

## *NEWS RELEASE*

**Langley, BC, Canada, December 15, 2010**, Curlew Lake Resources Inc. (the "Company") (TSX-V: CWQ) (Pink Sheets CWLXF) announces preparations are underway to drill another well on Company lands in the Fairydele-Bon Accord area of Alberta. Company petroleum and natural gas leases in this area present multiple horizon opportunities for oil and/or gas development, following encountering gas in the Ellerslie and Upper Manville at Curlew-Lake FBA 2-16-57-24. Seismic and geological mapping has yielded one seismic shot point location in LSD 9 of Section 14 in Twp. 57, Rge 24 W4M and the site has been surveyed and is being licensed as a New Pool Wildcat oil and/or gas well. There are a number of operators with pipelines in the area and Fairydele Bon Accord infrastructure will keep production and delivery cost modest. The area has seen a number of impressive discoveries in the Ellerslie and/or Basel Quart formations to the south and east of the proposed well. It is expected that drilling will commence in early January, 2011.

Proposed 3-D geophysical surveys, together with sonic logs from the 2-16 exploration hole, may greatly enhance the value of Curlew Lake's significant land package in this area. Confirmation of the Leduc reef at 2-16 provides our exploration team with the data to move updip in the geological column in pursuit of Leduc and Nisku oil and other potentially productive formations.

Additional information on Fairydele and many other Company projects can be found on the corporate website.

On behalf of the Board of Directors

"Robert B. Pincombe"

President
