Star Navigation and Royal Airways sign Letter of Intent
TORONTO, ONTARIO--(CCNMatthews - March 9, 2005) - Star Navigation
Systems

Group Ltd. ("Star Navigation") (TSX VENTURE:SNA), a developer of innovative and leading edge systems in flight safety and fleet management, announced today that Royal Airways has executed a letter of intent (LOI) to purchase its flagship product, the In-flight Safety Monitoring System. Boeing Co. will be delivering Next-Generation 737-800's, and Star Navigation Systems Group Ltd. will be installing the In-flight Safety Monitoring System. The airline has also chosen Star Navigation to manage all real-time data monitoring from its Toronto operations center.

Earlier this year, Royal Airways, the only listed airline company in India announced the launch of its new brand - SpiceJet. The Company has placed an order for up to 20 Boeing next generation 737-800 airplanes. The deal is worth \$1.26 billion at current list prices. With a young, modern fleet, SpiceJet is surging ahead of its competitors by implementing cutting edge technology. Under the leadership of its CEO, Mark Winders, Royal Airways is managed by a professional team with significant experience in the industry.

Royal Airways' selection of the In-flight Safety Monitoring System, along with the recent endorsement from the Government of India, affirms Star Navigation's position as a leading provider of flight safety and fleet management systems.

Roger Page Executive Vice President stressed on the airlines' plan to use the latest in established and proven airline systems and a modern fleet. "Using the latest technology is the only way you can ensure we can provide attractive pricing without compromising on quality. Driving a low cost structure, boosting productivity and delivering value will be our focus," he said.

India's burgeoning airlines are expected to order over 200 new aircraft in 2005, and investment in the sector is set to rise to over \$6.6 Billion. Star Navigation is currently in earnest discussions with all the other Indian airline operators, and this strong vote of confidence from Royal Airways, along with the endorsement from the Government of India adds significance to our sales efforts in India and the region. A formal agreement is expected to be signed later this month.
