Star Navigation Actively Contributes to ITU Focus Group on Flight Tracking

TORONTO, Ontario, September 4, 2015, Star Navigation Systems Group Ltd. (TSX-V: SNA) (OTCBB: SNAVF) ("Star" or the "Company") is pleased to report on its latest active contribution to the ITU Focus Group for real-time flight data monitoring and streaming.

Following the loss of Malaysian Airlines MH-370, the International Civil Aviation Organization ("ICAO") and the International Telecommunications Union ("ITU") initiated worldwide working groups tasked with defining real-time flight tracking of aircraft.

Benefiting from its experience and expertise in real-time aircraft data monitoring, analysis and streaming, Star leads groups in defining scenarios for flight data analysis and flight tracking, together with the key IT infrastructure elements such as data security, data encryption, and data privacy.

The ITU plans to present the final report in February, 2016.

The STAR- A.D.S. [™] system, in operation today, already addresses the objectives of the focus groups and provides a cost effective solution to the concerns of the airlines, expressed during the workshops.

STAR-A.D.S. [™] provides:

- Real-time location of an aircraft.
- Increased safety, as well as efficiency in airline operations.
- A comprehensive and immediate view of the status and health of the aircraft.
- Decision-making tools for the operators.
- A cost-effective mix of communications means.
- Flight operations database management and analysis capabilities.

Mr. Amir Bhatti, Senior VP Programs and Implementation at Star Navigation stated,

“Star, along with other industrial and airline members, contributes to the ultimate goal of ICAO and ITU of reliable, practical and cost-effective solutions to the tracking of airline assets, the safety of the operations and of the passengers. The technology is flying today, increasing the safety and efficiency of the airlines, and, meeting or exceeding the expected ITU recommendations.”

The Chair of the Focus Group, Norizan Baharin of the Malaysian Communications and Multimedia Commission said,

“This ITU Focus Group’s success in bringing together the Information, Communication and Technology, (“ICT”) Aviation and Avionics sectors was the key ingredient to our success in identifying where the ICT sector is best-positioned to assist flight data monitoring. I thank Star Navigation and fellow participants in the Focus Group for the outstanding collaboration that has made this group such a valuable platform to exchange views and build new partnerships.”

About Star Navigation:

Star Navigation Systems Group Ltd. owns the exclusive worldwide license to its proprietary, patented In-flight Safety Monitoring System, STAR-ISMS®, the heart of the STAR-A.D.S.™ System. It is the first system in the world to feature in-flight data-analysis, monitoring and diagnostics with a real-time connection between aircraft and ground. Its real-time capability of tracking performance trends and predicting incident-occurrence enhances aviation safety and improves fleet management while reducing costs for the operator.

Star’s MMI Division designs and manufactures high performance mission critical flight deck, flat panel displays for defence and commercial aviation industries worldwide.

Certain statements contained in this News Release constitute forward-looking statements. When used in this document, the words "may", "would", "could", "will" and similar expressions, as they relate to Star or its management are intended to identify forward-looking statements. Such statements reflect Star's current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause Star's actual performance or achievements to vary from those described herein. Should one or more of these factors or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated or expected. Star does not assume any obligation to update these forward-looking statements, except as required by law.
