

GoldTrain Drills 3.34 g/t Gold Over 3.5 Meters at Missinabie

FOR IMMEDIATE RELEASE

May 30th, 2012

Toronto, Ontario, May 30th, 2012 – GoldTrain Resources Inc (CNSX: GT) (“GoldTrain” or the “Company”) is pleased to provide an update on its 100% owned Missinabie Project.

During the month of March, 2012, GoldTrain completed 10 diamond drill holes totaling 1907.9 metres in the Nudulama area.

GoldTrain has received the final results for drill holes NU12-07 through to NU12-10. These holes were drilled on the Nudulama claims in the area of the historical resource.

The Nudulama claims host an historical resource of 422,000 tons at an average grade of 0.13 oz Au/ton containing approximately 54,000 contained ounces of gold above the 650 foot level (Tenoga Consultants Inc. 1988). This historical resource estimate pre-dates NI 43-101 and, accordingly, is non-compliant with the requirements of NI 43-101 and, therefore, cannot be relied upon. A qualified person, as defined in NI-43-101, has not performed sufficient work on the Nudulama Property to classify the historical resource estimate as mineral resource or mineral reserve. GoldTrain is not treating the historical resource estimate as a current mineral resource or mineral reserve.

GoldTrain President and COO, Brian Wright, commented “I am very pleased with results of our initial drill program on the Nudulama Property. With 9 out of 10 drill holes intersecting significant gold values over considerable widths the potential for future discoveries in this vastly underexplored camp is enhanced. GoldTrain is currently reviewing historical work on the numerous gold showings on the property and is planning a summer field program to locate, map and sample the property to assist with future drill programs”.

Quality Control / Quality Assurance

The company has implemented a quality assurance and quality control program to ensure that the sampling and analysis of all samples is conducted in accordance with the best possible practices.

Qualified Person

Joerg Kleinboeck, Vice President of Exploration is the designated Qualified Person as defined by National Instrument 43-101, and has approved the technical content of this news release.
