

## PRESS RELEASE

June 13, 2016

### **Biosenta Inc. announces completion of the Proposal to Creditors, that Tri-Filler has been awarded a CAS number, and Mr. Dene Rogers will continue to be involved in the company**

Biosenta Inc. (**Biosenta**) [(CSE:ZRO)] is pleased to provide an update about three topics, as follows.

The Proposal to Creditors (**Proposal**), which was approved by shareholders in December, 2015, has been completed. The completion of the Proposal means that Biosenta is debt free except for future possible cash payments to creditors. Biosenta will continue its operations to develop its retail business and the development of its industrial product, Tri-Filler.

Second, Biosenta is pleased to announce that a CAS number has been assigned to Tri-Filler by the American Chemicals Association. The awarding of a CAS number for Tri-Filler supports the opinion of Biosenta that Tri-Filler is a unique chemical with properties that its constituents, pure calcium hydroxide and calcium carbonate, do not possess unless combined using Biosenta's nano-technology.

Third, Biosenta is pleased to announce that its CEO and interim Chairperson, Mr. Dene Rogers, will continue to be involved in the operations of Biosenta. In May, Mr. Rogers became the President and CEO of RadioShack in the U.S.

#### **About Biosenta Inc.**

Biosenta Inc. develops and manufactures a range of chemical compounds for household and industrial applications using advanced nanotechnology.

Biosenta household disinfectants and cleaners possess similar levels of efficacy as traditional disinfectants but with significantly lower concentrations of active ingredients resulting in lower toxicity. These disinfectants and cleaners will kill 100% of potentially deadly mould, fungi, bacteria and viruses on contact and prevent re-growth. The disinfectants are very safe due to very low toxicity.

The industrial compounds are embedded to protect various materials, including drywall, plastics and resins, from microbe formation. These compounds remain active for decades and protect the drywalls of buildings, objects such as furniture, and carpet which contain plastic or resin, as well as textiles and paper from mould, fungi, bacteria and viruses.

Both the household and industrial products are environmentally safe and biodegradable.

**Disclaimer**

The CSE has in no way passed upon the merits of the proposed transaction and has neither approved nor disapproved of the contents of this press release. Neither the CSE nor its Regulation Services Provider (as such term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.
