Schedule "A"

Star Navigation Dismisses Current Patent Litigation Based on Defendant's Meager Sales

TORONTO, March 17 /CNW/ - Star Navigation Systems Group, Ltd (TSX-V: SNA), ("Star"), today filed a Notice of Dismissal of its lawsuit against Aeromechanical Services Ltd. (TSX-V: AMA), without prejudice, in the U.S. District Court for the Northern District of California. Under the notice, Star continues to have the option of refileing the complaint against AMS for patent infringement of its U.S. Pat. No. 7,113,852 ("the '852 Patent") at a later date, for example, if AMS's sales improve in the future.

The decision to dismiss without prejudice was based on AMS's representations during discovery that the cost of the litigation would be significantly greater than any damages Star would receive, based on the limited number of sales AMS has made since its formation. According to AMS itself, any damages that Star could possibly obtain in the litigation are far outweighed by the legal costs already incurred by the parties.

Star will continue to monitor the in-flight data monitoring market to protect its intellectual property rights under the '852 Patent. To the extent that would be competitors offer infringing products, Star will protect its rights under the law.

Star Navigation Systems Group Ltd. (www.star-navigation.com) owns the exclusive worldwide license to its proprietary, patented In-flight Safety Monitoring System, the first system in the world to feature in-flight data-analysis, monitoring and diagnostics with a real-time connection between aircraft and ground. Its real-time capability of tracking performance-trends and predicting incident-occurrence enhances aviation safety and improves fleet management while reducing costs for the operator.
