

For Immediate Release

Mineworx Announces Entire E-Waste Plant on Location in Memphis

Technical Teams Commence Assembly Ahead of Schedule and Under Budget

Burnaby, B.C., Canada – November 15, 2017 – Mineworx Technologies Ltd., (the "Company" or "Mineworx") (TSXV: MWX) (OTCQB: MWXRF) (FSE: YRS WKN: A2DSW3), in partnership with EnviroLeach Technologies Inc. (CSE:ETI), a leading provider of proprietary, cost-effective, and non-toxic precious metals extraction solutions to the E-Waste and mining industries, announced today that further to its news release of October 25, 2017, that all nine separate 20-foot containerized E-Waste plant modules plus hundreds of additional components for both the dry and wet side of the E-Waste processing plant are now on-site at the partner's 650,000-square foot facility in Memphis, TN.

The Mineworx engineering and fabrication team on location in Memphis are now undertaking the complete assembly of the plant. Full assembly and testing of the plant is expected to be finalized by early December in preparation for the much-anticipated planned launch of the commercial processing of E-Waste in early Q1, 2018.

"The Mineworx/EnviroLeach E-Waste collaboration's ambitious vision of nearly a year ago is becoming a tangible reality. We are excited that we are on track to realize the commercial potential of the combined technologies, going from concept to fruition in such a short period of time.", commented the Company's CEO Greg Pendura. The Company will continue to provide timely updates on this industry-leading project as it nears commercial production.

About Mineworx

Mineworx is positioned for growth through partnerships with advanced mining and E-Waste opportunities utilizing its licensed cyanide-free precious metals extraction formula and patent-pending portable extraction technologies. These three innovations will increase and enhance business opportunities by deploying cost effective, environmentally friendly extractive metallurgy solutions.

About EnviroLeach

EnviroLeach is a near-term gold producer that extracts precious and strategic metals from ores, concentrates and E-Waste using a new, proprietary electro-chemical process. This process has been proven to be a cost-effective and sustainable alternative to the current Cyanide, Smelter and Acid based processes used today.
