Non-GAAP Financial Measures

In addition to our results determined in accordance with GAAP, we supplement our results with non-GAAP financial measures, including adjusted EBITDA, adjusted net income (loss), and adjusted net income (loss) per diluted share. Our management uses these non-GAAP financial measures in conjunction with GAAP financial measures to evaluate our operating results and financial performance. We believe these measures are useful to investors as they are widely used measures of performance and can facilitate comparison to other companies. These non-GAAP financial measures are not, and should not be considered as, measures of liquidity. These non-GAAP financial measures have limitations as analytical tools in that they do not reflect all of the amounts associated with our results of operations as determined in accordance with GAAP. Because of these limitations, these non-GAAP financial measures should be considered along with GAAP financial performance measures. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for, or superior to, financial information prepared and presented in accordance with GAAP. Investors are encouraged to review the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures. A reconciliation of the non-GAAP financial measures to such GAAP measures can be found below. These non-GAAP financial measures should be considered supplemental to, and not a substitute for, our reported financial results prepared in accordance with GAAP.
