ITEM 8. EXECUTIVE OFFICER

The following officer of the Company is knowledgeable about the material change and the Report:

Viraf S. Kapadia, Chief Executive Officer, (416) 252-2889

ITEM 9. DATE OF REPORT

Dated at Toronto, Ontario this 3rd day of January, 2011.

By: (signed) Viraf S. Kapadia
Viraf S. Kapadia

Schedule "A"

News release via Canada NewsWire, Toronto 416-863-9350

Attention Business Editors:

Star Navigation files amended patent infringement complaint against Aeromechanical Services and provides USPTO update
TORONTO, Sept. 22 /CNW/ - Star Navigation Systems Group Ltd. (TSX-V: SNA) ("Star" or the "Company"), a leading edge technology company focused on providing Aerospace Solutions to aviation operators worldwide, announces that the U.S. Patent and Trademark Office ("USPTO") has now completed its reexamination of Aeromechanical Services Ltd.'s (TSX-V: AMA) patent U.S. 7,203,630 and clarified that the only point of innovation for the patented invention is its use of conventionally understood email as a format when transmitting data from an aircraft to a ground station. To the extent that AMA's products do not use email to transmit data from aircraft to ground stations or also use other formats, there is an open question whether AMA's products are actually covered by their own patent. However, Star remains confident that AMA's products are covered by Star's patent rights under the earlier granted U.S. 7,113,852, the infringement of which being unaffected by the reexamination of AMA's patent.

Therefore, Star Navigation has already filed an amended complaint in the ongoing patent infringement case in the Northern District of California to resolve the remaining procedural issues raised by AMA and Star looks forward to the Court's consideration of the past and ongoing infringement of Star's patent rights by AMA on the merits.

About Star Navigation:

Star Navigation Systems Group Ltd. (www.star-navigation.com) owns the exclusive worldwide license to its proprietary, patented In-flight Safety Monitoring System, the first system in the world to feature in-flight data-analysis, monitoring and diagnostics with a real-time connection between aircraft and ground. Its real-time capability of tracking performance-trends and predicting incident-occurrence enhances aviation safety and improves fleet management while reducing costs for the operator.

Certain statements contained in this News Release constitute forward-looking statements. When used in this document, the words "may", "would", "could", "will" and similar expressions, as they relate to Star or its management are intended to identify forward-looking statements. Such statements reflect Star's current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause Star's actual performance or achievements to vary from those described herein. Should one or more of these factors or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated or expected. Star does not assume any obligation to update these forward-looking statements.
