

Management's Discussion and Analysis
For the period ended
February 29, 2012

OVERVIEW

Eagleford Energy Inc. (“Eagleford” or the “Company”) is amalgamated under the laws of the Province of Ontario. The Company's business focus consists of acquiring, exploring and developing oil and gas interests. The recoverability of the amount shown for these properties is dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete exploration and development, and future profitable production or proceeds from disposition of such property. The Company's oil and gas interests are located in Alberta, Canada and Zavala County, Texas. In addition the Company holds a 0.3% net smelter return royalty on 8 mining claim blocks located in Red Lake, Ontario which is carried on the consolidated balance sheets at nil. The Company's common shares trade on the Over-the-Counter Bulletin Board (OTCBB) under the symbol EFRDF.

The Company's Unaudited Condensed Interim Consolidated Financial Statements (the “interim statements”) for the period ended February 29, 2012 and 2011 include the accounts of the Company, its wholly owned subsidiaries 1354166 Alberta Ltd.(“1354166 Alberta”) and Dyami Energy LLC (“Dyami Energy”).

Our Canadian public filings can be accessed and viewed via the System for Electronic Data Analysis and Retrieval (“SEDAR”) at www.sedar.com. Readers can also access and view our Canadian public insider trading reports via the System for Electronic Disclosure by Insiders at www.sedi.ca. Our U.S. public filings are available at the public reference room of the U.S. Securities and Exchange Commission (“SEC”) located at 100 F Street, N.E., Room 1580, Washington, DC 20549 and at the website maintained by the SEC at www.sec.gov.

The following Management's Discussion and Analysis of Eagleford should be read in conjunction with the Company's interim statements for the three and six months ended February 29, 2012 and 2011 and the Audited Consolidated Financial Statements for the year ended August 31, 2011 and notes thereto. In 2010, the CICA Handbook was revised to incorporate International Financial Reporting Standards (“IFRS”) and requires publicly accountable enterprises to apply such standards effective for years beginning on or after January 1, 2011. Previously, the Company prepared its interim and annual consolidated financial statements in accordance with Canadian generally accepted accounting principles (“CDN GAAP”). The interim financial statements have been prepared in accordance with IFRS and all amounts herein are in Canadian dollars, unless otherwise noted. This Management's Discussion and Analysis is dated April 25, 2012 and has been approved by the Board of Directors of the Company.

The accounting policies of the Company have been adjusted to comply with IFRS beginning with the statement of financial position as at September 1, 2010. A comprehensive summary of all of the significant changes, including reconciliations of CDN GAAP financial statements to those prepared under IFRS, is presented in Note 21 “Transition to IFRS” of the Company's interim financial statements as at and for the three and six months ended February 29, 2012.

FORWARD LOOKING STATEMENTS

This Management's Discussion and Analysis contains certain forward-looking statements, including management's assessment of future plans and operations, and capital expenditures and the timing thereof, that involve substantial known and unknown risks and uncertainties, certain of which are beyond the Company's control. Such risks and uncertainties include, without limitation, risks associated with oil and gas exploration, development, exploitation, production, marketing and transportation, loss of markets, volatility of commodity prices, currency fluctuations, imprecision of reserve estimates, environmental risks, competition from other producers, inability to retain drilling rigs and other services, delays resulting from or inability to obtain required regulatory approvals and ability to access sufficient capital from internal and external sources, the impact of general economic conditions in Canada, the United States and overseas, industry conditions, changes in laws and regulations (including the adoption of new environmental laws and regulations) and changes in how they are interpreted and enforced, increased competition, the lack of availability of qualified personnel or management, fluctuations in foreign exchange or interest rates, stock market volatility and market valuations of companies with respect to announced transactions and the final valuations thereof, and obtaining required approvals of regulatory authorities. The Company's actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what benefits, including the amount of proceeds, that the Company will derive there from. Readers are cautioned that the foregoing list of factors is not exhaustive. All subsequent forward-looking statements, whether written or oral, attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by these cautionary statements. Furthermore, the forward-looking statements contained in this Management Discussion and Analysis are made as at the date of this Management

Discussion and Analysis and the Company does not undertake any obligation to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws.

***Non-IFRS Measurements** – Certain measures in this Management’s Discussion and Analysis do not have any standardized meaning as prescribed by IFRS including "Operating net back" are considered Non-IFRS measures. Therefore, these measures may not be comparable to similar measures presented by other issuers. These measures are common with the oil and gas industry and have been described and presented in this Management’s Discussion and Analysis in order to provide shareholders and potential investors with additional information regarding the company's liquidity and its ability to generate funds to finance its operations. These terms are commonly used in the oil and gas industry and are therefore presented here to provide balances comparable to other oil and gas production companies.*

GLOSSARY OF ABBREVIATIONS

Bbl	barrel
Bbl/d	barrels per day
Boe	barrels of oil equivalent ⁽¹⁾
Boe/d	barrels of oil equivalent per day
Mcf	1,000 cubic feet of natural gas
Mcf/d	1,000 cubic feet of natural gas per day

(1) Boe conversion ratio of 6 Mcf: 1Bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Disclosure provided herein in respect of Boes may be misleading, particularly if used in isolation.

The following table sets forth certain standard conversions between Standard Imperial Units and the International System of units (or metric units).

<u>To Convert From</u>	<u>To</u>	<u>Multiply By</u>
Mcf	Cubic metres	28.317
Cubic metres	Cubic feet	35.494
Bbls	Cubic metres	0.159
Cubic metres	Bbls	6.292
Feet	Metres	0.305
Metres	Feet	3.281
Miles	Kilometers	1.609
Kilometers	Miles	0.621
Acres (Alberta)	Hectares	0.405
Hectares (Alberta)	Acres	2.471

OVERALL PERFORMANCE

Revenue, net of royalties for the six months ended February 29, 2012 was down \$8,704 to \$20,180 compared to \$28,884 for the same period in 2011. The decrease in revenue during 2012 is attributed a declines in natural gas prices received from the Company’s Botha, Alberta property. Net loss for the six months ended February 29, 2012 was \$1,032,215 compared to a net income of \$243,316 for the comparable six month period in 2011. The increase in net loss during 2012 was primarily related to a loss on settlement of debt in the amount of \$1,464,899 and higher finance expenses.

During the six months ended February 29, 2012, the Company received \$291,845 and US\$175,000 and issued demand promissory notes bearing interest at 10% per annum. Interest is payable annually on the anniversary date of the notes.

During the six months ended February 29, 2012, the Company issued 1,553,504 common shares as full settlement of interest due on shareholder loans in the amount of \$325,903.

During the six months ended February 29, 2012, the Company issued 8,575,000 units as full settlement of debt and shareholder loans in the amount of \$857,500.

During the six months ended February 29, 2012 the Company completed a non-brokered private placement of a total of 1,000,000 units at a purchase price of \$0.10 per unit for gross proceeds of \$100,000.

During the six months ended February 29, 2012, the Company paid \$73,380 of secured notes due.

For the six months ended February 29, 2012, the Company incurred \$216,492 in exploration expenditures related to the Matthews and Murphy Leases in Zavala County, Texas.

The Company expects to apply additional capital to further enhance its property interests. As part of the Company's oil and gas development program, management of the Company anticipates further expenditures to expand its existing portfolio of proved reserves. Amounts expended on future exploration and development is dependent on the nature of future opportunities evaluated by the Company. These expenditures may be funded through cash held by the Company or through cash flow from operations. Any expenditure which exceeds available cash will be required to be funded by additional share capital or debt issued by the Company, or by other means. The Company's long-term profitability will depend upon its ability to successfully implement its business plan.

The Company's past primary source of liquidity and capital resources has been shareholder loans, cash flow from oil and gas operations and proceeds from the issuance of common shares.

RISK AND UNCERTAINTIES

The Company is subject to several risk factors including, but not limited to: the volatility of oil and natural gas prices; foreign exchange and currency risks; general risks related to foreign operations such as political, economic, regulatory and other uncertainties as they relate to both foreign investment policies and energy policies; governments exercising from time to time significant influence on the economy to control inflation; developing environmental regulations in foreign jurisdictions; discovery of new oil and natural gas reserves; concentration of oil sales receipts with a few major customers; substantial capital expenditures for the acquisition, exploration, development and production of oil and natural gas reserves in the long-term for which additional financings will required to implement Eagleford's business plan.

As the Company has not experienced sufficient positive cash flow from operations to independently finance its growth and operations, it has been reliant on access to capital in the form of both debt and equity to fund on-going operations and to fund capital investments. Although periodic volatility of financial and capital markets may severely limit access to capital, the Company has been able to attract the required investment capital in the past however no assurances can be made that it will continue to do so in the future.

Some of the Company's exploration and development costs are expected to be received/paid in reference to US\$ denominated prices while a significant portion of its operating and general and administrative costs are denominated in Canadian dollars. As a result the Company is exposed to fluctuations in currency exchange rates between the US dollar and Canadian dollar. The Company has not entered into any currency derivatives in order to reduce its exposure to fluctuations that may incur.

Fluctuations in energy prices will not only impact revenues of the Company but may also affect the ability of the Company to raise additional capital to fund operations and working capital requirements. Crude oil prices are correlated with overall global economic growth and activity. The continuing volatility in the global economic environment has resulted in significant variation in crude oil prices over the last year. Any dramatic drop in crude oil prices will have a negative impact on the operational cash flows of the Company as well as on its ability to finance capital expenditures. In absence of externally-sourced capital, this could limit growth prospects over the short run or may even require the Company to dispose of assets.

The Company cautions that the foregoing list of important factors is not exhaustive. Investors and others who base themselves on the Company's forward-looking statements should carefully consider the above factors as well as the uncertainties they represent and the risk they entail. The Company also cautions readers not to place undue reliance on these forward-looking statements. Moreover, the forward-looking statements may not be suitable for establishing strategic priorities and objectives, future strategies or actions, financial objectives and projections other than those mentioned above. (For additional risk factors, please see the Company's Annual Information Form filed on Form 20F).

FINANCIAL INSTRUMENTS AND CONCENTRATION OF RISKS

The Company has classified its financial instruments as follows:

Financial Instrument	Category	Measurement method
Cash and cash equivalents	Fair value through profit or loss	Fair value
Marketable securities	Fair value through profit or loss	Fair value
Derivative financial instruments	Fair value through profit or loss	Fair value
Trade and other receivables	Loans and receivables	Amortized cost
Trade and other payables	Other financial liabilities	Amortized cost
Secured note payable and shareholders loans	Other financial liabilities	Amortized cost

The types of risk exposure and the ways in which such exposures are managed are as follows:

Credit Risk

Credit risk is primarily related to the Company's receivables from joint venture partners and the risk of financial loss if a partner or counterparty to a financial instrument fails to meet its contractual obligations. Receivables from joint venture partners are normally collected within one to three months of the joint venture bill being issued to the partner. The Company historically has not experienced any collection issues with its joint venture partners to date. The Company attempts to mitigate the risk from joint venture receivables by obtaining partner approval of significant capital expenditures prior to expenditure. The Company establishes an allowance for doubtful accounts as determined by management based on their assessed collectability; therefore, the carrying amount of trade and other receivables generally represents the maximum credit exposure. The Company believes that its counterparties currently have the financial capacity to settle outstanding obligations in the normal course of business.

Concentration risks exist in cash and cash equivalents because significant balances are maintained with one financial institution and a brokerage firm. The risk is mitigated because the financial institution is an international bank and the brokerage firm is a reputable Canadian brokerage firm.

The Company's maximum exposure to credit risk is as follows:

	February 29, 2012	August 31, 2011	September 1, 2010
Cash and cash equivalents	\$57,692	\$165,266	\$43,776
Trade and other receivables	140,251	127,546	53,060
Prepaid expenses and deposits	-	45,522	-
Due from related party	-	-	1,325
Impairment	-	-	-
Balance	\$197,943	\$338,334	\$98,161

Liquidity Risk

The Company monitors its liquidity position regularly to assess whether it has the funds necessary to fulfill planned exploration commitments on its oil and gas properties or that viable options are available to fund such commitments from new equity issuances or alternative sources such as farm-out agreements. However, as an exploration company at an early stage of development and without significant internally generated cash flow, there are inherent liquidity risks, including the possibility that additional financing may not be available to the Company, or that actual exploration expenditures may exceed those planned. The current uncertainty in global markets could have an impact on the Company's future ability to access capital on terms that are acceptable to the Company. The Company has so far been able to raise the required financing to meet its obligations.

The following table illustrates the contractual maturities of financial liabilities:

February 29, 2012

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
Trade and others payables	\$734,822	\$734,822	-	-	-
Secured note payable (1)	947,136	947,136	-	-	-
Shareholders loans (1)	2,623,909	2,623,909	-	-	-
Total	\$4,305,867	\$4,305,867	-	-	-

August 31, 2011

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	4-5 years	After 5 years
Trade and others payables	\$1,197,695	\$1,197,695	-	-	-

Total	\$1,796,955	\$775,611	\$1,021,344	-	-

(1) Translated at current exchange rate.

Market Risk

Market risk represents the risk of loss that may impact our financial position, results of operations, or cash flows due to adverse changes in financial market prices, including interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market or price risks. The Company does not use derivative financial instruments or derivative commodity instruments to mitigate this risk.

The oil and gas industry is exposed to a variety of risks including the uncertainty of finding and recovering new economic reserves, the performance of hydrocarbon reservoirs, securing markets for production, commodity prices, interest rate fluctuations, potential damage to or malfunction of equipment and changes to income tax, royalty, environmental or other governmental regulations.

Market events and conditions in recent years including disruptions in the international credit markets and other financial systems and the deterioration of global economic conditions have caused significant volatility to commodity prices. These conditions caused a loss of confidence in the broader U.S. and global credit and financial markets. Notwithstanding various actions by governments, concerns about the general condition of the capital markets, financial instruments, banks, investment banks, insurers and other financial institutions caused the broader credit markets to further deteriorate and stock markets to decline substantially. These factors have negatively impacted company valuations and may impact the performance of the global economy going forward. Although economic conditions improved towards the latter portion of 2009, the recovery from the recession has been slow in various jurisdictions including in Europe and the United States and has been impacted by various ongoing factors including sovereign debt levels and high levels of unemployment which continue to impact commodity prices and to result in high volatility in the stock market.

The Company mitigates these risks by:

- utilizing competent, professional consultants as support teams to company staff.
- performing geophysical, geological or engineering analyses of prospects.

- focusing on a limited number of core properties.

(i) Commodity Price Risk

Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for petroleum and natural gas are impacted by world economic events that dictate the levels of supply and demand.

The Company believes that movement in commodity prices that are reasonably possible over the next twelve month period will not have a significant impact on the Company.

Commodity Price Sensitivity

The following table summarizes the sensitivity of the fair value of the Company's risk management position for the six months ended February 29, 2012 and 2011 to fluctuations in natural gas prices, with all other variables held constant. When assessing the potential impact of these price changes, the Company believes that 10 percent volatility is a reasonable measure. Fluctuations in natural gas prices potentially could have resulted in unrealized gains (losses) impacting net income as follows:

	2012		2011	
	Increase 10%	Decrease 10%	Increase 10%	Decrease 10%
Net revenue	\$22,198	\$18,162	\$31,772	\$25,996
Net income (loss)	\$(1,030,197)	\$(1,034,233)	\$246,204	\$240,428

(ii) Currency Risk

The Company is exposed to the fluctuations in foreign exchange rates. The prices received by the Company for the production of natural gas and natural gas liquids are primarily determined in reference to United States dollars but are settled with the Company in Canadian dollars. The Company's cash flow for commodity sales will therefore be impacted by fluctuations in foreign exchange rates.

The Company operates in Canada and a portion of its expenses are incurred in U.S. dollars. A significant change in the currency exchange rates between the CDN dollar relative to US dollar could have an effect on the Company's results of operations, financial position or cash flows.

The Company is exposed to currency risk through the following assets and liabilities denominated in US dollars at February 29, 2012, August 31, 2011 and September 1, 2010:

Financial Instruments	February 29, 2012	August 31, 2011	September 1, 2010
Cash and cash equivalents	\$682	\$117,383	\$5,046
Trade and other receivables	74,949	72,487	21,926
Due from related party	-	-	1,245
Trade and other payables	301,327	656,401	198,015
Shareholder loans	2,363,740	2,790,000	-
Secured notes payable	960,000	1,035,000	1,135,000
Total US\$	\$3,700,698	\$4,671,271	\$1,361,232
CDN dollar equivalent at year end ⁽¹⁾	\$3,651,109	\$4,570,372	\$1,448,215

(1) Translated at the exchange rate in effect at February 29, 2012 \$0.9866 (August 31, 2011 \$0.9784, September 1, 2010 \$1.0639)

For the six months ended February 29, 2012 the Company had a foreign exchange loss of \$36,355 due to the fluctuations in the CDN dollar compared to the US dollar (August 31, 2011 \$164,800 gain). For the six months ended February 29, 2012 a 1% increase/decrease in the exchange rate is estimated to give rise to a change in net loss and comprehensive loss of approximately \$445 (August 31, 2011 \$1,904). The Company does not use derivative financial instruments to reduce its foreign exchange exposure.

(iii) Interest Rate Risk

Interest rate risk refers to the risk that the value of a financial instrument or cash flows associated with the instrument will fluctuate due to changes in market interest rates. The majority of the Company's debt is short-term in nature with fixed rates.

Based on management's knowledge and experience of the financial markets, the Company believes that the movements in interest rates that are reasonably possible over the next twelve month period will not have a significant impact on the Company.

(iv) Fair Value of Financial Instruments

The Company's financial instruments included on the statement of financial position as at February 29, 2012, August 31, 2011 and September 1, 2010, are comprised of cash and cash equivalents, marketable securities, trade and other receivables, prepaid expenses and deposits, due from related party, trade and other payables, secured notes payable, shareholder loans, loans payable, and derivative financial instruments.

The Company classifies the fair value of financial instruments measured at fair value according to the following hierarchy based on the amount of observable inputs used to value the instrument.

- Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 – Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.
- Level 3 – Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

Financial Instrument Classification	February 29, 2012		August 31, 2011		September 1, 2010	
	Carrying Value \$	Fair Value \$	Carrying Value \$	Fair Value \$	Carrying Value \$	Fair Value \$
Fair value through profit and loss:						
Cash	57,692	57,692	165,266	165,266	43,776	43,776
Marketable securities	1	1	1	1	1	1
Derivative Financial Instruments	462,412	462,412	1,325,449	1,325,449	2,580,089	2,580,089
Loans and receivables:						
Trade and other receivables	140,251	140,251	127,546	127,546	53,060	53,060
Prepaid expenses and deposits	-	-	45,522	45,522	-	-
Due from related party	-	-	-	-	1,325	1,325
Other financial liabilities:						
Trade and other payables	734,822	734,822	1,197,695	1,197,695	421,928	421,928
Secured notes payable	947,136	947,136	1,012,644	1,012,644	1,207,527	1,207,527
Shareholder loans	2,623,909	2,623,909	2,936,236	2,936,236	57,500	57,500
Loan payable	-	-	-	-	110,000	110,000

Cash and cash equivalents, derivative financial instruments and marketable securities are stated at fair value (Level 1 measurement). The carrying value of trade and other receivables, due from related party, trade and other payables secured notes payable, shareholder loans and loans payable approximate their fair value due to the short-term maturity of these financial instruments (Level 3 measurement).

Capital Management

The Company's objectives when managing capital are to ensure the Company will have sufficient financial capacity, liquidity and flexibility to fund its operations, growth and ongoing exploration and development commitments on its oil and gas interests. The Company is dependent on funding these activities through debt and equity financings. Due to long lead cycles of the Company's exploration activities, the Company's capital requirements currently exceed its operation cash flow generated. As such the Company is dependent upon future financings in order to maintain its flexibility and liquidity and may from time to time be required to issue equity, issue debt, adjust capital spending or seek joint venture partners.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of any underlying assets in order to meet current and upcoming obligations. Current plans for the development commitments of the Company's Texas leases include debt or equity financing or seeking and obtaining a joint venture partner.

The board of directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management and favourable market conditions to sustain future development of the business.

As at February 29, 2012, August 31, 2011 and September 1, 2010 the Company considered its capital structure to comprise of shareholders equity and long-term debt.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's capital management during the period ended February 29, 2012.

The Company is not subject to any externally imposed restrictions on its capital requirements.

RESULTS OF OPERATIONS

	Three Months Ended		Six Months Ended	
	February 29, 2012	February 28, 2011	February 29, 2012	February 28, 2011
Historical Production				
Natural gas (mcf/d)	54	55	53	54
Historical Prices				
Natural gas (\$/mcf)	\$2.42	\$3.82	\$2.81	\$3.68
Royalties costs (\$/mcf)	\$0.70	\$0.81	\$0.71	\$0.73
Production costs (\$/mcf)	\$2.20	\$3.38	\$2.01	\$3.40
Net back (\$/mcf)	\$(0.48)	\$(0.37)	\$0.09	\$(0.45)
Operations				
Revenue, net of royalties	\$8,376	\$14,903	\$20,180	\$28,884
Net income (loss) for the period	\$(1,507,904)	\$1,998,195	\$(1,032,215)	\$243,316
Income (loss) per share, basic	\$(0.041)	\$0.65	\$(0.29)	\$0.08
Income (loss) per share, diluted	\$(0.041)	\$0.43	\$(0.29)	\$0.05

Production Volume

For the three months ended February 29, 2012 average natural gas sales volumes were down slightly to 54 mcf/d compared to 55 mcf/d for the same period in 2011. Total production volume for the three month period ended February 29, 2012 was 4,860 mcf compared to 4,960 for the same period in 2011.

For the six months ended February 29, 2012 average natural gas sales volumes was 53 mcf/d compared to 54 mcf/d in the comparable six month period in 2011. Total production volume for the six month period ended February 29, 2012 was 9,597 mcf compared to 9,799 for the same period in 2011.

Commodity Prices

For the three months ended February 29, 2012 average natural gas prices received per mcf decreased by 37% to \$2.42 compared to \$3.82 for the three months ended February 29, 2011.

For the six months ended February 29, 2012 average natural gas prices received per mcf decreased by 24% to \$2.81 compared to \$3.68 for the three months ended February 29, 2011.

The decrease in average natural gas prices received was attributed to lower commodity prices for natural gas for the periods ended February 29, 2012.

Revenue, Net of Royalties

	Three Months Ended		Six Months Ended	
	February 29, 2012	February 28, 2011	February 29, 2012	February 28, 2011
Natural gas sales	\$11,774	\$18,936	\$26,998	\$36,035
Natural gas royalties	(3,398)	(4,033)	(6,818)	(7,151)
Revenue, net of royalties	\$8,376	\$14,903	\$20,180	\$28,884

Natural gas sales for the three months ended February 29, 2012 was down \$7,162 to \$11,774 compared to \$18,936 for the same period in 2011. Natural gas sales for the six months ended February 29, 2012 was down \$9,037 to \$26,998 compared to \$36,035 for the same period in 2011. The decrease in sales for the three and six months ended February 29, 2012 was attributed to slight decreases in production volume and lower commodity prices received for natural gas.

Royalties for the three months ended February 29, 2012 were \$3,398 versus \$4,033 for the comparable three month period in 2011. Royalties for the six months ended February 29, 2012 were \$6,818 versus \$7,151 for the comparable three month period in 2011. The decrease in royalties for the three and six months ended February 29, 2012 was primarily attributed to lower natural gas production in the current period.

As a result of the above, revenue, net of royalties for the three months ended February 29, 2012 decreased by 44% to \$8,376 compared to \$14,903 for the same three month period in 2011. Revenue, net of royalties for the six months ended February 29, 2012 decreased by 30% to \$20,180 compared to \$28,884 for the same three month period in 2011.

Operating Costs

For the three months ended February 29, 2012 operating costs were \$10,674 down \$6,170 compared to operating costs of \$16,844 for the three months ended February 28, 2011.

For the six months ended February 29, 2012, operating costs were \$19,322 compared to operating costs of \$33,405 for the comparable six month period in 2011.

The decrease in operating costs for three and six months ended February 29, 2012 was attributed to decreases in property maintenance costs.

Depletion

Depletion for the three months ended February 29, 2012 decreased by \$1,413 to \$4,463 compared to \$5,876 for the three months ended February 28, 2011. The decrease in depletion for the three months ended February 29, 2012 was a result of lower production volume.

Depletion for the six months ended February 29, 2012, decreased by \$2,753 to \$8,818 compared to depletion of \$11,571 for the comparable six month period in 2011. The decrease in depletion for the six months ended February 29, 2012 was a result of lower production volume.

General and Administrative Expenses

	Three Months Ended		Six Months Ended	
	February 29, 2012	February 28, 2011	February 29, 2012	February 28, 2011
Professional fees	\$40,835	\$79,541	\$48,125	136,649
Head office costs	6,088	31,914	18,088	57,871
Transfer and registrar costs	33,919	29,530	36,188	47,567
Office and general costs	3,874	2,250	5,270	6,096
Management fees	18,750	18,750	37,500	18,750
Salaries and wages	-	18,261	-	37,505
Total	\$103,466	\$180,246	\$145,171	\$304,438

General and administrative expenses for the three months ended February 29, 2012 were \$103,466 compared to \$180,246 for the three months ended February 28, 2011. The decrease in expenses during 2012 was primarily attributed to a decrease in professional fees of \$38,706 to \$40,835 compared to \$79,541, a decrease of \$25,826 to \$6,088 in head office costs compared to \$31,914 and a decrease in salaries and wages of \$18,261 to Nil during the current period compared to \$18,261 for the three months ended February 28, 2011.

General and administrative expenses for the six months ended February 29, 2012 were \$ 145,171 compared to \$304,438 for the six months ended February 28, 2011. The decrease in expenses during the six month ended February 29, 2012 was primarily attributed to a decrease in professional fees of \$88,524 to \$48,125 compared to \$136,649, a decrease of \$37,505 in salaries and wages to Nil compared to \$37,505, a decrease in head office costs of \$39,783 to \$18,088 compared to \$57,871 in the prior period.

Loss on Settlement of Debt

During the three month period ended February 29, 2012, the Company issued 993,903 common shares as full settlement of interest due on shareholder loans in the amount of \$164,196 compared to Nil in the same three month period in 2011. The amount allocated to common shares based on fair value was \$217,342 and \$53,146 was recorded as a loss on settlement of debt. During the three month period ending February 29, 2012, the Company converted shareholder loans of CDN\$857,500 through the issuance of a total of 8,575,000 units in the capital of the Company at \$0.10 per unit. The fair value of the units issued on the settlement date was \$2,252,715 and \$1,395,215 was recorded as a loss on settlement of debt.

During the six month period ended February 29, 2012, the Company issued 1,553,504 common shares as full settlement of interest due on shareholder loans in the amount of \$325,903 compared to Nil in the comparable period in 2011. The amount allocated to common shares based on fair value was \$395,587 and \$69,684 was recorded as a loss on settlement of debt. During the six month period ending February 29, 2012, the Company converted shareholder loans of CDN\$857,500 through the issuance of a total of 8,575,000 units in the capital of the Company at \$0.10 per unit. The fair value of the units issued on the settlement date was \$2,252,715 and \$1,395,215 was recorded as a loss on settlement of debt.

Marketing and Public Relations

During the three months ended February 29, 2012, the Company incurred marketing and public relations costs of Nil compared to Nil in the comparable three month period ended February 28, 2011.

During the six month period ended February 29, 2012, the Company incurred marketing and public relations costs of \$45,522 compared to Nil in the comparable six month period ended February 28, 2011.

Net Finance Expense

	Three Months Ended		Six Months Ended	
	February 29, 2012	February 28, 2011	February 29, 2012	February 28, 2011
Finance Income				
Foreign exchange gain	\$115,884	\$150,532	\$-	\$177,187
Finance Expense				
Accretion of decommissioning obligations	514	275	1,059	439
Foreign exchange loss	-	-	36,355	-
Interest expense	97,440	66,213	194,269	104,180
	97,954	66,488	231,683	104,619
Net finance income (expense)	\$17,930	\$84,044	\$(231,683)	\$72,568

Net finance income for the three months ended February 29, 2012, decreased by \$66,114 to \$17,930 compared to \$84,044 for the three month period ended February 28, 2011. The decrease was primarily a result of a decrease of \$34,648 in foreign exchange gain and an increase of \$31,227 in interest costs.

Net finance expense for the six month period ended February 29, 2012 increased by \$304,251 to \$231,683 compared to a net finance income of \$72,568 for the six months ended February 28, 2011. The increase in finance expenses was primarily attributed to a loss on foreign exchange of 36,355 compared to a gain in foreign exchange of \$177,187 in 2011, an increase in interest costs of \$90,089 to \$194,269 compared to \$104,180 in the comparable period.

Unrealized Gain (Loss) on Derivative Financial Instruments

For the three months ended February 29, 2012, the Company recorded an unrealized gain on derivative financial instruments of \$32,754 compared to an unrealized gain of \$2,102,214 for the three months ended February 28, 2011.

For the six months ended February 29, 2012, the Company recorded an unrealized gain on derivative financial instruments of \$863,020 compared to an unrealized gain of \$491,278 for the six months ended February 28, 2011.

The Company has warrants issued with an exercise price in US dollars which is different to the functional currency of the Company (Canadian Dollars) and accordingly the warrants are treated as a financial liability and the fair value movement during the period is recognized in the statement of comprehensive income (loss).

Net Income (Loss) for the Period

Net loss for the three months ended February 29, 2012 was \$1,507,904 compared to a net income of \$1,998,195 for the three months ended February 28, 2011. The increase in net loss for the three months ended February 29, 2012 was primarily related to a loss on settlement of debt in the amount of \$1,448,361 versus Nil in the comparable period and an unrealized gain on derivative financial instruments of \$32,754 versus an unrealized gain on derivative financial instruments of \$2,102,214 for the same three month period in 2011.

Net loss for the six months ended February 29, 2012 was \$1,032,215 compared to a net income of \$243,316 for the six months ended February 28, 2011. The increase in net loss during 2012 was attributed to a loss on settlement of debt in the amount of \$1,464,899 versus Nil in the comparable period and higher finance expenses of \$231,683 compared to finance income in the comparable period of \$72,568. The higher costs were partially offset by an unrealized gain on derivative financial instruments of \$863,020 compared to \$491,278 during the six months ended February 28, 2011.

Net Income (Loss) per Share, Basic and Diluted

Basic net loss per share for the three months ended February 29, 2012 was \$0.041 compared to a basic net income per share of \$0.065 for the same three month period in 2011.

Basic net loss per share for the six months ended February 29, 2012 was \$0.029 compared to a basic net income per share of \$0.008 for the same six month period in 2011.

Diluted net loss per share for the three months ended February 29, 2012 was \$0.041 compared to a diluted net income per share of \$0.043 for the same three month period in 2011.

Diluted net loss per share for the six months ended February 29, 2012 was \$0.029 compared to a diluted net income per share of \$0.005 for the same six month period in 2011.

SUMMARY OF QUARTERLY RESULTS

The following tables reflect the summary of quarterly results for the periods set out.

Reporting Standards	IFRS	IFRS	IFRS	IFRS
Year	2012	2011	2011	2011
For the quarter ending	February 29,	November 30	August 31	May 31
Revenue, net of royalties	\$ 8,376	\$ 11,803	\$ 15,558	\$ 12,474
Net income (loss) for the period	\$ (1,507,904)	\$ 475,687	\$ 493,679	\$ (257,366)
Income (loss) per share, basic	\$ (0.041)	\$ 0.014	\$ 0.015	\$ (0.008)
Income (loss) per share, diluted	\$ (0.041)	\$ 0.010	\$ 0.010	\$ (0.008)

Revenue, net of royalties for the four quarters fluctuated as a result of changes in production volume and commodity prices received. The material changes in net income or loss during the quarters is primarily related to the fair value movement of derivative financial instruments during the period. During the quarter ended February 29, 2012 the Company recorded a loss on settlement of debt of \$1,448,361.

Reporting Standards	IFRS		CDN GAAP	
Year	2011	2010	2010	2010
For the quarter ending	February 28	November 30	August 31	May 31
Revenue, net of royalties	\$ 14,903	\$ 13,981	\$ 18,925	\$ 14,680
Net income (loss) for the period	\$ 1,998,195	\$ (1,754,879)	\$ (496,520)	\$ (75,144)
Income (loss) per share, basic	\$ 0.065	\$ (0.057)	\$ (0.020)	\$ (0.003)
Income (loss) per share, diluted	\$ 0.043	\$ (0.057)	\$ (0.020)	\$ (0.003)

Revenue, net of royalties for the four quarters fluctuated as a result of changes in production volume and commodity prices received. The material changes in net income or loss during the February 2011 and November 2010 quarters is primarily related to the fair value movement of derivative financial instruments during the period

CAPITAL EXPENDITURES

For the six months ended February 29, 2012, the Company incurred exploration expenditures of \$216,492 on the Matthews and Murphy Leases located in Zavala County, Texas (\$2,014,009 February 28, 2011).

The Company expects that its capital expenditures will increase in future reporting periods as the Company incurs capital expenditures to explore and develop its oil and gas properties

FINANCING ACTIVITIES

During the six months ended February 29, 2012, the Company received \$291,845 and US\$175,000 and issued demand promissory notes bearing interest at 10% per annum. Interest is payable annually on the anniversary date of the notes.

During the six months ended February 29, 2012 the Company paid \$73,380 of secured notes due.

During the six months ended February 29, 2012 the Company completed a non-brokered private placement of a total of 1,000,000 units in the capital of the Company at a purchase price of \$0.10 per unit for gross proceeds of \$100,000.

In addition, during the six month period ended February 29, 2012, the Company issued 1,553,503 common shares as full settlement of interest due on shareholder loans in the amount of \$325,903 and converted debt and shareholder loans of \$857,500 through the issuance of a total of 8,575,000 units in the capital of the Company.

LIQUIDITY AND CAPITAL RESOURCES

Cash as of February 29, 2012 was \$57,692 compared to cash of \$165,266 at August 31, 2011. During the six months ended February 29, 2012 the Company received \$291,845 and US\$175,000 and issued demand loans bearing interest at 10% per annum.

For the six months ended February 29, 2012 the primary use of funds was related to administrative expenses and exploration expenditures incurred in the amount of \$216,492 for the Company's Matthews Lease and Murphy Lease located in Zavala County, Texas. In addition, the Company paid \$73,380 in secured notes. The Company's working capital deficiency at February 29, 2012 is \$4,696,290 compared to a working capital deficiency of \$6,194,833 at August 31, 2011.

Our current assets of \$197,944 as at February 29, 2012, (\$338,335 as of August 31, 2011) include the following items: cash \$57,692 (\$165,266 as of August 31, 2011); marketable securities \$1 (\$1 as of August 31, 2011); trade and other receivables \$140,251 (\$127,546 as of August 31, 2011); and prepaid expenses and deposits of Nil (\$45,522 as of August 31, 2011).

Our current liabilities of \$4,894,234 as of February 29, 2012 (\$6,533,168 as of August 31, 2011) include the following items: trade and other payables \$734,822 (\$1,197,695 as of August 31, 2011); shareholder loans \$2,623,909 (\$2,936,236 as of August 31, 2011); secured notes payable of \$947,136 (\$1,012,644 as of August 31, 2011); provisions \$125,955 (\$61,144 as of August 31, 2011); and derivative financial instruments \$462,412 (\$1,325,449 as of August 31, 2011).

At February 29, 2012 the Company had outstanding the following common share purchase warrants: 10,525,474 warrants exercisable at \$0.07 per share; 9,575,000 warrants exercisable at \$0.10 per share 148,452 warrants exercisable at US\$1.50

per share; 1,709,233 warrants exercisable at US\$1.00 per share; and 50,000 warrants exercisable at US\$1.25. If any of these common share purchase warrants are exercised it would generate additional capital for us.

Management of the Company recognizes that cash flow from operations is not sufficient to expand its oil and gas operations and reserves or meet its working capital requirements. The Company has liquidity risk which necessitates the Company to obtain debt financing, enter into joint venture arrangements, or raise equity. There is no assurance the Company will be able to obtain the necessary financing in a timely manner.

The Company's past primary source of liquidity and capital resources has been loans and advances, cash flow from oil and gas operations and the issuance of common shares.

If the Company issued additional common shares from treasury it would cause the current shareholders of the Company dilution.

PROVISIONS

During the six months ended February 29, 2012, a vendor of Dyami Energy has filed a claim in the District Court of Harris County, Texas seeking payment of US\$62,800. Dyami Energy is disputing the claim on the basis of excessive charges. The full amount of the provision in the amount of CDN\$61,961 has been recorded at February 29, 2012 (August 31, 2011 \$61,144 and September 1, 2010 \$66,813) and the outcome of this claim is uncertain at this time. For the six months ended February 29, 2012 a vendor of Dyami Energy is seeking payment of US\$64,863. Dyami Energy is disputing the amount charged due to faulty equipment. The full amount of the provision of CDN\$63,994 been recorded at February 29, 2012. Any legal costs will be expensed as incurred.

SECURED NOTES PAYABLE AND LOAN PAYABLE

At August 31, 2011 the Company had a secured promissory note payable to Source Re Work Program, Inc. ("Source") in the amount of US\$75,000 (September 1, 2010 US\$175,000). During the six months ended February 29, 2012 the Company paid the balance due on the secured promissory note of US\$75,000 together with accrued interest to August 31, 2011 of US\$6,250 (September 1, 2010 Nil).

At February 29, 2012 the Company has a US\$960,000, 6% per annum secured promissory note payable to Benchmark Enterprises LLC (August 31, 2011 and September 1, 2010 US\$960,000). The note was payable on December 31, 2011 or upon the Company closing a financing or series of financings in excess of US\$4,500,000. The due date of the note has been extended until June 30, 2012 with an interest rate of 10% per annum. For the six months ended February 29, 2012 the Company recorded interest of \$35,039. At February 29, 2012 included in trade and other payables is interest of \$15,569 (August 31, 2011 \$92,219 and September 1, 2010 \$26,862). During the six month period ended February 29, 2012 the Company issued 515,406 common shares as full settlement of interest due in the amount of \$103,021. The note is secured by Dyami Energy's interest in the Matthews and Murphy Leases, Zavala County, Texas (the "Leases"). The carrying value of Dyami Energy's interest in the Leases at February 29, 2012 was \$4,026,098. The Company may, in its sole discretion, prepay any portion of the principal amount.

The loan payable in the amount of \$110,000 was due to an arms' length 3rd party and was unsecured, non-interest bearing and repayable on demand. On May 4, 2011 the Company repaid the demand loan in full.

DERIVATIVE FINANCIAL INSTRUMENTS

The Company has warrants issued with an exercise price in US dollars which is different to the functional currency of the Company (Canadian Dollars) and accordingly the warrants are treated as a financial liability and the fair value movement during the period is recognized in the statement of comprehensive income.

The following table sets out the changes in derivative financial instruments during the respective periods.

	Number of Warrants	Fair Value Assigned	Weighted Average Exercise Price US \$
September 1, 2010	2,209,233	\$2,580,089	\$1.17
Warrants cancelled	(54,645)	(58,275)	\$1.25
Warrants issued	50,000	40,766	\$1.25
Change in fair value estimates	-	(1,237,131)	-
As at August 31, 2011	2,204,588	1,325,449	\$1.19
Warrants expired	(296,903)	(17)	\$1.00
Change in fair value estimates	-	(863,020)	-
As at February 29, 2012	1,907,685	\$462,412	\$1.05

On August 31, 2010, the Company issued 1,709,233 common share purchase warrants exercisable at US\$1.00 per common share until August 31, 2014. The fair value measured using the Black Scholes valuation model at February 29, 2012 was \$457,637 (August 31, 2011 \$1,145,351, September 1, 2010 \$2,046,871).

On June 10, 2010, the Company issued 333,333 common share purchase warrants exercisable at US\$1.00 per common share until December 10, 2011. On November 20, 2010 the Company cancelled 36,430 warrants and fair value measured using the Black Scholes valuation model of \$38,301 was recorded as an increase to contributed surplus. On December 10, 2011 the remaining 296,903 warrants expired and the fair value measured using the Black Scholes valuation model of \$17 was recorded as an increase to contributed surplus (August 31, 2011 \$89,499, September 1, 2010 \$350,450).

On June 10, 2010, the Company issued 166,667 common share purchase warrants exercisable at US\$1.50 per common share until June 10, 2012. On November 20, 2010 the Company cancelled 18,215 warrants and the fair value measured using the Black Scholes valuation model of \$19,974 was recorded as an increase to contributed surplus. The fair value of the remaining 148,452 warrants measured using the Black Scholes valuation model at February 29, 2012 was \$4,030 (August 31, 2011 \$68,437, September 1, 2010 \$182,768).

On April 29, 2011, the Company issued 50,000 common share purchase warrants exercisable at US \$1.25 per common share expiring May 4, 2012. The fair value measured using the Black Scholes valuation model at February 29, 2012 was \$745 (August 31, 2011 \$22,162, September 1, 2010 Nil).

OFF-BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements.

SEGMENTED INFORMATION

IFRS 8 requires operating segments be identified based on the Company's internal system for reporting information to senior management to allocate resources to the segments and to assess their performance.

The Company's reportable and geographical segments are Canada and the United States. The accounting policies used for the reportable segments are the same as the Company's accounting policies.

For the purposes of monitoring segment performance and allocating resources between segments, the Company's executive officer monitors the tangible, intangible and financial assets attributable to each segment. All assets are allocated to reportable segments. The following tables show information regarding the Company's reportable segments.

February 29, 2012	Three Months Ended			Six Months Ended		
	Canada	United States	Total	Canada	United States	Total
Net revenue	\$8,376	\$-	\$8,376	\$20,180	\$-	\$20,180

SEASONALITY AND TREND INFORMATION

The Company's oil and gas operations is not a seasonal business, but increased consumer demand or changes in supply in certain months of the year can influence the price of produced hydrocarbons, depending on the circumstances. Production from the Company's oil and gas properties is the primary determinant for the volume of sales during the year.

The level of activity in the oil and gas industry is influenced by seasonal weather patterns. Wet weather and spring thaw may make the ground unstable. Consequently, municipalities and provincial transportation departments enforce road bans that restrict the movement of rigs and other heavy equipment, thereby reducing activity levels. Also, certain oil and gas properties are located in areas that are inaccessible except during the winter months because of swampy terrain and other areas are inaccessible during certain months of year due to deer hunting season. Seasonal factors and unexpected weather patterns may lead to declines in exploration and production activity and corresponding declines in the demand for the goods and services of the Company.

The impact on the oil and gas industry from commodity price volatility is significant. During periods of high prices, producers conduct active exploration programs. Increased commodity prices frequently translate into very busy periods for service suppliers triggering premium costs for their services. Purchasing land and properties similarly increase in price during these periods. During low commodity price periods, acquisition costs drop, as do internally generated funds to spend on exploration and development activities. With decreased demand, the prices charged by the various service suppliers also decline.

World oil and gas prices are quoted in United States dollars and the price received by Canadian producers is therefore effected by the Canadian/U.S. dollar exchange rate, which will fluctuate over time. Material increases in the value of the Canadian dollar may negatively impact production revenues from Canadian producers. Such increases may also negatively impact the future value of such entities' reserves as determined by independent evaluators. In recent years, the Canadian dollar has increased materially in value against the United States dollar.

RELATED PARTY TRANSACTIONS AND BALANCES

The following transactions with individuals related to the Company arose in the normal course of business have been accounted for at the exchange amount being the amount agreed to by the related parties, which approximates the arm's length equivalent value.

Compensation of Key Management Personnel

The remuneration of directors and other members of key management personnel during the period were as follows:

	February 29, 2012	February 28, 2011
Short Term Employee Benefits (1)	\$37,500	\$ -

The following balances owing to an individual related to the Company are included in trade and other payables and are unsecured, non-interest bearing and due on demand:

	February 29, 2012	August 30, 2011	September 1, 2010 ⁽²⁾
Short Term Employee Benefits (1)	\$93,750	\$56,250	\$18,000

- (1) Commencing December 1, 2010 the Company accrues management fees for the President of the Company at a rate of \$6,250 per month.
(2) Management fees to the former President of the Company.

During the six month period ended February 29, 2012, Company received CDN\$28,845 and issued a promissory note to the President of the Company (August 31, 2011 US\$300,000). The notes are due on demand and bear interest at 10% per annum. Interest is payable annually on the anniversary date of the notes. For the six months ended February 29, 2012 the Company recorded interest of \$16,227. At February 29, 2012, included in trade and other payables is interest of \$12,739 (August 31, 2011 \$26,135). During the six month period ended February 29, 2012 the Company issued 103,806 common shares to the President as full settlement of interest due in the amount of \$30,195.

For the six months ended February 29, 2012 the Company accrued director's fees of \$1,900 (February 28, 2011 \$1,500). At February 29, 2012 the amount of directors' fees included in trade and other payables was \$10,700 (August 31, 2011 \$8,800 and September 1, 2010 \$6,700).

On September 1, 2011 the Company paid to Source Re Work Program, Inc. ("Source") the secured promissory note in full in the amount of US\$75,000 together with accrued interest of US\$6,250. Eric Johnson is the President of Source, a shareholder of the Company and was the Vice President of Operations for Dyami Energy until April 13, 2011 (see Note 13).

At February 29, 2012 the Company has a US\$960,000, 10% per annum secured promissory note payable to Benchmark Enterprises LLC ("Benchmark"). Benchmark is a shareholder of the Company. For the six months ended February 29, 2012 the Company recorded interest of \$35,039. At February 29, 2012 included in trade and other payables is interest of \$15,569 (August 31, 2011 \$92,219 and September 1, 2010 \$26,862). During the six month period ended February 29, 2012 the Company issued 515,406 common shares as full settlement of interest due in the amount of \$103,021 (see Note 13).

At February 29, 2012 included in trade and other payables is \$20,058 due to Gottbetter & Partners LLP for legal fees (August 31, 2011 \$68,918). On February 17, 2012 the Company converted \$50,000 of debt into 500,000 units in the capital of the Company at \$0.10 per unit. Each unit is comprised of one (1) common share and one (1) purchase warrant where each whole Warrant is exercisable until February 17, 2012 to purchase one (1) additional common share of the Company at a purchase price of \$0.10 per share. Gottbetter Capital Group, Inc. is a shareholder of the Company. Adam Gottbetter is sole owner of Gottbetter & Partners LLP and Gottbetter Capital Group, Inc.

At August 31, 2011 the Company had an unsecured, non-interest bearing and repayable on demand shareholder loan in the amount of \$57,500 (September 1, 2010 \$57,500). For the six months ended February 29, 2012 interest was imputed at a rate of 10% per annum and interest of \$2,334 was recorded and included in contributed surplus. On January 24, 2012 the Company converted \$50,000 of the loan into 500,000 units and on February 17, 2012 the Company converted the balance of the loan, \$7,500 into 75,000 units in the capital of the Company at \$0.10 per unit, respectively. Each unit is comprised of one (1) common share and one (1) purchase warrant exercisable until January 24, 2015 and February 17, 2012 respectively to purchase one (1) additional common share of the Company at a purchase price of \$0.10 per share.

During the six months ended February 29, 2012, the Company received US\$175,000 and \$263,000 and issued promissory notes to seven shareholders. At February 29, 2012 the Company had shareholder loans payable of US \$2,363,740 and CDN \$291,845 (August 31, 2011 US\$2,490,000 and CDN\$149,000). The notes are payable on demand and bear interest at 10% per annum. Interest is payable annually on the anniversary date of the notes. For the six months ended February 29, 2012 the Company recorded interest of \$135,166. At February 29, 2012, included in trade and other payables is interest of

\$119,795(August 31, 2011 \$171,640). During the six month period ended February 29, 2012 the Company issued 934,292 common shares as full settlement of interest due on shareholder notes in the amount of \$192,688.

On January 24, 2012 the Company converted \$300,000 of shareholder loans into 3,000,000 units in the capital of the Company at \$0.10 per unit and on February 17, 2012 the Company converted \$500,000 into 5,000,000 units in the capital of the Company at \$0.10 per unit. Each unit is comprised of one (1) common share and one (1) purchase warrant exercisable until January 24, 2015 and February 17, 2012 respectively to purchase one (1) additional common share of the Company at a purchase price of \$0.10 per share. .

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

General Information

Eagleford Energy Inc. (“Eagleford” or the “Company”) was amalgamated under the Business Corporations Act (*Ontario*) on November 30, 2009. The principal activities of the Company consist of exploration, development and production of petroleum and natural gas properties. In addition the Company holds a 0.3% net smelter return royalty on 8 mining claim blocks located in Red Lake, Ontario which is carried on the condensed interim consolidated statement of financial position at nil. The address of the registered office is 1 King Street West, Suite 1505, Toronto, Ontario, M5H 1A1. Eagleford’s common shares trade on the Over-the-Counter Bulletin Board (OTCBB) under the symbol EFRDF.

Basis of Preparation

Statement of Compliance

In conjunction with the Company’s annual audited consolidated financial statements to be issued under International Financial Reporting Standards (“IFRS”) for the year ended August 31, 2012, these unaudited condensed interim consolidated financial statements present Eagleford’s initial financial results of operations and financial position as at and for the six and three months ended February 29, 2012, including February 28, 2011 comparative periods. As a result, they have been prepared in accordance with IFRS 1 “First-time Adoption of International Financial Reporting Standards” and with International Accounting Standard (“IAS”) 34, “Interim Financial Reporting”. These unaudited interim condensed consolidated financial statements do not include all the necessary annual disclosures in accordance with IFRS. Previously, the Company prepared its interim and annual consolidated financial statement in accordance with Canadian generally accepted accounting principles (“Canadian GAAP”).

The preparation of these unaudited condensed interim consolidated financial statements resulted in selected changes to Eagleford’s accounting policies as compared to those disclosed in the Company’s annual audited financial statements for the period ended August 31, 2011 issued under Canadian GAAP. A summary of significant changes to Eagleford’s accounting policies is disclosed in Note 21 along with reconciliations presenting the impact of the transition to IFRS for the comparative periods as at September 1, 2010, as at and for the six and three months ended February 28, 2011, and as at and for the twelve months ended August 31, 2011.

Going Concern

These condensed interim consolidated financial statements have been prepared on a going concern basis which contemplates the realization of assets and the payment of liabilities in the ordinary course of business. The Company plans to obtain additional financing by way of debt or the issuance of common shares or some other means to service its current working capital requirements, any additional or unforeseen obligations or to implement any future opportunities. Should the Company be unable to continue as a going concern, it may be unable to realize the carrying value of its assets and to meet its liabilities as they become due. These consolidated financial statements do not include any adjustments for this uncertainty.

The Company has accumulated significant losses and negative cash flows from operations in recent years which raises doubt as to the validity of the going concern assumption. As at February 29, 2012, the Company had a working capital deficiency of \$4,696,290 and an accumulated deficit of \$3,137,214. The Company does not have sufficient funds to meet its liabilities for the ensuing twelve months as they fall due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company’s ability to continue operations and fund its liabilities is dependent on its ability to secure additional financing and cash flow. During the six months ended February 29, 2012 the Company extinguished \$1,183,403 of debt through the issuance of capital in the Company. In addition the Company raised \$100,000 through the issuance of units. Management is pursuing such additional sources of financing and cash flow to fund

its operations and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future. Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying consolidated financial statements.

Basis of Measurement

These condensed interim consolidated financial statements are stated in Canadian dollars and have been prepared on a historical cost basis except for certain financial assets and financial liabilities, which are measured at fair value.

Functional and Presentation Currency

These condensed interim consolidated financial statements are stated in Canadian dollars which is the Company's functional currency.

Use of Judgments and Estimates

The preparation of the interim condensed consolidated financial statements in conformity with IAS34 and IFRS1 requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the condensed interim financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual outcomes can differ from these estimates.

The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the amounts recognized in the condensed interim financial statements are:

Useful lives of Property, Plant and Equipment

The Company estimates the useful lives of property, plant and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of property, plant and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the relevant assets. In addition, the estimation of the useful lives of property, plant and equipment are based on internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in the estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of the property, plant and equipment would increase the recorded expenses and decrease the non-current assets.

Valuation and classification of exploration and evaluation assets

The value of exploration and evaluation assets are dependent upon the discovery of economically recoverable reserves which in turn is dependent on future oil and natural gas prices, future capital expenditures and environmental and regulatory restrictions. The decision to transfer exploration and evaluation assets to property and equipment is based upon management's determination of an area's technical feasibility and commercial viability based on proved and/or probable reserve estimates.

Stock Based Compensation

The Company measures the cost of equity-settled transactions to the relative fair value of the equity instruments at the date at which they are issued. Estimating relative fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the instrument. This estimate also requires determining and making assumptions about the most appropriate inputs to the valuation model including the expected life, volatility and dividend yield.

Decommissioning Liabilities

Decommissioning liabilities consist of asset retirement obligations that are based, in part, on estimates of future costs to settle the obligation, in addition to estimates of the useful life of the underlying assets, the rate of inflation and the risk-free discount rate.

Fair Value of Financial Instruments

The estimated fair value of financial assets and liabilities, by their very nature, are subject to measurement uncertainty.

Assessment of Commercial Reserves

Management is required to assess the level of the Company's commercial reserves together with the future expenditures to access those reserves, which are utilized in determining the depletion charge for the period, assessing whether any impairment charge is required against producing and developed, and the determination of the deferred tax liability. By their nature, these estimates of discovered proved and probable crude oil and natural gas reserves, including the estimates of future prices, costs, related future cash flows and the selection of a pre-tax risked discount rate relevant to the asset in question are subject to measurement uncertainty. The Company employs an independent reserves evaluator who periodically assesses the Company's level of commercial reserves by reference to data sets including geological, geophysical and engineering data together with reports, presentation and financial information pertaining to the contractual and fiscal terms applicable to the Company's assets. Significant judgment is involved when determining whether there have been any significant changes in the Company's reserves.

Taxes

Provisions for taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made.

Impairment of Non-financial Assets

Impairment exists when the carrying value of an asset or cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Company is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows and the growth rate used for extrapolation purposes.

Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these condensed interim financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

Principals of Consolidation

Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. The financial statements of subsidiaries are included in the condensed interim consolidated financial statements from the date that control commences until the date that control ceases.

The acquisition method of accounting is used to account for acquisitions of subsidiaries and assets that meet the definition of a business under IFRS. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The excess of the cost of the acquisition over the fair value of the identifiable assets acquired and liabilities and contingent liabilities assumed is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized immediately in profit or loss.

The condensed interim consolidated financial statements include the accounts of Eagleford, the legal parent, together with its wholly-owned subsidiaries, 1354166 Alberta Ltd. an Alberta operating company ("1354166 Alberta") and Dyami Energy LLC a Texas limited liability company ("Dyami Energy"). Intercompany balances and transactions have been eliminated on consolidation.

Joint Arrangements

Significantly all of the exploration and production activities of the Company are conducted jointly with others, and accordingly, the condensed interim financial statements reflect only the Company's proportionate interest in such activities.

Revenue Recognition

Revenues from the production of oil and gas properties in which the Company has an interest with joint partners, are recognized, on the basis of the Company's working interest in those properties (the proportionate consolidation method), on receipt of a statement of account from the operators of the properties.

Foreign Currencies

The functional and presentation currency of the Company is the Canadian dollar.

Items included in the financial statements of each consolidated entity are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transaction. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities not denominated in the functional currency of an entity are recognized in the statement of comprehensive income.

Assets and liabilities of entities with functional currencies other than Canadian dollars are translated at the period end rates of exchange, and the results of their operations are translated at average rates of exchange for the period. The resulting translation adjustments are included in accumulated other comprehensive income in shareholders' equity. Additionally, foreign exchange gains and losses related to certain intercompany loans that are permanent in nature are included in accumulated other comprehensive income.

Loss per Share

Basic loss per share is calculated by dividing net loss (the numerator) by the weighted average number of common shares outstanding (the denominator) during the period. Diluted loss per share reflects the dilution that would occur if outstanding stock options and share purchase warrants were exercised or converted into common shares using the treasury stock method and are calculated by dividing net loss applicable to common shares by the sum of the weighted average number of common shares outstanding and all additional common shares that would have been outstanding if potentially dilutive common shares had been issued.

The inclusion of the Company's stock options and share purchase warrants in the computation of diluted loss per share would have an anti-dilutive effect on loss per share and are therefore excluded from the computation.

Marketable Securities

At each financial reporting period, the Company estimates the fair value of investments which are held-for-trading, based on quoted closing bid prices at the consolidated statement of financial position dates or the closing bid price on the last day the security traded if there were no trades at the consolidated statement of financial position dates and such valuations are reflected in the consolidated financial statements. The resulting values for unlisted securities whether of public or private issuers, may not be reflective of the proceeds that could be realized by the Company upon their disposition. The fair value of the securities at February 29, 2012 was \$1 (August 31, 2011 and September 1, 2010 - \$1).

Financial Instruments***Classification and Measurement***

Financial instruments are measured at fair value on initial recognition of the instrument. Measurement in subsequent periods depends on whether the financial instrument has been classified as "fair value through profit and loss", "loans and receivables", "available-for-sale", "held-to-maturity", or "other financial liability" as defined by IAS 39, "Financial Instruments: Recognition and Measurement".

Financial assets and financial liabilities at "fair value through the statement of operations" are either classified as "held for trading" or "designated at fair value through profit and loss" and are measured at fair value with changes in fair value recognized in the statement of comprehensive income. Transaction costs are expensed when incurred. The Company has classified cash and cash equivalents, marketable securities and derivative financial instruments as "fair value through profit and loss".

Financial instruments classified as “loans and receivables”, “held-to-maturity”, or “financial liabilities” are measured at amortized cost using the effective interest method of amortization. “Loans and receivables” are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. “Held-to-maturity” financial assets are non-derivative investments that an entity has the positive intention and ability to hold to maturity.

“Other financial liabilities measured at amortized cost” are those financial liabilities that are not designated as “fair value through profit or loss” and that are not derivatives. The Company has classified trade and other receivables as “loans and receivables” and trade and other payables, secured notes payable, loans payable and shareholder loans as “other financial liabilities”.

Financial assets classified as “available-for-sale” are measured at fair value, with changes in fair value recognized in other comprehensive income. Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. The Company currently has no assets classified as “available for sale”.

Derivative Financial Instruments

The Company has entered into certain financial derivative contracts. These instruments are not used for trading or speculative purposes. The Company has not designated its financial derivative contracts as effective accounting hedges, and thus has not applied hedge accounting. As a result, all financial derivative contracts are classified as fair value through “fair value through profit or loss” and are recorded on the statement of financial position at fair value.

Embedded derivatives are separated from the host contract and accounted for separately if the economic characteristics and risks of the host contract and the embedded derivative are not closely related, a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative, and the combined instrument is not measured at fair value through profit or loss. Changes in the fair value of separable embedded derivatives are recognized immediately in the statement of comprehensive income. The Company has not identified any embedded derivatives.

Equity Instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Property, Plant and Equipment and Exploration and Evaluation Assets

Exploration and Evaluation (“E&E”) Assets

Pre-acquisition expenditures on oil and gas assets are recognized as an expense in the statement of comprehensive income when incurred. In accordance with IFRS 6, exploration and evaluation costs are capitalized within intangible assets until the success or otherwise of the well or project has been established and subject to an impairment review. The costs of unsuccessful wells in an area are written off to statement of comprehensive income.

Exploration and evaluation costs, including the costs of acquiring licenses and directly attributable general and administrative costs, initially are capitalized either as tangible or intangible E&E assets according to the nature of the assets acquired. The costs are accumulated in cost centers by well, field or exploration area pending determination of technical feasibility and commercial viability.

When E&E assets are determined to be technically feasible and commercially viable, the accumulated costs are transferred to property, plant and equipment. When E&E assets are determined not to be technically feasible and commercially viable or the Company decides not to continue with its activity, the unrecoverable costs are charged to statement of comprehensive income as exploration and evaluation expense.

E&E assets are assessed for impairment in any circumstances where sufficient data exists to determine technical feasibility and commercial viability, and facts and circumstances suggest that the carrying amount exceeds the recoverable amount. For purposes of impairment testing, E&E assets are allocated to cash-generating units (“CGUs”).

Development and Production Costs

Items of property, plant and equipment, which include petroleum and natural gas development and production assets, are measured at cost less accumulated depletion and depreciation and accumulated impairment losses. Development and production assets are grouped into CGUs for impairment testing.

When significant parts of an item of property, plant and equipment, including petroleum and natural gas interests, have different useful lives, they are accounted for as separate items (major components).

Gains and losses on disposal of an item of property, plant and equipment, including petroleum and natural gas interests, are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and are recognized net within profit or loss.

Subsequent Costs

Costs incurred subsequent to the determination of technical feasibility and commercial viability and the costs of replacing parts of property, plant and equipment are recognized as petroleum and natural gas interests only when they increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures are recognized in profit or loss as incurred. Such capitalized petroleum and natural gas interests generally represent costs incurred in developing proved and/or probable reserves and bringing in or enhancing production from such reserves, and are accumulated on a field or geotechnical area basis. The carrying amount of any replaced or sold component is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in profit or loss as incurred.

Depletion and Depreciation

The net carrying value of development or production assets is depleted using the units-of-production method by reference to the ratio of production in the period to the related proved plus probable reserves, taking into account estimated future development costs necessary to bring those reserves into production. Future development costs are estimated taking into account the level of development required to produce the reserves. These estimates are reviewed by independent reserve engineers at least annually.

Proved and probable reserves are estimated using independent reserve engineer reports and represent the estimated quantities of crude oil, natural gas and natural gas liquids which geological, geophysical and engineering data demonstrate with a specified degree of certainty to be recoverable in future years from known reservoirs and which are considered commercially producible.

Reserves may be considered commercially producible if management has the intention of developing and producing them and such intention is based upon:

- a reasonable assessment of the future economics of such production;
- a reasonable expectation that there is a market for all or substantially all the expected oil and natural gas production; and
- evidence that the necessary production, transmission and transportation facilities are available or can be made available.

Reserves may only be considered proved and probable if they are supported by either actual production or conclusive formation tests. The area of reservoir considered proved includes: (a) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any, or both; and (b) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geophysical, geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of oil and natural gas controls the lower proved limit of the reservoir.

Depreciation methods, useful lives and residual values are reviewed at each reporting date.

Impairment

Financial Assets

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate.

Individually significant financial assets are tested for impairment on an individual basis. Remaining financial assets are assessed collectively in groups that share similar credit risk characteristics.

All impairment losses are recognized in profit or loss.

An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized. For financial assets measured at amortized cost the reversal is recognized in profit or loss.

Non-financial Assets

The carrying amounts of the Company's non-financial assets, other than E&E assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. E&E assets are assessed for impairment when they are reclassified to property, plant and equipment as petroleum and natural gas interests, and also if facts and circumstances suggest that their carrying amount exceeds the recoverable amount.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit" or "CGU"). The recoverable amount of an asset or a CGU is the greater of its value in use and its fair value less costs to sell.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Value in use is generally computed by reference to the present value of the future cash flows expected to be derived from production of proved and probable reserves.

E&E assets are allocated to related CGUs when they are assessed for impairment, both at the time of any triggering facts and circumstances as well as upon their eventual reclassification to producing assets (petroleum and natural gas interests in property, plant and equipment).

An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

In respect of assets other than goodwill, impairment losses recognized in prior years are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depletion and depreciation or amortization, if no impairment loss had been recognized.

Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Provisions are not recognized for future operating losses.

Decommissioning Obligations

The Company's activities give rise to dismantling, decommissioning and site disturbance remediation activities. Provision is made for the estimated cost of site restoration and capitalized in the relevant asset category.

Decommissioning obligations are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the period-end date. Subsequent to initial measurement, the obligation is adjusted at the end of each period to reflect the passage of time and changes in the estimated future cash flows underlying the obligation. The increase in the provision due to the passage of time is recognized as finance costs whereas increases/decreases due to changes in the estimated future cash flows and changes to discount rate are capitalized. Actual costs incurred upon settlement of the decommissioning obligations are charged against the provision to the extent the provision was established.

Finance Income and Expenses

Net finance income or expense is comprised of interest income, interest expense on borrowings, accretion of the discount on provisions and gains or losses on foreign exchange.

Borrowing Costs

Borrowing costs incurred for the construction of qualifying assets are capitalized during the period of time that is required to complete and prepare the assets for their intended use or sale. All other borrowing costs are recognized in profit or loss using the effective interest method. Interest income is recognized as it accrues in profit or loss, using the effective interest method.

Taxes

Tax expense comprises current and deferred tax. Tax is recognized in the income statement except to the extent it relates to items recognized in other comprehensive income or directly in equity.

Current Income tax

Current tax expense is based on the results for the period as adjusted for items that are not taxable or not deductible. Current tax is calculated using tax rates and laws that were enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. Provisions are established where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Deferred tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the statement of financial position. Deferred tax is calculated using tax rates and laws that have been enacted or substantively enacted at the end of the reporting period, and which are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred tax liabilities:

- are generally recognized for all taxable temporary differences;
- are recognized for taxable temporary differences arising on investments in subsidiaries except where the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future; and
- are not recognized on temporary differences that arise from goodwill which is not deductible for tax purposes.

Deferred tax assets:

- are recognized to the extent it is probable that taxable profits will be available against which the deductible temporary differences can be utilized; and
- are reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are not recognized in respect of temporary differences that arise on initial recognition of assets and liabilities acquired other than in a business combination.

Non-Monetary Transactions

Transactions in which shares or other non-cash consideration are exchanged for assets or services are measured at the fair value of the assets or services involved.

Stock-Based Compensation

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to contributed surplus.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the Company obtains the goods or the counterparty renders the service.

Warrants

When the Company issues Units under a private placement comprising common shares and warrants, the Company follows the relative fair value method of accounting for warrants attached to and issued with common shares of the Company. Under this method, the fair value of warrants issued is estimated using a Black-Scholes option price model. The fair value is then related to the total of the net proceeds received on issuance of the Common shares and the fair value of the warrants issued therewith. The resultant relative fair value is allocated to warrants from the net proceeds and the balance of the net proceeds is allocated to the Common shares issued.

RECENT ACCOUNTING PRONOUNCEMENTS

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or International Financial Reporting Interpretations Committee (“IFRIC”) that are mandatory for accounting periods beginning after January 1, 2010 or later periods. The standards impacted that are applicable to the Company are as follows:

IFRS 9, ‘Financial Instruments’ was issued in November 2009 as the first step in the project to replace IAS 39 ‘Financial Instruments: Recognition and Measurement’. IFRS 9 introduces new requirements for classifying and measuring financial assets that must be applied starting January 1, 2013, with early adoption permitted. The IASB intends to expand IFRS 9 during the intervening period to add new requirements for classifying and measuring financial liabilities, de-recognition of financial instruments, impairment and hedge accounting. The Company is currently assessing the impact of this standard.

IFRS 10, ‘Consolidated Financial Statements’ was issued in May 2011 and will supersede the consolidation requirements in SIC-12 ‘Consolidation – Special Purpose Entities’ and IAS 27 ‘Consolidated and Separate Financial Statements’ effective for annual periods beginning on or after January 1, 2013, with early application permitted. IFRS 10 builds on existing principles by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements of the parent company. The standard also provides additional guidance to assist in the determination of control where this is difficult to assess. The Company is currently assessing the impact of this standard.

IFRS 11, ‘Joint Arrangements’ was issued in May 2011 and will supersede existing IAS 31, ‘Joint Ventures’ effective for annual period beginning on or after January 1, 2013, with early application permitted. IFRS 11 provides for the accounting of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form (as is currently the case). The standard also eliminates the option to account for jointly controlled entities using the proportionate consolidation method. The Company is currently assessing the impact of this standard.

IFRS 12, ‘Disclosure of Interests in Other Entities’ was issued in May 2011 and is a new and comprehensive standard on disclosure requirements for all forms of interests in other entities, including subsidiaries, joint arrangements, associates and unconsolidated structured entities. IFRS 12 is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted. The Company is currently assessing the impact of this standard.

IFRS 13, ‘Fair Value Measurement’ was issued in May 2011 and sets out in a single IFRS a framework for measuring fair value. IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This definition of fair value emphasizes that fair value is a market-based measurement, not an entity-specific measurement. In addition, IFRS 13 also requires specific disclosures about fair value measurement. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted. The Company is currently assessing the impact of this standard.

In May 2011, the IASB issued amendments to IAS 27, “Separate Financial Statements”, to establish the accounting and disclosure requirements for investments in subsidiaries, joint ventures, and associates when an entity prepares separate financial statements and replaces the current IAS 27, “Consolidated and Separate Financial Statements” as the consolidation guidance is included in IFRS 10, “Consolidated Financial Statements”. The Company is evaluating the impact that this standard may have on our statements of operations and financial position.

In May 2011, the IASB issued amendments to IAS 28, “Investments in Associates and Joint Ventures”, to establish the accounting for investments in associates and defines how the equity method is applied when accounting for associates and joint ventures. The Company is evaluating the impact that this standard may have on our statements of operations and financial position.

In June 2011, the IASB issued amendments to IAS 1, “Presentation of Items of Other Comprehensive Income”, to split items of other comprehensive income (OCI) between those that are reclassified to income and that are not. The standard is required to be adopted for periods beginning on or after July 1, 2012. The Company is evaluating the impact that this standard may have on our statements of operations and financial position.

In December 2011, the IASB issued amendments to IFRS 7, “Financial Instrument: Disclosures” to provide more extensive quantitative disclosures for financial instruments that are offset in the statement of financial position or that are subject to enforceable master netting or similar agreements. This standard is required to be adopted retrospectively for periods beginning on or after January 1, 2013. The Company is currently assessing the impact of this standard.

In December 2011, the IASB issued amendments to IAS 32, “Financial Instruments: Presentations” to clarify the requirements for offsetting financial assets and liabilities. The amendments clarify that the right to offset must be available on the current date and cannot be contingent on a future event. This standard is required to be adopted retrospectively for periods beginning on or after January 1, 2013. The Company is currently assessing the impact of this standard.

SUBSEQUENT EVENTS

On March 1, 2012, the Company granted to directors and a consultant options to purchase 500,000 common shares. These options are exercisable at \$0.32 per share, vest immediately and expire on February 28, 2017.

On February 24, 2012, the Company received shareholder approval to affect a forward stock split. Effective March 16, 2012 the Company amended its Articles to change each issued and outstanding common share in the capital of the Company into two (2) common shares in the capital of the Company.

On April 13, 2012 the Company received gross proceeds of US\$750,000 of equity capital from arm’s length private placement funding through the issuance of 3,000,000 units at a price of US\$0.25 per unit. Each unit is comprised of one common share and one-half a common share purchase warrant, with each whole warrant entitling the holder to acquire one common share of the Company at US\$0.50 until April 13, 2015. In connection with the private placement, the Company paid cash commissions and other expenses of US\$64,823 and issued an aggregate of 60,000 broker warrants. Each broker warrant entitles the holder to acquire one common share of the Company at an exercise price of US\$0.25 until April 13, 2015.

SHARE CAPITAL AND CONTRIBUTED SURPLUS

Authorized:

Unlimited number of common shares

Unlimited non-participating, non-dividend paying, voting redeemable preference shares

Issued:

Common Shares	Number	Amount
Balance September 1, 2010	29,751,026	\$ 3,817,184
Exercise of warrants (note a)	3,710,346	722,572
Issued as compensation (note b)	100,000	95,800

Private placement (note g)	1,000,000	\$0.10
Outstanding February 29, 2012	22,008,159	\$0.20
Forward stock split (note h)	22,008,159	-
Outstanding as of the date of this MD&A	44,016,318	\$0.21

(a) During the year ended August 31, 2011, 500,000 common share purchase warrants were exercised at \$0.07 expiring February 27, 2014 for proceeds of \$35,000. The amount allocated to warrants based on relative fair value using the Black Scholes model was \$12,000; 600,000 common share purchase warrants were exercised at \$0.07 expiring February 25, 2014 for proceeds of \$42,000. The amount allocated to warrants based on relative fair value using the Black Scholes model was \$14,400; 35,346 common share purchase warrants were exercised at \$0.07 expiring February 27, 2014 for proceeds of \$2,475. The amount allocated to warrants based on relative fair value using the Black Scholes model was \$822; and 2,575,000 common share purchase warrants were exercised at \$0.20 expiring April 14, 2011 for proceeds of \$515,000. The amount allocated to warrants based on relative fair value using the Black Scholes model was \$100,875.

(b) In April 2011, the Company entered into a consulting agreement with a service provider to provide corporate marketing and public relations to the Company for a period of six months. As compensation, the Company agreed to issue 100,000 common shares and 50,000 common share purchase warrants exercisable at US \$1.25 per common share expiring May 4, 2012. The amount allocated to common shares based on relative fair value using the Black Scholes model was \$95,800.

(c) On November 5, 2010, the Company terminated the agreement dated June 10, 2010 with Gar Wood Securities, LLC ("Gar Wood") to act as Investment Banker/Financial Advisor to the Company for a period of two years. As a result 36,430 warrants were cancelled out of the 333,333 warrants issued, exercisable at \$1.00 expiring December 10, 2011 and 18,215 warrants were cancelled out of the 166,667 warrants issued exercisable at \$1.50 expiring June 10, 2012. On December 10, 2011 296,903 common share purchase warrants exercisable at US\$1.00, expired. The amount allocated based on relative fair value using the Black Scholes model was \$17.

(d) During the six month period ended February 29, 2012, the Company issued 1,553,504 common shares as full settlement of interest due on shareholder loans in the amount of \$325,903. The amount allocated to common shares based on fair value was \$395,589 and \$69,686 was recorded as a loss on settlement of debt in the statement of comprehensive income.

(e) On January 24, 2012, the Company converted shareholder loans in the aggregate amount of \$300,000 through the issuance of a total of 3,000,000 units in the capital of the Company at \$0.10 per unit. Each unit is comprised of one (1) common share and one (1) purchase warrant exercisable until January 24, 2015 to purchase one (1) additional common share of the Company at a purchase price of \$0.10 per share. The fair value of the common shares issued on the settlement date was \$807,983 and the amount allocated to warrants based on relative fair value using the Black Scholes model was \$221,911 and \$729,894 was recorded as a loss on settlement of debt.

(f) On February 17, 2012, the Company converted debt and shareholder loans in the aggregate amount of CDN\$557,500 through the issuance of a total of 5,575,000 units in the capital of the Company at of \$0.10 per unit. Each unit is comprised of one (1) common share and one (1) purchase warrant exercisable until February 17, 2015 to purchase one (1) additional common share of the Company at a purchase price of \$0.10 per share. The fair value of the common

shares issued on the settlement date was \$855,194 and the amount allocated to warrants based on relative fair value using the Black Scholes model was \$367,627 and \$665,321 was recorded as a loss on settlement of debt.

(g) On February 17, 2012, the Company completed a non-brokered private placement of a total of 1,000,000 units in the capital of the Company at a purchase price of \$0.10 per unit for gross proceeds of \$100,000. Each unit is comprised of one (1) common share and one (1) purchase warrant exercisable until February 17, 2015 to purchase one (1) additional common share of the Company at a purchase price of \$0.10 per share. The amount allocated to warrants based on relative fair value using the Black Scholes model was \$48,530.

(h) On February 24, 2012, the Company received shareholder approval to affect a forward stock split. Effective March 16, 2012 the Company amended its Articles to change each issued and outstanding common share in the capital of the Company into two (2) common shares in the capital of the Company.

(i) On April 13, 2012 the Company received gross proceeds of US\$750,000 (CDN\$748,425) of equity capital from arm's length private placement funding through the issuance of 3,000,000 units at a price of US\$0.25 per unit. Each unit is comprised of one common share and one-half a common share purchase warrant, with each whole warrant entitling the holder to acquire one common share of the Company at US\$0.50 until April 13, 2015. In connection with the private placement, the Company paid cash commissions and other expenses of US\$64,823 and issued an aggregate of 60,000 broker warrants. Each broker warrant entitles the holder to acquire one common share of the Company at an exercise price of US\$0.25 until April 13, 2015.

The amount allocated to purchase warrants and broker warrants based on fair value using the Black Scholes model was \$299,989.

The fair value of the warrants issued during the six month period ended February 29, 2012 and the date of this MD&A, were estimated using the Black-Scholes pricing model with the following assumptions:

Black-Scholes Assumptions used

Risk-free interest rate	1% -2.6%
Expected volatility	205%-218%
Expected life (years)	3
Dividend yield	-
Fair value of the warrants issued on January 24, 2012	\$0.09
Fair value of the warrants issued on February 17, 2012	\$0.09
Fair value of the warrants issued on April 13, 2012	\$0.32

The following table summarizes the outstanding warrants as at February 29, 2012:

Number of Warrants	Exercise Price	Expiry Date
1,000,000	\$0.07	February 5, 2014
400,256	\$0.07	February 25, 2014
9,125,218	\$0.07	February 27, 2014
148,452	US \$1.50	June 10, 2012
1,709,233	US\$1.00	August 31, 2014
50,000	US\$1.25	May 4, 2012
3,000,000	\$0.10	January 24, 2015
5,575,000	\$0.10	February 17, 2015
1,000,000	\$0.10	February 17, 2015
22,008,159		

The following table summarizes the outstanding warrants as at the date of this MD&A:

Number of Warrants	Exercise Price	Expiry Date
2,000,000	\$0.035	February 5, 2014
800,512	\$0.035	February 25, 2014
18,250,436	\$0.035	February 27, 2014
296,906	US \$0.75	June 10, 2012
3,418,466	US\$0.50	August 31, 2014
100,000	US\$0.625	May 4, 2012
6,000,000	\$0.05	January 24, 2015
11,150,000	\$0.05	February 17, 2015
2,000,000	\$0.05	February 17, 2015
1,500,000	US\$0.50	April 13, 2015
60,000	US\$0.25	April 13, 2015
45,576,320		

The following table summarizes the outstanding warrants as at August 31, 2011:

Number of Warrants	Exercise Price	Expiry Date
1,000,000	\$0.07	February 5, 2014
400,256	\$0.07	February 25, 2014
9,125,218	\$0.07	February 27, 2014
296,903	US\$1.00	December 10, 2011
148,452	US \$1.50	June 10, 2012
1,709,233	US\$1.00	August 31, 2014
50,000	US\$1.25	April 29, 2012
12,730,062		

The following table summarizes the outstanding warrants as at September 1, 2010:

Number of Warrants	Exercise Price	Expiry Date
2,575,000	\$0.20	April 14, 2011
500,000	\$0.07	February 5, 2014
1,000,256	\$0.07	February 25, 2014
10,160,564	\$0.07	February 27, 2014
333,333	US\$1.00	December 10, 2011
166,667	US \$1.50	June 10, 2012
1,709,233	US\$1.00	August 31, 2014
16,445,053		

The following table summarizes the weighted average shares outstanding:

Weighted Average Shares Outstanding	Three Months Ended		Six Months Ended	
	February 29, 2012	February 28, 2011	February 29, 2012	February 28, 2011
Weighted average shares outstanding, basic	36,741,705	30,905,844	35,232,191	30,781,046
Dilutive effect of warrants	16,860,998	15,235,590	13,612,227	15,384,540
Weighted average shares outstanding, diluted	53,602,703	46,141,434	48,844,418	46,165,586

The effects of any potential dilutive instruments on loss per share related to the outstanding warrants are anti-dilutive and therefore have been excluded from the calculation of diluted loss per share.

Stock Option Plan

The Company has a stock option plan to provide incentives for directors, officers, employees and consultants of the Company. The maximum number of shares, which may be set aside for issuance under the stock option plan, is 20% of the issued and outstanding common shares of the Company on a rolling basis. As of February 29, 2012, no options have been issued.

Stock Based Compensation

On March 1, 2012, the Company granted options to purchase 500,000 common shares to directors and a consultant. These options are exercisable at \$0.32 per share, vesting immediately and expire on February 28, 2017. (Post forward split 1,000,000 common purchase options exercisable at \$0.16 per share). The Company recorded non-cash share based compensation costs of \$159,850 with a corresponding increase to contributed surplus

The fair value of the stock options granted were estimated on the date of the grant using the Black Scholes option pricing model with the following weighted average assumptions used.

Weighted average fair value per option	\$0.32
Weighted average risk free interest rate	1.44%
Forfeiture rate	0%
Weighted average expected volatility	213%
Expected life (years)	5
Dividend yield	Nil

Contributed Surplus

Contributed surplus transactions for the respective periods are as follows:

	<u>Amount</u>
Balance, September 1, 2010	\$43,750
Imputed interest	5,750
Warrants cancelled	58,275
Balance, August 31, 2011	107,775
Imputed interest (see Note 12)	2,334
Warrants expired	17
Balance, February 29, 2012	110,126
Stock based compensation	159,850
Balance as of the date of this MD&A	<u>\$269,976</u>
