Notes to the Condensed Interim Consolidated Financial Statements

For Three Months Ended March 31, 2022 and 2021

(Unaudited - expressed in Canadian Dollars)

1. NATURE OF OPERATIONS AND GOING CONCERN

ParcelPal Logistics Inc. (*formerly ParcelPal Technology Inc.*) (“the Company” or “ParcelPal”) is a Vancouver, British Columbia based company that specializes in last-mile delivery service and logistics solutions, providing businesses with a smart, reliable and affordable delivery service powered by the Company’s licensed technology platform. The Company operates in major Canadian cities including Vancouver, Calgary, and Toronto, and now in the western region of the United States. The Company was incorporated in Alberta on March 10, 1997. On June 22, 2006, the Company moved its incorporation jurisdiction to British Columbia. The Company’s shares are listed on the Canadian Securities Exchange (“CSE”) under the symbol “PKG”, on the OTCQB (over-the-counter) Market in the United States under the symbol PTNYF and on the Frankfurt Stock Exchange under the symbol “PTO”.

On September 15, 2021, the Company purchased 95% of the outstanding shares of Web to Door Trucking Corp. (“Trucking”), a United States delivery service company incorporated in Nevada. The acquisition of Trucking is being accounted for as a business combination under IFRS 3 as operations of Trucking meet the definition of a business (the “Trucking Acquisition”) (Note 3).

These condensed interim consolidated financial statements have been prepared under the assumption that the Company will continue as a going concern. The going concern basis of presentation assumes that the Company will be able to meet its obligations and continue its operations for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. Realization values may be substantially different from the carrying values as shown, and these consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classifications of assets and liabilities should the Company be unable to continue as a going concern.

The Company has incurred losses and negative operating cash flows since its inception. The Company will require further financing to meet its financial obligations and sustain its operations in the normal course of the business. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern. The Company’s ability to meet its long-term business strategy depends on its ability to obtain additional equity financing and to generate operational cash flow from delivery services revenue.

On March 11, 2020, the World Health Organization characterized the outbreak of a strain of the novel coronavirus (“COVID-19”) as a pandemic which has resulted in a series of public health and emergency measures that have been put in place to combat the spread of the virus. The duration and impact of COVID-19 is unknown at this time and it is not possible to reliably estimate the impact that the length and severity of these developments will have on the financial results and condition of the Company in future periods, including the possible impact on future financing opportunities.

2. BASIS OF PRESENTATION

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by International Accounting Standards Board (“IASB”) applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The condensed consolidated interim financial statements should be read in conjunction with the annual financial statements for the year ended December 31, 2021, which have been prepared in accordance with IFRS as issued by IASB.

The Company uses the same accounting policies and methods of computation as in financial statements for the year ended December 31, 2021, with the exception of the following:

ParcelPal Logistics Inc.

Notes to the Condensed Interim Consolidated Financial Statements

For the Three Months Ended March 31, 2022 and 2021

(Unaudited - expressed in Canadian Dollars)

Basis of Consolidation

The condensed interim financial statements include the financial statements of the Company and its 95% owned subsidiary Web-to-door Trucking (2021 – 95%)

Use of estimates and judgements

The Company's significant estimates and judgments are as per the audited financial statements ended December 31, 2021.

These condensed consolidated interim financial statements were approved by the board of directors for use on May 30, 2022.

3. TRUCKING ACQUISITION

On September 15, 2021, the Company acquired 95% of the issued and outstanding shares of Trucking for a purchase price of USD \$3,100,000, consisting of 60% cash and 40% payable in restricted shares of ParcelPal's common stock. The cash portion of the purchase price will be paid in three tranches, beginning on the closing date of the transaction. The 5% minority shareholding is not eligible for any share of the Company's profits or net loss, there is no allocation of value to non-controlling interest.

Concurrently with the acquisition, the Company completed a non-brokered private placement (the "Offering"), pursuant to which it issued an unsecured multi-tranche convertible note with a face value of up to US\$2,300,000 (the "Consideration") to an arm's length investor (the "Note"). Each of the first three funded tranches will carry a 5% Original Issue Discount (or "OID") (Note 11).

Each tranche to be funded as follows:

- USD \$700,000 on closing (paid)
- USD \$640,000 will be advanced 45 days from the closing date (paid)
- USD \$520,000 will be advanced 90 days from the closing date
- USD \$325,000 will be advanced upon mutual agreement by the Company and noteholder at 120 days from the closing date, together with the prorated 5% OID

The transaction was accounted for as a business combination, as the operations of Trucking meet the definition of a business. As the transaction was accounted for as a business combination, transaction costs were expensed.

The fair value of the consideration transferred has been determined on a preliminary basis. The consideration has been allocated to the assets acquired and liabilities assumed on a preliminary basis based on their estimated fair values at the date of acquisition. The Company has allocated goodwill to customer contracts on a preliminary basis but will require additional information to allocate the fair values to the net assets acquired. The determination of the fair value of the net assets acquired will be revised by the Company as additional information is received. The Company has estimated the allocation of the purchase price as follows:

Purchase price consideration	US \$
Consideration – cash	1,860,000
Consideration – shares	1,240,000
Fair value of consideration	3,100,000
Cash	117,321
Prepaid expenses	20,440
Loans payable	(52,042)

9. FINANCIAL INSTRUMENTS**Classification of financial instruments**

The Company's financial instruments consist of cash, accounts receivable, loans receivable, accounts payable and accrued liabilities and lease obligations. The Company classifies cash, accounts receivable and loans receivable as financial assets at amortized cost. Accounts payable and lease obligations are classified as financial liabilities at amortized cost.

The Company examines the various financial instruments and risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include foreign currency risk, interest rate risk, credit risk and liquidity risk. When material, these risks are reviewed and monitored by the Board of Directors.

There have been no changes in any risk management policies during the three months ended March 31, 2022.

Fair value

Financial instruments measured at fair value are classified into one of the three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The carrying value of the Company's financial assets and liabilities measured at amortized cost approximate their fair value due to their short term to maturity.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures.

The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk of financial loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's cash is held in large Canadian financial institutions and is not exposed to significant credit risk.

Interest risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to limited interest rate risk.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due. The Company's ability to continue as a going concern is dependent on management's ability to raise the required capital through future equity or debt issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the directors are actively involved in the review, planning, and approval of significant expenditures and commitments. In December 2020, the Company entered into an agreement pursuant to which it received access to a US \$5,000,000 equity line of credit for a period of three years. As at March 31, 2022 the Company has not accessed the equity line of credit.

Foreign exchange risk

The Company's functional currency is the Canadian Dollar and major transactions are transacted in Canadian Dollars and US Dollars. The Company maintains a US Dollar bank account in Canada to support the cash needs of its operations. Management believes that the foreign exchange risk related to currency conversion is minimal and therefore does not hedge its foreign exchange risk.

Capital Management

The Company defines capital that it manages as its shareholders' equity. When managing capital, the Company's objective is to ensure the entity continues as a going concern as well as to maintain optimal returns to shareholders and benefits for other stakeholders. The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the development of a social collaborative charting, news and communication platform for traders. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes to the Company's approach to capital management during the three months ended March 31, 2022

11. CONVERTIBLE PROMISSORY NOTE

During the year ended December 31, 2021 and 2020, the Company entered into multiple US dollar denominated convertible note agreements, with each convertible note containing a guaranteed interest rate between 5% and 10%, a 5% original issue discount on the principal of the convertible note, incentive common shares of the Company and the right to convert at a fixed price of US \$0.06 to US \$0.08 per share. As the convertible note and embedded conversion feature are denominated in US dollars and the Company has a Canadian dollar functional currency, they are within the scope of IAS 32 – *Financial Instruments: Presentation*, the value of the conversion feature is subject to changes in value based on the prevailing market price, resulting in a derivative liability. On initial recognition, the Company used the residual value method to allocate the principal amount of the convertible note between the derivative liability and host debt components. The derivative liability was valued first using the Black Scholes option pricing model and the residual was allocated to the host debt component. As the fair value of the debt, when discounted using the Company's discount rate of 11.31% was greater than the total consideration received, the incentive shares were allocated a value of \$nil.
