About Mineworx Technologies

Mineworx is positioned for growth in the catalytic converter and mining sectors through the development and commercialization of its proprietary, environmentally-friendly processing technologies for the recovery of precious metals. Initial focus is the extraction of platinum and palladium from diesel catalytic converters with its partner Davis Recycling and will be building its first commercial extraction facility in Tennessee, USA. The company is also furthering the development of a historic iron ore concession, which it holds a 100% interest in South-Eastern Spain. For further information go to www.mineworx.net.
