Solid Extends High Grade Mineralized Zone at Doade-Presqueiras Rare Metals Project, Spain

Including 11.75m Averaging 999 ppm Tin, 124 ppm Tantalum and 1.15% Lithium Oxide

TSXV: SRW FRANKFURT: YRS

VANCOUVER, June 9, 2011 /CNW/ - Solid Resources Ltd. ("SOLID" or the "Company") (TSXV: SRW) (Frankfurt: YRS) is pleased to provide assay results from an additional 4 holes drilled as part of the Phase 3 program that is currently underway at the Company's 100% owned Doade-Presqueiras rare metals project in North-western Spain, 25 km east of the port city of Pontevedra.

Hole S0-11-04, which was previously pending is now included. The results of hole S0-11-12 deserves special recognition for two reasons: firstly because results like this are the best to date in the northern section of the property known as the Presqueiras area. Secondly, these results come from a new extension of the mineralized zone, which were previously unknown, and now extend the drilling zone to a new area. The Company had intended to drill just this one hole in this area but with the assay data received, two additional holes are being drilled surrounding hole SO-11-12. The results of the 11.75 m of mineralized pegmatite are listed below, which include 1m grades of more than 2 kg per tonne of tin, more than 2% of Li_2O and 183 ppm Ta_2O_5 .

Presqueiras S0-11-12

Dyke	Width (m)	Interval (m)	Sample (m)	Rock type	Ta ₂ O ₅ (ppm)	Sn (ppm)	Li ₂ O (%)	Nb ₂ O ₅ (ppm)	Rb (ppm)
		73.95-74.95	1	Pegmatite	36	289	0.78	31	842
		74.95-75.95	1	Pegmatite	73	417	1.38	54	1130
		75.95-76.95	1	Pegmatite	146	810	1.55	107	844
		76.95-77.95	1	Pegmatite	85	845	1.03	84	1190
MainDyke I	11.75	77.95-78.95	1	Pegmatite	122	807	1.88	92	946
		78.95-79.95	1	Pegmatite	146	1235	1.08	101	1220
		79.95-80.95	1	Pegmatite	158	1480	0.8	130	930
		80.95-81.95	1	Pegmatite	122	2350	1.3	125	1875
		81.95-82.95	1	Pegmatite	122	832	2.06	102	981
		82.95-83.95	1	Pegmatite	122	539	1.33	111	514
		83.95-84.95	1	Pegmatite	146	1100	0.31	115	454
		84.95-85.7	0.75	Pegmatite	183	1040	0.042	143	524

"Drill core S0-11-12 is a significant development for the northern zone of the Doade-Presqueiras property, because it illustrates that we can find new areas with high grades in all of the elements of economic interest as we move forward with our exploration." stated Greg Pendura, CEO and President.

Latest Reported Holes - June 9, 2011

Thirty-one holes will be drilled in the 2011 campaign, the third carried out by Solid, which will assist the Company in verifying the location and continuation of the mineralised pegmatite dykes. Previously reported assays from the 2011 Drill Program can be viewed on our website at www.solidresources.com.

Dr. Alfonso S. Gracia Plaza, Doctor of Science in Economic Geology, is the Director of the ALBERTA-1 Project and supervises the Company's exploration programme on the project. He is responsible for the technical reporting in this news release and is the Company's "Qualified Person" for the purpose of NI 43-101.

About Solid Resources:

Solid Resources is a Canadian junior mining company focusing on the exploration and development of rare and precious metals and industrial commodities worldwide. The Company is currently quantifying the presence of tantalum, tin, lithium and other rare minerals on its property in north-western Spain. In addition, further exploratory work is being conducted on its gold, copper concession in the Province of Ayabaca in northwest Perú.

Quality Control:

Assay results were provided by ALS Minerals in Vancouver using XRF and ICP-MS. A complete description of the QA/QC can be referenced on the news release issued May 2, 2011.

Certain statements contained in this press release, including statements which are related to exploration activity and future prospects and profitability and which may contain words such as "could", "should", "expect", "believe", "will" and similar expressions and statements relating to matters that are not historical facts are forward-looking statements. Such forward-looking statements involve known and unknown risks and uncertainties which may cause the actual results, performances and/or achievements of Solid to be materially different from any future results, performances or achievements expressed or implied by such forward-looking statements. Such factors include fluctuations in the market conditions and prices of tantalum, lithium, tin, and other metals and related products and services; competition; political and economic conditions in countries in which Solid does business; changes in laws and regulations, including environmental regulations, to which Solid is subject, and other factors which are described in further detail in Solid's filings with the Canadian Securities Regulators.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
