Affinor Growers Signs an "On-Farm Test Agreement" with California Berry Company

Vancouver (Canada), March 28, 2017 - Affinor Growers Inc. (CSE:AFI, OTC:RSSFF, Frankfurt:1AF) ("Affinor" or the "Corporation"), is pleased to announce the signing of a research and development Test Agreement with a large strawberry production company headquartered in California, USA.

The Test Agreement is a collaboration of Affinor's vertical farming tower technology, proprietary strawberry seedlings from California, and the new greenhouse facility in Abbotsford, B.C. currently under construction by Vertical Designs Ltd. Under the terms of the agreement, specific strains of strawberry seedlings will be supplied for testing to optimize production within the unique environment created by Affinor's greenhouse tower technology. In return, Affinor will share the testing and production results, and collect a portion of revenue from berry sales to the local market.

Strawberries will be produced within a technically advanced light-diffused polycarbonate greenhouse. Vertical Designs Ltd. will operate the facility to grow and test the various strawberry strains in partnership with Affinor. It is anticipated the facility will be operational and planting will begin in late 2017. Affinor is working directly with the Californian strawberry producer over the next several months sharing information and collaborating on growing protocols to ensure the best varieties for vertical applications are identified.

Jarrett Malnarick, President and CEO said that "This is a great opportunity for Affinor to work with a company that has a long history in strawberry development and can offer strain specific seedlings to optimize production for our vertical farming equipment. It is one more step in bringing our technology to market with solid production testing data."
