

Star Navigation Dubai Airshow 2011 Update

TORONTO, December 19, 2011 - Star Navigation Systems Group Ltd. (TSX-V: SNA) ("Star" or the "Company"), is pleased to provide an update on its attendance at the Dubai Airshow 2011.

The Dubai Airshow is a significant bi-annual opportunity for the aviation community to meet, showcase their products and services, and build relationships and sales. Throughout the week, the team had the opportunity to explain the STAR-ISMS® technology to various airlines, and noted strong interest on the part of many pilots, Engineering and Operations department heads, air traffic controllers and MRO companies. Many commented on several features that they felt could positively impact their day to day operations. For instance, several attendees had concerns with the amount of time that it currently took for each separate department in the airline to receive "end of flight" reporting tailored to its specific needs, one of the important problems addressed by the STAR-ISMS® technology.

A seven minute video, explaining in detail how this system benefits the airline industry, is available at <http://www.youtube.com/watch?v=8vXWh29uon4&feature=youtu.be>. Additional information is also available at www.airbornedataservices.com and www.star-navigation.com.

Certain statements contained in this News Release constitute forward-looking statements. When used in this document, the words "may", "would", "could", "will" and similar expressions, as they relate to Star or its management are intended to identify forward-looking statements. Such statements reflect Star's current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause Star's actual performance or achievements to vary from those described herein. Should one or more of these factors or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated or expected. Star does not assume any obligation to update these forward-looking statements. For further information:
