

Regenx Tech Corp. Provides Production Update and Announces Upcoming Corporate Webinar on September 11, 2024

EDMONTON, Alberta, Sept. 03, 2024 -- **Regenx Tech Corp.**, (the "**Company**" or "**Regenx**") (TSXV: RGX) (OTCQB: RGXTF) (FSE: YRS WKN: A2DSW3) announces a production update at its Greeneville, TN facility, addressing recent challenges and outlining plans for resolution. The Company will host a Corporate Webinar on September 11, 2024, to provide additional details.

Production Update

Following the successful rights offering last June, Regenx began ramping up production to meet design capacity at its facility in Greeneville, TN. The Company successfully processed over 32,000 lbs of diesel catalytic converter feedstock and a portion of the processed materials, containing more than 30 oz of precious metal, was shipped to Heraeus for final refining. These revenues will be reflected in the Company's third quarter financial reporting.

During routine preventative maintenance procedures, technicians discovered unusual wear in the reactors. Upon examination by manufacturer technicians, it was determined that the wear was too excessive to repair or continue to operate within safety protocols. This issue only became apparent when the reactors were utilized at increased capacity levels.

Regenx's technical and operational teams in conjunction with equipment manufacturers have been working diligently to address this challenge and have developed a solution that is currently being implemented. These plans include procedures to prevent similar issues in the future.

Upcoming Corporate Webinar

Regenx will provide additional information on its plans and the timeline for resuming full operations as part of a Corporate Webinar to be held on Wednesday, September 11, 2024, at 11am ET. Regenx invites all shareholders and other interested parties to register for the webinar at the link below. If you have questions that you would like management to address on the webinar, please submit them in the registration form for review and consideration.

Date: Wednesday, September 11th, 2024

Time: 11am ET
