RECENT ACCOUNTING PRONOUNCEMENTS ISSUED AND NOT YET APPLIED

The following standard has been issued but is not yet effective.

- (a) IFRS 9, Financial Instruments (“IFRS 9”) was issued in final form in July 2014 by the IASB and will replace IAS 39, Financial Instruments – Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9. The new standard also requires a single impairment method used, replacing the multiple impairment methods in IAS 39. IFRS 9 also includes requirements relating to a new hedge accounting model, which represents a substantial overhaul of hedge accounting which will allow entities to better reflect their risk management activities in the financial statements. The most significant improvements are expected to be of particular interest to non-financial institutions. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Early application is permitted.

The Company is currently evaluating the impact of the above standard on its financial performance and financial statement disclosures but expects that such impact will not be material.
