

NEWS RELEASE

Biosenta Issues News Release Correcting Management Information Circular dated May 7, 2019 and Provides Supplemental Information

January 20, 2020 – Toronto, Canada – Biosenta Inc. (“**Biosenta**” or the “**Company**”) listed on the CSE (CSE:ZRO) issues this news release to supplement and correct certain disclosure in the Company’s management information circular dated May 7, 2019 (the “**Information Circular**”).

The Company wishes to correct certain disclosure in the Information Circular and disclose that its directors David Butler, Edwin Korhonen and Dene Rogers were each director of Biosenta when the Company filed a proposal under the Bankruptcy and Insolvency Act in 2015. Other than the foregoing, no director has been subject to any cease trade order, bankruptcy, penalty or sanction.

The Company wishes to correct and clarify that the salary paid to Named Executive Officers, as discussed on page 11 of the Information Circular, is discretionary based on the financial status of the Company. As such, no salary was paid to Dene Rogers, President, CEO and Chairman of the Company, or to Louis Nagy, consultant to the Company, during the 2017 and 2018 years as the Company was facing ongoing financial difficulties.

About Biosenta Inc.

Biosenta Inc. develops and manufactures a range of chemical compounds for household and industrial applications using advanced encapsulated nanotechnology.

Other household disinfectants and cleaners possess similar levels of efficacy as traditional disinfectants, but Biosenta products contain significantly lower concentrations of active ingredients resulting in lower toxicity.

Biosenta disinfectants and cleaners will kill 99.9% of potentially deadly mold, fungi, bacteria and viruses on contact and prevent re-growth. Biosenta disinfectants are very safe due to the very low toxicity.

Biosenta industrial compounds are embedded to protect various materials, including drywall, plastic and resins, from microbe formation.

These compounds remain active for decades and protect the drywall of buildings, objects such as resin furniture, and carpet rubber backing and synthetic tufts which contain plastic or resin, as well as textiles and paper from mold, fungi, bacteria and viruses. Both the Biosenta household and industrial products are environmentally safe and biodegradable.
