

Royal Monashee Gold Corp.
FINANCIAL STATEMENTS
September 30, 2010 and 2009

AUDITORS' REPORT

To the Shareholders of
Royal Monashee Gold Corp.

We have audited the balance sheets of Royal Monashee Gold Corp. as at September 30, 2010 and 2009 and the statements of loss and comprehensive loss and deficit and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In our opinion, these financial statements present fairly, in all material respects, the financial position of the Company as at September 30, 2010 and 2009 and the results of its operations and its cash flows for the years then ended in accordance with Canadian generally accepted accounting principles.

Royal Monashee Gold Corp.

NOTES TO THE FINANCIAL STATEMENTS

For the years ended September 30, 2010 and 2009

1. GOING CONCERN AND NATURE OF OPERATIONS

The Company was incorporated in Alberta on March 10, 1997. On June 22, 2006 the Company moved its incorporation jurisdiction to British Columbia.

The Company has historically been a junior resource exploration company engaged in the acquisition and exploration of unproven mineral interests in Canada. As at September 30, 2010 the Company retained no mineral properties as the mineral property previously held was written off in 2007. The ability of the Company to acquire a mineral property and potentially realize future profitability from production is entirely dependent on obtaining the necessary financing to acquire and develop a suitable resource property.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles ("Canadian GAAP") applicable to a going concern, which assumes that the Company will realize its assets and discharge its liabilities in the normal course of business. Realization values may be substantially different from the carrying values shown in the financial statements, should the Company be unable to continue as a going concern. Failure to continue as a going concern would require restatement of assets and liabilities on a liquidation basis, which could differ materially from the going concern basis.

2. ACCOUNTING POLICIES

Basis of presentation

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles which necessarily involves the use of estimates. The financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized below.

Earnings (loss) per share

Earnings (loss) per share is calculated using the weighted average number of common shares issued and outstanding during the year. Diluted earnings (loss) per share is presented using the treasury stock method and is calculated by dividing the net income (loss) applicable to common shares by the sum of the weighted average number of common shares outstanding and all additional common shares that would have been outstanding if potentially dilutive common shares had been issued.

Impairment of long-lived assets

Long-lived assets are assessed for impairment when events and circumstances warrant. The carrying value of a long-lived asset is impaired when the carrying amount exceeds the estimated undiscounted net cash flow from use and fair value. In that event, the amount by which the carrying value of an impaired long-lived asset exceeds its fair value is charged to earnings.

Asset retirement obligations

Asset retirement obligations are recognized when a legal or constructive obligation arises. This liability is recognized at the fair value of the asset retirement obligation. When the liability is initially recorded the Company capitalizes the cost by increasing the carrying amount of the related long-lived assets. Over time the liability is accreted to its present value each period, and the capitalized cost is amortized over the useful life of the related asset. Upon settlement of the liability, the Company may incur a gain or loss. As at September 30, 2010 the Company does not have any asset retirement obligations.

Royal Monashee Gold Corp.

NOTES TO THE FINANCIAL STATEMENTS

For the years ended September 30, 2010 and 2009

2. ACCOUNTING POLICIES – continued

Income taxes

Income taxes are recorded on a tax allocation basis. Under this method, current income taxes are recognized for the estimated income taxes payable for the current year. Future income tax assets and liabilities are recognized for the estimated income tax consequences attributable to differences between the financial statement carrying amounts of assets and liabilities and their respective income tax bases. Future income tax assets and liabilities are recognized using substantively enacted and enacted income tax rates. The effect of changes in effective income tax rates is recognized in income in the period in which the change occurs. Future income tax assets are recognized with respect to deductible temporary differences and loss carry forwards only to the extent their realization is considered more likely than not.

Unproven mineral interests

Mineral interests costs and exploration, development and field support costs directly relating to unproven mineral interests are deferred until the interests to which they relate are placed into production, sold or abandoned. The deferred costs will be amortized over the life of the orebody following commencement of production or written off if the mineral interest is sold or abandoned. Administration costs and other exploration costs that do not relate to any specific mineral interest are expensed as incurred.

Although the Company had no unproven mineral interests as at September 30, 2010; should any be acquired in the future, management will periodically review the carrying values of its deferred mineral interests with a view to assessing whether there has been any impairment in value. Management takes into consideration various information including, but not limited to, results of exploration activities conducted to date, estimated future metal prices, and reports and opinions of outside geologists, mine engineers and consultants. When it is determined that a project or interest will be abandoned or its carrying value has been impaired, a provision is made for any expected loss on the project or interest.

Financial instruments

Under Section 3251, Equity, Section 3855, Financial Instruments – Recognition and Measurement and Section 3861, Financial Instruments – Disclosure and Presentation, all financial instruments are classified into one of the following five categories: held for trading, held to maturity, loans and receivables, available for sale or other financial liabilities. All financial instruments are included on the balance sheet and are measured at fair value upon inception with the exception of certain related party transactions. Subsequent measurement and recognition of change in the fair value of financial instruments depends on their initial classification. Held for trading financial instruments are measured at fair value and all gains and losses are included in operations in the period in which they arise. Available for sale financial instruments are measured at fair value with revaluation gains and losses included in other comprehensive income until the asset is removed from the balance sheet. Loans and receivables, investments held to maturity and other financial liabilities are measured at amortized cost using the effective interest method. Gains and losses upon inception, de-recognition, impairment write-downs and foreign exchange translation adjustments are recognized immediately. Transaction costs related to financings will be expensed in the period incurred.

The Company has designated its cash as held for trading, which is measured at fair value. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

Royal Monashee Gold Corp.

NOTES TO THE FINANCIAL STATEMENTS

For the years ended September 30, 2010 and 2009

2. ACCOUNTING POLICIES – continued

Section 3862, *Financial Instruments – Disclosures*, requires entities to provide disclosures in their financial statements that enable users to evaluate (a) the significance of financial instruments for the entity's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the balance sheet date, and how the entity manage those risks. The principles in this section complement the principles for recognizing, measuring and presenting financial assets and financial liabilities in Section 3855, *Financial Instruments – Recognition and Measurement*, Section 3863, *Financial Instruments – Presentation*, and Section 3865, *Hedges*. Disclosure requirements pertaining to Section 3862 are contained in Note 6.

Section 3863, *Financial Instruments – Presentation*, enhances financial statement users' understanding of the significance of financial instruments to an entity's financial position, performance and cash flows. This section establishes standards for presentation of financial instruments and non-financial derivatives. It deals with the classification of financial instruments, from the perspective of the issuer, between liabilities and equity, the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities are offset.

Effective interest method

The Company uses the effective interest method to recognize interest income, which includes transaction costs or fees premiums, or discounts earned or incurred for financial instruments.

Stock-based compensation

Stock-based compensation is accounted for at fair value as determined by the Black-Scholes option pricing model using amounts that are believed to approximate the volatility of the trading price of the Company's stock, the expected lives of awards of stock-based compensation, the fair value of the Company's stock and the risk-free interest rate. The estimated fair value of awards of stock-based compensation are charged to expense over the period earned, with offsetting amounts recognized as contributed surplus.

Impaired loans and allowance for loan impairment

The Company recognizes a loan impairment when there is a deterioration in credit quality to the extent that the Company no longer has reasonable assurance of timely collection of the full amount of principal and interest. When a loan is deemed impaired, its carrying amount is reduced to its estimated realizable amount which is measured by discounting the expected future cash flows at the effective interest rate inherent to the loans. The amount initially recognized as an impaired loan, together with any subsequent change, is charged to the allowance as an adjustment.

Comprehensive income

Section 1530, *Comprehensive Income*, provides standards for the reporting and presentation of comprehensive income, which is defined as the change in equity from transactions and other events and circumstances from non-owner sources. Other comprehensive income refers to items recognized in comprehensive income but that are excluded from net income calculated in accordance with generally accepted accounting principles.

Capital disclosures

Section 1535, *Capital Disclosures*, establishes standards for the disclosing information about an entity's capital and how it is managed. Disclosure requirements pertaining to Section 1535 are contained in Note 10.

Royal Monashee Gold Corp.

NOTES TO THE FINANCIAL STATEMENTS

For the years ended September 30, 2010 and 2009

2. ACCOUNTING POLICIES – continued

Adoption of new standards

Goodwill and intangible assets

The Accounting Standards Board (“AcSB”) issued Section 3064, *Goodwill and Intangible Assets*, which replaces Section 3062, *Goodwill and Other Intangible Assets*, and Section 3450, *Research and Development Costs*. This new section establishes standards for the recognition, measurement, presentation and disclosure of goodwill subsequent to its initial recognition and intangible assets. This section applies to interim and annual financial statements relating to fiscal years beginning on or after October 1, 2008. The adoption of Section 3064 did not have a material impact on the Company’s financial position and results of operations.

Financial instruments

During 2009 the CICA amended Section 3862, *Financial Instruments – Disclosures*, to require disclosures about the inputs to fair value measurements, including their classification within a hierarchy that prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

- Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices that are observable for the assets or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

Effective October 1, 2009 the Company adopted the new recommendations. The additional disclosures as a result of the amended Section 3862 are contained in Note 6.

Future accounting policies

Business combinations, consolidated financial statements and non-controlling interests

The CICA issued three new accounting standards in January 2009: Section 1582, *Business Combinations*, Section 1601, *Consolidated Financial Statement*, and Section 1602, *Non-Controlling Interests*. These new standards will be effective for fiscal years beginning on or after January 1, 2011.

Section 1582 replaces Section 1581, *Business Combinations*, and establishes standards for the accounting for a business combination. It proves the Canadian equivalent to IFRS 3, *Business Combinations*. The section applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2011. Section 1601 and 1602 together replace Section 1600, *Consolidated Financial Statements*. Section 1601 establishes standards for the preparation of consolidated financial statements. Section 1601 applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Section 1602 establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination.

The Company does not expect the adoption of these accounting standards to have material impact on its consolidated financial statements.

3. PROMISSORY NOTE RECEIVABLE

In fiscal 2008, the Company loaned \$ 100,000 to a start-up restaurant in Vancouver. In fiscal 2009, the loan went into default. At that time, the Company recorded an impairment loss of \$ 34,477 and wrote-off the remaining carrying amount of the loan.

Royal Monashee Gold Corp.

NOTES TO THE FINANCIAL STATEMENTS

For the years ended September 30, 2010 and 2009

4. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

The Company received an amount of \$ 15,000 US on November 17, 2008, in relation to a non-brokered private placement of 180,000 common shares. The shares have yet to be issued.

5. SHARE CAPITAL

Authorized
100,000,000 common shares without par value

	<u>Shares</u>	<u>Amount</u>
Balance at September 30, 2009 and 2010	<u>5,973,700</u>	\$ <u>724,037</u>

6. FINANCIAL INSTRUMENTS

Financial instruments consist of cash and accounts payable and accrued liabilities.

Fair value

The Company's carrying value and fair value of cash under the fair value hierarchy is measured using level 1 inputs.

Credit risk

Cash is exposed to credit risk due to the potential for counterparties to default on their contractual obligations. The maximum potential loss on all financial instruments is equal to the carrying amount of those items. The Company holds its cash with financial institutions that are believed to be credit worthy.

7. SUPPLEMENTAL CASH FLOW INFORMATION

	<u>2010</u>	<u>2009</u>
Other supplemental cash flow information:		
Income taxes paid	\$ <u>—</u>	\$ <u>—</u>
Income taxes received	\$ <u>—</u>	\$ <u>—</u>
Interest paid	\$ <u>—</u>	\$ <u>—</u>
Interest received	\$ <u>9</u>	\$ <u>9,034</u>

8. INCOME TAXES

The provision for income taxes differs from the result which would have been obtained by applying the statutory income tax rate of 30% (2009 – 30%) to the Company's net loss before income taxes. The difference results from the following items:

	<u>2010</u>	<u>2009</u>
Expected income tax recovery	\$ (3,418)	\$ (9,600)
Addition to unrecognized income tax loss carryforwards	7,493	7,000
Impairment of promissory note receivable	—	10,300
Accretion income	—	(3,600)
Other	<u>(4,075)</u>	<u>(4,100)</u>
Provision for income taxes	\$ <u>—</u>	\$ <u>—</u>

Royal Monashee Gold Corp.
NOTES TO THE FINANCIAL STATEMENTS
For the years ended September 30, 2010 and 2009

8. **INCOME TAXES** - continued

The income tax effects of temporary differences that give rise to significant components of future income tax assets and liabilities are as follows:

	<u>2010</u>	<u>2009</u>
Future income tax assets		
Income tax loss carryforwards	\$ 58,000	\$ 56,000
Other tax pools	20,000	22,000
Difference between book value and tax cost of unproven mineral interest	5,000	5,000
Valuation allowance	<u>(83,000)</u>	<u>(83,000)</u>
Net future income tax liability	\$ <u> –</u>	\$ <u> –</u>

As at September 30, 2010, the Company has accumulated non-capital losses of approximately \$ 189,000 and cumulative resource and other tax pools of approximately \$ 100,000 carried forward for Canadian income tax purposes and is available to reduce taxable income of future years. The non-capital losses expire commencing in 2011 through 2030. The cumulative resource and other tax pools can be carried forward indefinitely.

9. **STOCK-BASED COMPENSATION**

The Company established a stock option plan on January 24, 2006 under which the Company granted stock options to its directors to purchase 125,000 common shares at an exercise price of \$ 0.30 per share, exercisable on or before January 24, 2011.

The following table summarizes information about the stock options outstanding and exercisable at September 30, 2010:

<u>Number outstanding and exercisable</u>	<u>Exercise price</u>	<u>Expiry date</u>
<u>125,000</u>	\$ <u>0.30</u>	January 24, 2011

10. **CAPITAL MANAGEMENT**

The Company's objective when managing capital, defined as equity, is to safeguard the entity's ability to continue as a going concern, so that it can acquire and explore mineral interests. As the Company presently has no revenue, the Company funds all administration and exploration programs from the sale of common shares, generally through private placements. If the Company is unsuccessful in raising sufficient capital, exploration programs are extended, delayed, or cancelled.
