

Idaho Champion Commences Fall Exploration Program on its Cobalt Properties

Toronto, Ontario--(Newsfile Corp. - October 20, 2022) - [Idaho Champion](#) (CSE: ITKO) (OTCQB: GLDRF) (FSE: 1QB1) ("**Idaho Champion**" or the "**Company**") is pleased to announce that it has mobilized a technical team to begin advancement of the Company's cobalt projects located in the heart of the Idaho Cobalt Belt.

The Idaho Champion technical team has arrived in Salmon, Idaho and will prioritize the Company's beneficially located Twin Peaks and Victory projects (the "Projects") (See Figure 1) for the 2022 fall program.

2022 Fall Exploration Program Items:

- Comprehensive site reconnaissance
- Field program - preliminary geologic mapping
- Initial ridge and spur soil sampling

Jonathan Buick, Idaho Champion's CEO, commented: "We are pleased to be boots-on-the-ground in Idaho to advance our cobalt properties, where our team has already completed a comprehensive desktop evaluation. The US government has been explicit in the country's needs for domestic critical metals supply, including cobalt. The Idaho Geological Survey recently flew an airborne survey across Butte County, providing valuable regional scale data to all the players in the area. Jervis Mining has recently announced the commencement of production in the district, and exploration activities are ramping up with the strong cobalt demand for use in lithium batteries. All of this has driven Idaho Champion to expedite our first phase of fieldwork and move the projects forward as quickly as possible. We see a real opportunity to make an impact joining our peers in the Idaho Cobalt Belt."

The Twin Peaks Project comprises 2,761 hectares (6,820 acres) and includes the historic Twin Peaks Copper Mine. It is located approximately 3 kilometres from Electra Battery Metals' advanced exploration stage Iron Creek Project, which boasts an indicated resource of 2.2 Mt* grading 0.26% cobalt (Co) and 0.65% copper (Cu) and 2.7 Mt* grading 0.22% Co and 0.68% Cu in the inferred category.

The Victory Project is comprised of 1,627.5 hectares (4,020 acres) and is 6 kilometres south of the historic Blackbird Mine and Jervis Mining's Idaho Cobalt Operations*, which was officially commissioned on October 7, 2022 as North America's only primary cobalt mine.

** The Projects are at an early stage of exploration, and the Company cautions that the qualified persons who have reviewed and approved this news release have not verified scientific or technical information produced by third parties. Further, proximity to projects containing cobalt-copper resources offers no assurance that the rock types or resources reported by Electra, Jervis and others will extend onto the Projects; nor should such proximity be assumed to imply similarity to mineralization and results reported by other companies in the district.*
