medical cannabis to improve their health and well-being," says Chris Churchill-Smith, CEO. "The Champagne Centre is ideal due to the large number of patients using the facility on a daily basis. We are extremely excited to have secured a lease there for our first Toronto clinic as we look to execute on Clinic expansion plans targeting larger urban centres throughout Canada."

The Champagne Centre is an innovative 270,000 square foot health, sports, and wellness complex that includes the PolyClinic Family and Specialty Medicine Facility which has over 70 physicians and a wide range of diagnostic testing facilities. The strategic location will assist Canada House in extending its reach to new patients with specific health and wellness concerns. In addition, a major hospital in North York recently announced its plans to open a large outpatient clinic in the Champagne Centre in 2019, adding to the 1,200 patients per day that visit the Champagne Centre.

"The philosophy of the Champagne Centre to create a quality health village with all specialties and services in one location resonates with the medical mission of Canada House Clinics," says Alex Kroon, President Canada House Clinics. "We look forward to working with referring doctors in the Champagne Centre and across Toronto."

Canada House is committed to working with the health system to secure coverage for medical cannabis patients by taking an evidence-based medical approach to responsible and effective cannabinoid therapy. CHC's first Toronto clinic is yet another step in this direction, endeavoring to reach out to potential new users of medical cannabis.
