

FOR IMMEDIATE RELEASE

**CDN MAVERICK REPORTS ON SUCCESSFUL INVESTMENT IN NORAM:
NORAM DRILLS LONGEST INTERSECTION TO DATE OF 380 FT (116M) ON CVZ-62: SUBSTANTIAL
IMPACT ON FUTURE RESOURCE TONNAGE CALCULATIONS**

Vancouver, British Columbia – December 8, 2020 – CDN Maverick Capital Corp. (“Maverick” or the “Company”) (CSE: CDN; OTCPINK:AXVEF; Frankfurt: A117RU) is updating shareholders on its interest in Noram Ventures Inc. (“Noram”) (TSX - Venture: NRM / Frankfurt: N7R / OTCQB: NRVTF) who are pleased to announce that the Company has completed hole CVZ-62 to a total depth of 477ft (145m). When logging and visual inspection of the core was completed, it was noted that mineralization appeared at 74ft (22m) and extended down to 454ft (138m) for a total intersection of 380ft (116m). This surpasses all prior drilling and is the longest intersection to date.

“Drill hole CVZ-62 is an incredibly encouraging hole for Noram. Figure 2 below shows CVZ-61, the first claystone intersection in the Phase V drilling program, in comparison to CVZ-62. The blue, green and magenta layers in the figure indicate claystone layers that have been shown to host the higher lithium assays from past drilling. Hole 61 was already one of the thickest intersections of the highly prospective claystones by Noram in all 5 of their drilling phases. The 380-foot (116-meter) intersection in CVZ-62 now becomes the thickest claystone intersection by far. This much thicker intersection will have profound implications on future resource tonnage calculations” commented Brad Peek M.Sc. CPG., consulting geologist and Qualified Person for this and all 4 of the previous drilling phases of Noram’s Zeus lithium property.

Figure 1 – core photos of blue claystone units from drill hole CVZ-62 between 219.5ft and 230ft (67m to 70m).

Figure 2 - Comparative stratigraphy for drill holes CVZ-61 and CVZ-62. CVZ-61, thought to have been one of the longest intercepts, has 91 meters (298ft) of lithium claystone in units of variable color. CVZ-62 however, surpassed prior drilling and yielded 116m (380ft) of lithium claystone. All of the claystone units except the brown silty claystone have relatively high lithium concentrations in previous drill holes on the property

Geologists for both Noram and Cypress believe that the deposit is part of the Clayton Valley playa lakebed that has been uplifted to surface by faulting. With that in mind, the deposit is considered to be a blanket-like layer that is 200 – 300 feet (60 – 100 meters) thick that extends across the property boundary between Noram and Cypress and has yet to be fully defined. Both CVZ-61 and CVZ-62 have continued to add to the resource in the southerly direction and confirm the dip and direction of the resource.

The technical information contained in this news release has been reviewed and approved by Brad Peek., M.Sc., CPG, who is a Qualified Person with respect to Noram’s Clayton Valley Lithium Project as defined under National Instrument 43-101.

About CDN Maverick Capital Corp.

CDN Maverick Capital Corp. is a Vancouver-based junior resource company with projects in North America. CDN Maverick is focused on the development of the following mineral properties:

The Ranger Lake Gold Project consists of 1,107 hectares of prospective gold exploration in southern Quebec, Canada.

The Rainbow Canyon Gold Property consists of 417 hectares of prospective gold exploration in the Olinghouse mining district, in the Washoe County Nevada.

ON BEHALF OF THE BOARD OF DIRECTORS

“Sandy MacDougall”

Chairman & Director

Phone: (604) 662-7902

This news release contains projections and forward - looking information that involve various risks and uncertainties regarding future events. Such forward - looking information can include without limitation statements based on current expectations involving a number of risks and uncertainties and are not guarantees of future performance of the Company. The following are important factors that could cause the Company’s actual results to differ materially from those expressed or implied by such forward looking statements; the uncertainty of future profitability; and the uncertainty of access to additional capital. These risks and uncertainties could cause actual results and the Company’s plans and objectives to differ materially from those expressed in the forward-looking information. Actual results and future events could differ materially from anticipated in such information. These and all subsequent written and oral forward- looking information are based on estimates and opinions of

management on the dates they are made and expressed qualified in their entirety by this notice. The Company assumes no obligation to update forward-looking information should circumstance or management's estimates or opinions change.

Neither the Canadian Securities Exchange ("CSE") nor its Regulation Services Provider (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.
