Viraf S. Kapadia, Chief Executive Officer, (416) 252-2889

ITEM 9. <u>DATE OF REPORT</u>

Dated at Toronto, Ontario this 14th day of January, 2011.

By: <u>(signed) Viraf S. Kapadia</u> Viraf S. Kapadia

Star files patent infringement lawsuit against Aeromechanical Services Ltd.

TORONTO, Sept. 25 /CNW/ - Star Navigation Systems Group Ltd. (Star) announces today that it has filed a patent infringement lawsuit in the United States District Court for the Northern District of California against Aeromechanical Services Ltd. (TSX: AMA-V).

The patent infringement lawsuit, filed on September 19th, 2007, seeks substantial damages as a result of Aeromechanical Services' willful infringement of United States Patent No. 7,113,852, pursuant to 35 U.S.C. 271. Star is seeking substantial damages as well as an injunction to prevent Aeromechanical Services from continuing to unlawfully manufacture, sell, support or offer for sale, the Automated Flight Information Reporting System, and any other products infringing on the '852 patent.

As previously announced, Star has also formally requested the United States Patent and Trademark Office to reexamine Aeromechanical Services' own patent because that patent was issued erroneously. Star believes that there is sufficient evidence to question the validity and also the enforceability of that patent based on Star's previously filed and issued patent, the '852 Patent.

Star has retained the law firm of Barnes & Thornburg LLP, a Washington D.C. based law firm that specializes in intellectual property litigation, and is one of the largest law firms in the United States. Both Star and its legal counsel are extremely confident that Star's case will be successful. Star treats its intellectual property as one of the Company's most important resources. This patent infringement lawsuit is another step in Star's continued protection of its intellectual property, and its shareholders. Star will continue to take aggressive steps to protect its patents around the world.
