BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

1. NATURE AND CONTINUANCE OF OPERATIONS

Brisio Innovations Inc. (the “Company”) is a publicly listed company incorporated in Canada with limited liability under the legislation of the Province of British Columbia. The Company’s shares are listed on the Canadian Securities Exchange (“CSE”). The head office and principal address is 409 Granville Street, Suite 1052, Vancouver, British Columbia, Canada, V6C 1T2.

The unaudited condensed interim consolidated financial statements of the Company as at and for the nine months ended September 30, 2017 and 2016 comprise the Company and its subsidiaries (together referred to as the “Group”). The Group primarily invests its capital in companies and opportunities which management believes are undervalued in order to build a portfolio of investments.

These unaudited condensed interim consolidated financial statements (“interim financial statements”) have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Group will be able to continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

For the nine months ended September 30 2017, the Group had a net income of \$7,047 (2016 – net loss of \$67,405), has a working capital of \$49,915 (December 31, 2016 – deficit of \$169,669) and an accumulated deficit of \$19,162,952 (December 31, 2016 - \$19,169,999). These material uncertainties lend significant doubt as to the ability of the Company to meet its obligations as they come due, and accordingly, the appropriateness of the use of accounting principles applicable to a going concern. The Group’s ability to continue as a going concern is dependent upon earning sufficient returns on its investments and upon obtaining additional financing. The outcome of these matters cannot be predicted at this time. These interim financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue in business.

2. BASIS OF PREPARATION

(a) Statement of compliance:

These interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”).

These interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting. They do not include all the information required for full annual financial statements.

These interim financial statements were approved by the Board of Directors on November 28, 2017.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

2. BASIS OF PREPARATION (continued)

(b) Functional and presentation currency:

These interim financial statements are presented in Canadian dollars, which is the Group's functional currency.

(c) Basis of measurement:

The interim financial statements have been prepared on the historical cost basis except for financial instruments that are measured at their fair value.

In addition, these interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

(d) Use of estimates and judgments:

The preparation of financial statements in compliance with IFRS requires management to make certain judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from these estimates and assumptions.

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future years affected.

Significant accounting estimates:

- a. The judgement of indications of impairment of each asset and related determination of the net realizable value and write-down of these assets where applicable;
- b. The tax basis of assets and liabilities and related deferred income tax assets and liabilities;
- c. Rates of depreciation of software applications;
- d. The inputs used in determining the valuation of share purchase warrants owned by Brisio; and
- e. The fair value of the convertible note.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

2. BASIS OF PREPARATION (continued)

(d) Use of estimates and judgments (continued):

Significant accounting judgments:

- a. The determination of categories of financial assets and financial liabilities has been identified as an accounting policy which involves judgments or assessments made by management;
- b. The analysis of the functional currency for each entity of the Group. In concluding that the Canadian dollar is the functional currency of the parent and its subsidiary companies, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates. As no single currency was clearly dominant, management also considered secondary indicators including the currency in which funds from financing activities are denominated and the currency in which funds are retained.
- c. The going concern risk assessment (see note 1); and
- d. The determination of whether there is objective evidence that an available for sale investment is impaired thereby requiring the reclassification of the cumulative loss from equity to profit or loss.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these interim financial statements, and have been applied consistently by the Group.

(a) Basis of consolidation

(i) Subsidiaries:

The interim financial statements of the Company include its wholly-owned subsidiaries, Green River Petroleum (USA) Inc., incorporated in the State of Washington, USA and Netco Argentina S.A., incorporated in Argentina. Both subsidiaries were inactive at September 30, 2017.

Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. The financial statements of a subsidiary are included in the interim financial statements from the date that control commences until the date that control ceases.

(ii) Transactions eliminated on consolidation:

Intercompany balances and transactions, and any unrealized income and expenses arising from intercompany transactions, are eliminated in preparing the interim financial statements.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(b) Foreign currency

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on dates of transactions. At each financial position reporting date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Any foreign currency gains or losses are recognized in net income (loss) for the period.

(c) Financial instruments

Financial Assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held-to-maturity, available-for-sale, loans-and-receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through profit and loss. Regular way purchases and sales of FVTPL financial assets are accounted for at trade date, as opposed to settlement date. The Group has classified its cash and cash equivalents and the convertible note as FVTPL.

Financial assets classified as loans-and-receivables and held-to-maturity are measured at amortized cost. The Group's accounts receivable are classified as loans-and-receivables.

Financial assets classified as available-for-sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) except for losses in value that are considered other than temporary. The Group's investments are classified as available-for-sale.

Transactions costs associated with FVTPL and available-for-sale financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Financial instruments (continued)

Financial Liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other-financial-liabilities.

Financial liabilities classified as other-financial-liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other-financial-liabilities are subsequently measured at amortized cost using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Group's accounts payable and accrued liabilities are classified as other-financial-liabilities.

Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized through profit and loss. The Group has not classified any financial liabilities as FVTPL.

The Group is not engaged in any financial derivative contracts.

(d) Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, and cash equivalents that are readily convertible into cash and which are subject to insignificant risk of changes in value.

(e) Intangible assets

Intangible assets are recorded at cost upon acquisition and are depreciated over their estimated lives. Depreciation is expensed over the estimated useful life of the assets using the straight-line method. The Company monitors events and changes in circumstances which require an assessment of recoverability. If the carrying amount of the intangible assets is not recoverable, an impairment loss is recognized in profit or loss, determined by comparing the carrying amount of the asset to its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Investments in associates

An associate is an entity over which the Company has significant influence. If the Company holds, directly or indirectly (i.e. through subsidiaries), 20% or more of the voting power of the investee, it is presumed the entity has significant influence, unless it can be clearly demonstrated that this is not the case.

If the Company has significant influence over an investee, it accounts for its investment in an associate using the equity method. Under the equity method, on initial recognition, the investment in an associate is recognized at cost and the carrying amount is increased or decreased to recognize the Company's share of the profit or loss of the investee after the date of acquisition. The Company's share of the investee's profit or loss is recognized in the Company's profit or loss.

Distributions received from an investee reduce the carrying amount of the investment. It may also be necessary to adjust the carrying amount for changes in the Company's proportionate interest in the investee arising from changes in the investee's other comprehensive income. The Company's share of those changes is recognized in other comprehensive income.

(g) Impairment

(i) Financial assets:

A financial asset, other than those designated as FVTPL is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Individually significant financial assets are tested for impairment on an individual basis. The remaining financial assets are assessed collectively in groups that share similar characteristics.

All impairment losses are recognized in profit or loss. An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(g) Impairment (continued)

(ii) Non-financial assets:

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the CGU). The recoverable amount of an asset or a CGU is the greater of its value in use and its fair value less costs to sell.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Value in use is generally computed by reference to the present value of the future cash flows expected to be derived from production of proven and probable reserves. An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss. Impairment losses recognized in respect of CGU's are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depletion and depreciation or amortization, if no impairment loss had been recognized.

(h) Revenue recognition

The Group derives revenues from the sale of software and mobile applications through various platforms. The Group recognizes revenue when all of the following conditions are satisfied: (i) significant risks and rewards have transferred to the buyer; (ii) the Company no longer retains managerial involvement or effective control over the goods sold; (iii) the fee amount of revenue can be measured reliably; (iv) it is probable the economic benefits associated with the transaction will flow to the Company; and (v) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

For revenue earned through certain mobile platforms, revenue is recognized based on the gross amount because the Group is acting as the principal and has the contractual right to determine the price to be paid. The related platform and payment processing fees are recorded as cost of sales in the period incurred.

Advertising revenue for advertisements within the applications are recorded net of amounts retained by advertising networks.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(h) Revenue recognition (continued)

For every contract signed, the Group examines its characteristics in order to determine whether it is appropriate to recognize the net or gross revenue from services rendered by agents.

(i) Income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognized in profit or loss except to the extent that if the income tax expense related to items recognized directly in equity, the income tax expense would also be recognized in equity. Current tax is the expected tax payable on the taxable income for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

(j) Share capital

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares, share warrants and options are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares or options are recognized as a deduction from equity.

Valuation of equity units issued in private placements

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(j) Share capital (continued)

allocates value to the more easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component.

The fair value of the common shares issued in the private placements was determined to be the more easily measurable component and were valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, was allocated to the attached warrants. Any fair value attributed to the warrants is recorded in contributed surplus.

(k) Share-based payments

Where equity-settled share options are awarded to employees, the fair value of the options at the date of grant is charged to profit or loss over the vesting period. Performance vesting conditions are taken into account by adjusting the number of equity instruments expected to vest at each reporting date so that, ultimately, the cumulative amount recognized over the vesting period is based on the number of options that eventually vest. Non-vesting conditions and market vesting conditions are factored into the fair value of the options granted. As long as all other vesting conditions are satisfied, a charge is made irrespective of whether these vesting conditions are satisfied. The cumulative expense is not adjusted for failure to achieve a market vesting condition or where a non-vesting condition is not satisfied.

Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also charged to profit or loss over the remaining vesting period.

Where equity instruments are granted to non-employees, they are recorded at the fair value of the goods or services received in profit or loss, unless they are related to the issuance of shares. Amounts related to the issuance of shares are recorded as a reduction of share capital.

When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a valuation model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioral considerations.

All equity-settled share-based payments are reflected in contributed surplus, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in contributed surplus is credited to share capital, adjusted for any consideration paid.

Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognizes the amount that otherwise would have been recognized for services received over the remainder of the

(k) Share-based payments (continued)

vesting period. Any payment made to the employee on the cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds the fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognized as an expense.

(l) Earnings (loss) per share

Basic earnings (loss) per share is calculated by dividing the profit or loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per common share is computed by dividing the net income or loss applicable to common shares by the sum of the weighted average number of common shares issued and outstanding and all additional common shares that would have been outstanding, if potentially dilutive instruments were converted.

(m) Changes in accounting policies

The Company adopted the following new standards and interpretations issued by the IASB effective January 1, 2016. The adoption of these standards had no impact on the Group's financial statements.

IFRS 10 (Amendment)	<i>Consolidated Financial Statements</i>
IFRS 11 (Amendment)	<i>Joint Arrangements</i>
IAS 16 (Amendment)	<i>Property, Plant and Equipment</i>
IAS 27 (Amendment)	<i>Separate Financial Statements</i>
IAS 28 (Amendment)	<i>Investments in Associates and Joint Ventures</i>
IAS 38 (Amendment)	<i>Intangible Assets</i>

The following standards and interpretations have been issued but are not yet effective. The Group is currently assessing the impact that these standards will have on the financial statements. The Group plans to adopt these standards as soon as they become effective for the Group's reporting period.

Effective annual periods beginning on or after January 1, 2018:	
IFRS 9	<i>Financial Instruments: Classification and Measurement</i>
IFRS 15	<i>Revenue from Contracts with Customers</i>
IFRS 2 (Amendment)	<i>Clarification of Classification & Measurement of Share Based Payment Transactions</i>
Effective annual periods beginning on or after January 1, 2019:	
IFRS 16	<i>Leases</i>

4. DETERMINATION OF FAIR VALUES

Estimates of the fair value of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgement, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values. At September 30, 2017, the Group's financial instruments include cash and cash equivalents, accounts receivable, convertible note, investments, and accounts payable and accrued liabilities. Cash and cash equivalents, accounts receivable, and accounts payable and accrued liabilities are recognized on the statement of financial position at their carrying value which approximated their fair value due to their short-term nature.

All financial instruments measured at fair value are categorized into a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are described below:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets forth the Group's financial assets measured at fair value by level within the fair value hierarchy.

September 30, 2017	Level 1	Level 2	Level 3	Total
Assets:				
Cash and cash equivalents	\$ 161,419	\$ -	\$ -	\$ 161,419
Investment - shares	\$ 4,319,057	\$ -	\$ -	\$ 4,319,057

5. FINANCIAL RISK MANAGEMENT

(a) Overview

The Group's activities expose it to a variety of financial risks that arise as a result of its activities such as:

- market risk
- credit risk
- liquidity risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk.

The Board of Directors oversees management's establishment and execution of the Group's risk management framework. Management has implemented and monitors compliance with risk management policies. The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Group's activities.

(b) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

(i) Interest rate risk

The Group's cash is held in bank accounts and due to the short-term nature of these financial instruments fluctuations in market interest rates do not have significant impact on the fair value as at September 30, 2017.

The Group's sensitivity to interest rates is currently immaterial due to the short term maturity of its monetary assets and liabilities.

(ii) Foreign currency risk

Currency risk is the risk to the Group's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The Group does not use derivative instruments to reduce its exposure to foreign currency risk.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

5. FINANCIAL RISK MANAGEMENT (continued)

(b) Market risk (continued)

(ii) Foreign currency risk (continued)

At September 30, 2017, the Group had the following financial assets and liabilities in foreign currencies:

	US Dollars	Argentine Pesos
Cash	\$ 139	(550)
Accounts receivable	\$ -	696
Accounts payable	\$ 19,725	445,323

At September 30, 2017, dollar amounts were converted at a rate of \$1.00 US dollars to \$1.2480 Canadian dollars and Argentine pesos amounts were converted at a rate of 1.00 Argentine pesos to \$0.0704 Canadian dollars.

(iii) Other price risk

Other price risk is the risk that the fair or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk. The Group is exposed to significant other price risk. A 5% increase or decrease in the value of its investments by approximately \$243,864.

(c) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a loss for the other party by failing to discharge an obligation. The Group's cash and cash equivalents and accounts receivable are exposed to credit risk. The credit risk on cash and cash equivalents is considered small because the majority of funds have been placed with major Canadian and Argentinean financial institutions. Management believes that the credit risk related to its accounts receivable is remote.

(d) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Group's approach to managing liquidity risk is to ensure, as far as possible, that it will have sufficient liquidity to meet liabilities when due.

At September 30, 2017, the Group had a cash balance of \$161,419, accounts receivable of \$2,492 and GST recoverable of \$4,537. The Group has accounts payable and accrued liabilities of \$128,007. The Group intends to raise funds adequate to meet its liquidity needs for the next twelve months via private placement or the sale of over-performing investments.

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

6. CAPITAL MANAGEMENT

The Group considers its capital structure to include working capital and shareholders' equity. Management's objective is to ensure that there is sufficient capital to minimize liquidity risk and to continue as a going concern. Management reviews its capital management approach on an ongoing basis and believes that its approach, given the relative size of the Group is reasonable.

The Group is not subject to any external capital restrictions and the Group did not change its approach to capital management during the period.

7. CONVERTIBLE NOTE

On September 12, 2016, the Company completed an investment in ImmunoPrecise Antibodies Ltd. ("**IPA**"). The Company subscribed for a convertible note in the principal amount of \$97,500 (the "**Convertible Note**"). The Convertible Note earned interest at a rate of 5% per annum, calculating and accruing daily from the date of issue, payable in arrears on an annual basis commencing on September 12, 2017. Such interest shall be paid in Canadian currency or common shares in accordance with the terms.

In the event that IPA completes a reverse takeover to list on stock exchange ("**Pubco**"), the principal amount of the Convertible Note will be convertible into 650,000 units of Pubco issued at a price of \$0.15 per unit. Each Unit will consist of one common share of Pubco (a "**Pubco Share**") and one share purchase warrant ("**Pubco Warrant**"). Each Pubco Warrant will entitle the Company to acquire one additional Pubco Share at a price of \$0.30 per share for a period of twelve (12) months from the date of issue of the Pubco Warrants.

At December 31, 2016, the Convertible Note was revalued to fair value due to the conversion feature embedded in the Convertible Note. As a result, the change in fair value of the Convertible Note was \$1,397,612. The estimated fair value of the Convertible Note comprises the fair value of the shares and the fair value of the warrants determined by the use of the Black-Scholes option-pricing model with the following assumptions: Dividend yield 0%; expected annual volatility 100%; risk-free interest rate 0.75%; market share price of \$1.29; and expected life of 1 year. Expected volatility was based on the volatility of similar companies.

On March 16, 2017, the Convertible Note was converted into 650,000 units of IPA at a price of \$1.24 per unit. The Company was issued 650,000 common shares of IPA and 650,000 warrants which entitle the Company to acquire one additional share of IPA at a price of \$0.30 per share for a period of twelve (12) months from the date of issue.

On August 9, 2017, the Company completed an investment in Atlas Engineered Products Ltd. ("**Atlas**") The Company subscribed for a convertible note in the principal amount of \$97,500 (the "**Convertible Note2**"). The Convertible Note2 earned interest at a rate of 5% per annum, calculating and accruing daily from the date of issue, payable in arrears on an annual basis commencing on August 9, 2017. Such interest shall be paid in Canadian currency or common shares in accordance with the terms.

7. CONVERTIBLE NOTE (continued)

In the event that Atlas completes a reverse takeover to list on stock exchange ("**Pubco2**"), the principal amount of the Convertible Note² will be convertible into 487,500 units of Pubco2 issued at a price of \$0.20 per unit. Each Unit will consist of one common share of Pubco2 (a "**Pubco2 Share**") and one share purchase warrant ("**Pubco2 Warrant**"). Each Pubco2 Warrant will entitle the Company to acquire one additional Pubco2 Share at a price of \$0.40 per share for a period of twelve (12) months from the date of issue of the Pubco2 Warrants.

	September 30, 2017		December 31, 2016	
	Number of Shares	Amount	Number of Shares	Amount
Common shares:				
Balance, beginning of period	29,061,828	\$20,393,294	25,235,162	\$20,102,544
Transactions during the period:				
Private placement	5,332,833	799,925	3,776,666	283,250
Warrants exercised	1,838,331	275,750	50,000	7,500
Option exercised	275,000	37,500	-	-
Balance, end of period	36,507,993	\$21,506,468	29,061,828	\$20,393,294

In March 2016, the Company closed a non-brokered private placement pursuant to which it sold an aggregate of 3,776,666 Units at a price of \$0.075 per Unit, for gross proceeds of \$283,250. Each Unit consists of one common share of the Company (each, a "Share") and one-half of one share purchase warrant (each, a "Warrant"). Each whole Warrant entitles the holder thereof to purchase one additional Share at a price of \$0.15 per Share for a period of one year from closing of the Financing, subject to an acceleration provision whereby, in the event that the average closing price is equal to or greater than \$0.20 per Share for a period of fifteen consecutive trading days, the Company may accelerate the expiry date of the Warrants, to a date that is thirty days after the notice of completion of such period.

On December 12, 2016, 50,000 outstanding warrants were exercised at a price of \$0.15 per share.

On January 17, 2017, the Company closed a non-brokered private placement of 5,332,833 units at a price of \$0.15 per unit for gross proceeds of \$799,925. Each unit consists of one common share of the Company and one-quarter of one share purchase warrant. Each whole warrant will entitle the holder thereof to purchase one addition share at a price of \$0.25 per share for a period of two years from the closing of the financing, subject to an acceleration provision whereby, in the event that the average closing price is equal to or greater than \$0.40 per share for a period of ten consecutive trading days, the Company may accelerate the expiry date of the warrants to a date that is thirty days after the notice of completion of such period.

During the first quarter of 2017, 1,838,331 warrants were exercised at \$0.15 per share for gross proceeds of \$275,750.

9. SHARE CAPITAL (continued)

(b) Issued (continued)

On September 6, 2017, the aggregate of 275,000 options were exercised for gross proceeds of \$37,500.

(c) Stock options

The Company has a stock option plan in accordance with the policies on the Canadian Securities Exchange whereby, from time to time at the discretion of the Board of Directors, stock options are granted to directors, officers and certain consultants.

Under the plan up to 10% of the total number of issued common shares of the Company, calculated on a non-diluted basis, at the time an option is granted are available for the issuance of stock options. The exercise price of each option is based on the market price of the Company's common stock at the date of the grant less an applicable discount. The options can be granted for a maximum term of 10 years. The maximum number of options that may be granted to any one person must not exceed 5% of the common shares issued and outstanding at the time of grant unless disinterested shareholder approval is obtained. Any options granted to consultants or persons performing Investor Relations under the Amended Stock Option Plan shall vest to the optionee as follows: 25% at date of grant, 25% six months from date of grant, 25% nine months from date of grant and the remaining 25% twelve months from the date of grant. All other options granted under the Amended Stock Option Plan shall have vesting terms set at the discretion of the Board of Directors.

A summary of the stock option activity is as follows:

	<u>September 30, 2017</u>		<u>December 31, 2016</u>	
	Number	Weighted Average Exercise Price	Number	Weighted Average Exercise Price
Balance, beginning of period	1,840,000	\$0.15	1,325,000	\$0.24
Granted	-	-	650,000	0.10
Expired/Cancelled	-	-	(135,000)	0.72
Exercised	275,000	\$0.12		
Balance, end of period	<u>1,565,000</u>	<u>\$0.14</u>	<u>1,840,000</u>	<u>\$0.15</u>

BRISIO INNOVATIONS INC.

Notes to the Unaudited Condensed Interim Consolidated Financial Statements
(Expressed in Canadian Dollars)

For the Nine Months Ended September 30, 2017 and 2016

9. SHARE CAPITAL (continued)

(c) Stock options (continued)

As at September 30, 2017, the Company has outstanding directors' and employees' incentive stock options enabling the holders to acquire additional common shares as follows:

Number of options outstanding	Number of options exercisable	Exercise Price	Expiry Date
540,000	540,000	\$0.15	September 27, 2018
300,000	300,000	\$0.30	February 28, 2019
150,000	150,000	\$0.10	December 12, 2019
575,000	575,000	\$0.10	August 4, 2021
1,565,000	1,565,000		2.75 years remaining

On March 4, 2016, 35,000 options with an exercise price of \$0.60 expired unexercised.

On April 28, 2016, 20,000 options with an exercise price of \$0.825 expired unexercised.

On August 4, 2016, the Company granted 650,000 stock options to officers and directors of the Company. The stock options were granted for a period of 5 years, expiring on August 4, 2021, and each stock option will allow the holder to purchase a common share of the Company at an exercise price of \$0.10.

For the year December 31, 2016, \$43,515 (2015 - \$nil) has been recorded as share-based payment relating to options issued and fully vested during the period. The fair value of stock options was estimated using the Black-Scholes option-pricing model with the following weighted average assumptions: Dividend yield 0% expected annual volatility 129%; risk-free interest rate 0.75%; market share price of \$0.10; forfeiture rate of 0% and expected life of 5 years. Expected volatility was based on the historical share price volatility over the past 5 years. The expected life of the option was calculated based on the history of option exercises.

On October 18, 2016, 80,000 stock options at a price of \$0.75 expired unexercised.

On September 6, 2017, the aggregate of 275,000 options were exercised for gross proceeds of \$37,500
