The **SW Claim Block** is on the NE -SW trend line of local faults and is possibly down dip of the east dipping F2 fold. The **North Claim Block** is underlain by the Marshall assemblage, multiple faults, the F1 fold and the gabbroic intrusion associated with known mineralization in the camp. The **East Claim Block** covers the F2 fold extension associated with the trend of notable VTEM anomalies. The **SE Claim Block** has historic drill holes intersecting the lithology similar to Marshall Lake including sulphides with 12 historic assessment reports assaying for nickel and copper.
