

# ScreenPro Completes over 19,000 COVID-19 Tests in May

Toronto, Ontario--(Newsfile Corp. - June 23, 2021) - **ScreenPro Security Inc. (CSE: SCRN)** ("**ScreenPro**" or the "**Company**") is pleased to provide an update and testing numbers for the month of May on film and television industry testing.

The Company provided services to production companies in Toronto and Vancouver and completed over 19,000 tests in May.

The company continues to have success with the 1copy™ COVID-19 qPCR Multi Kit, ("**1drop**") supplied by Datametrex AI Limited (TSXV: DM). The manufacturer, 1drop Inc., has confirmed that the 1drop can identify the new variants of the coronavirus including the Delta variant that is spreading in Canada.

"With multiple mutant variants spreading rapidly around the World, ScreenPro believes that it will continue expanding the COVID-19 screening business. Productions will need to protect actors and crew and will need to be vigilant and test regularly to minimize the threat," said Andrew Ryu, CEO of the Company.

Though Canada is banking on herd immunity, it may not be achieved by the end of 2021 if vaccine hesitancy is high, if we experience disruptions in vaccine supply, or if variants may also reduce vaccine efficacy or enable reinfection and enable new variants to spread widely. Bending the curve in many areas of the country is delicate and with transmission still high in areas, unequal access to vaccines, and the many variants of concern threatening to undo progress to date.

## About ScreenPro

ScreenPro is a Screening and Medical Technology company. ScreenPro provides turnkey screening solutions with alerting software, GoStop. ScreenPro's unique access to multiple manufacturers of high quality test kits and its strategic partnership with Labs in Vancouver and Ontario allows ScreenPro to be a nationwide provider of a full-service testing solutions across Canada. In addition, ScreenPro has its own nursing professionals, and access to high quality PPEs to ensure that its clients are protected in all aspects of their testing needs. GoStop's passport was developed with a privacy preserving approach that will enable individuals to use the alerting software and downloadable app with authentication certificates. The alerts can be scheduled on an on-demand, daily, weekly, or monthly basis and can be used also for vaccine scheduling.
