### **Business Description**

The Company was incorporated under the Business Corporation Act of Alberta on August 31, 1998 and was continued to a British Columbian company on January 30, 2006. The Company changed its name from ONA Energy Inc. to Ona Power Corp. on July 16, 2009 and on April 09, 2012 changed it again to AAN Ventures Inc. The Company's shares are publicly traded on the Frankfurt Exchange and Canadian National Stock Exchange ("CNSX").

The Company is currently reviewing new opportunities. It is open to both domestic and international projects.

### **Overall Performance**

#### Private Placement

In January 2011, the Company closed a non-brokered private placement for the issuance of 2,666,666 units at \$0.15 per unit for gross proceeds of \$400,000. Each unit is comprised of one common share in the capital of the Company and one share purchase warrant. Each share purchase warrant allows the holder to purchase one common share of the Company for a period of 5 years. The Company allocated \$228,216 to common shares and \$171,784 to the value of the warrants. These warrants will expire on January 7, 2016. The Company did not pay finder's fee and will use the proceeds for general working capital.

#### Issuance of Stock Option

The Company has a stock option plan that allows it to grant options to its employees, officers, directors. On March 1, 2011, 241,667 stock options were granted to various consultants, directors, and officers at an exercise price of \$0.10 per share. These stock options are exercisable for five years and will expire on March 1, 2016. These options were fully vested upon issuance. The fair value of these options at the date of grant was estimated at \$0.15 per option (\$35,033 totaling) by using the Black-Scholes option pricing model with the following assumptions:

Risk-free interest rate	2.6 %
Dividend yield	0 %
Expected volatility	200 %
Expected life	5 years

### **Ability to continue as a Going Concern**

The Company incurred a net loss of \$13,245 for the three month period ended June 30 2012, has an accumulated deficit of \$ 29,140,611 and has had recurring losses since inception. The Company may not have sufficient funds to sustain its operations over the next twelve months. Management is considering all possible financing alternatives, including equity and debt financing to finance the future operations.

The ability to continue operating as a going concern is dependent on raising additional funding to develop successful businesses. While the Company has been successful in securing financings in the past, there is no assurance that it will be able to do so in the future. These circumstances lead to substantial doubt as to the ability of the Company to meet its obligations as they become due and, accordingly, as to the appropriateness of the use of accounting principles applicable to a going concern.

### **Credit Risk**

### **Liquidity Risk**

The Company believes that at the present time it will not face significant liquidity risk as it will be able to secure sufficient funding from equity financing.

### **Interest Risk**

AAN Ventures Inc. may become exposed to interest rate risk as a result of holding investments of varying maturities. The fair value of investments, as well as the investment income derived from the investment portfolio, will fluctuate with changes in prevailing interest rates. AAN will not use interest rate derivative financial instruments in its investment portfolio but will invest surplus capital in Canadian Schedule A bank instruments, until it is required.

### **Uncertainties**

Global economies, while showing fitful signs of recovery remain a long way from being healthy. Financial markets continue to deal with the fallout of a crisis in credit markets and are struggling to return to normal in most countries. Volatile financial market conditions are likely to continue through 2012 as credit and liquidity concerns persist. We anticipate that global government intervention will continue as the fear of removing support too early will outweigh the concerns of stoking inflation. This stimulus should improve financial market operations.
