

NEWS RELEASE

Biosenta Announces Full Revocation of Cease Trade Order

January 27, 2020 Toronto, Canada – Biosenta Inc. (“Biosenta” or the “Company”) listed on the CNSX (CNSX:ZRO) is pleased to announce that, effective immediately the Ontario Securities Commission granted full revocation of the cease trade order (the “CTO”) previously ordered against the Company in February 2019. Such revocation is applicable and effective in the provinces of British Columbia and Ontario.

The CTO was originally imposed as the Company had not filed its annual audited financial statements and Management’s Discussion and Analysis for the year ended September 30, 2018, nor the certifications of the foregoing filings, as required under Part 4 of National Instrument 51-102 *Continuous Disclosure Obligations*.

As at July 31, 2019, the Company filed all outstanding continuous disclosure documents that were required to be filed under applicable securities laws, and the Company is currently up-to-date in all of its required disclosure filings.

As a condition of revoking the Ontario cease trade order, the Ontario Securities commission requested that Biosenta undertake not to complete certain restructuring transactions, significant acquisitions or reverse takeovers involving a business not located in Canada unless the Company, among other things, first receives a receipt for a final prospectus in respect of such business. The Company has given such undertaking.

Biosenta anticipates that the common shares will resume trading shortly.

Once the common shares of Biosenta resume trading, Biosenta plans to move forward with the launching of its wet product “*True*” in the U.S. market and will be focused on generating the operating cash flows required to reduce monthly fixed costs. The launch of “*True*” is subject to the receipt of financing, which is not always guaranteed. Biosenta believes the product has a very safe and effective profile that differentiates it from amongst other similar products currently offered.

About Biosenta Inc.

Biosenta Inc. develops and manufactures a range of chemical compounds for household and industrial applications using advanced encapsulated nanotechnology.

Other household disinfectants and cleaners possess similar levels of efficacy as traditional disinfectants. But Biosenta products contain significantly lower concentrations of active ingredients resulting in lower toxicity.

Biosenta disinfectants and cleaners will kill 99.9% of potentially deadly mold, fungi, bacteria and viruses on contact and prevent re-growth. Biosenta disinfectants are very safe due to the very low toxicity.

Biosenta industrial compounds are embedded to protect various materials, including drywall, plastic and resins, from microbe formation.

These compounds remain active for decades and protect the drywall of buildings, objects such as resin furniture, and carpet rubber backing and synthetic tufts which contain plastic or resin, as well as textiles and paper from mold, fungi, bacteria and viruses. Both the Biosenta household and industrial products are environmentally safe and biodegradable.
