

**FOR IMMEDIATE RELEASE**

**TSX Venture Exchange Symbol: SNA**

**Star Navigation Systems Group Ltd. Signs With a VVIP Operator**

TORONTO, Ontario, May, 3, 2016) - Star Navigation Systems Group Ltd. (TSX VENTURE: SNA) ("Star" or the "Company"), is pleased to announce that it has signed a five (5) year contract for the purchase of the STAR-A.D.S. ® solution for installation on an Airbus wide bodied aircraft. The purchaser is an undisclosed Middle East VVIP jet operator.

The Company is advised that the operator's approach is to add the STAR-A.D.S. ® System across their entire fleet of aircraft after this first implementation.

The solution will provide worldwide tracking, in-flight monitoring and analysis of critical parameters and will provide real-time operations and maintenance data flow for action and further analysis on the ground.

Viraf Kapadia, Star's CEO, declared:

"The customer and our team worked efficiently to define the best customized solution to the operator's requirements. We are gratified by their confidence in us and excited by the potential that it opens in the region for us to offer similar solutions to other operators.

Our STAR-A.D.S.® System is currently the only system certified and already fielded for retrofit applications that covers all applications from Operations to Maintenance support, while providing worldwide tracking and data communications. It complies today with anticipated future regulations and recommendations, allowing maximum flexibility to the operator in their growth plans."

**About Star Navigation: ([www.star-navigation.com](http://www.star-navigation.com))**

**Star Navigation Systems Group Ltd.** owns the exclusive worldwide license to its proprietary, patented In-flight Safety Monitoring System, STAR-ISMS®, the heart of the STAR-A.D.S.® System. It is the first system in the world to feature in-flight data-analysis, monitoring and diagnostics with a real-time connection between aircraft and ground. Its real-time capability of tracking performance trends and predicting incident-occurrence enhances aviation safety and improves fleet management while reducing costs for the operator.

**Star's MMI Division** designs and manufactures high performance mission critical flight deck, flat panel displays for defence and commercial aviation industries worldwide.

Certain statements contained in this News Release may constitute forward-looking statements.

When used in this document, the words "may" "would", "could", "will" and similar expressions, as they relate to Star or its management are intended to identify forward-looking statements. Such statements reflect Star's current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause Star's actual performance or achievements to vary from those described herein. Should one or more of these factors or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated or expected.
