

DigiMax Commences Trial Version of Crypto-Trading App

FOR IMMEDIATE RELEASE – December 17, 2020

TORONTO/ACCESSWIRE – DigiCrypts Blockchain Solutions Inc. o/a DIGIMAX GLOBAL SOLUTIONS (the "Company" or "DigiMax") (CSE:DIGI) is pleased to announce that its wholly owned subsidiary, DataNavee, has commenced operation of the free trial version of its AI Driven, Crypto Currency Trading App for select qualified Users. Additional qualified Users will be added each week. A qualified User has more than 12 months trading experience with either Bitcoin or Ethereum, has a trading account on a valid crypto exchange, and has agreed to share their trading data resulting from using the App with the Company.

The App has been designed to give Users predictive indications of price change directions of both Bitcoin and Ethereum on either an intra-day basis, or multiday swing-trade basis, as selected by the User. The indicators can draw from as many as 12 different inputs as selected by the User. Unlike conventional technical trading analysis tools, the DataNavee tool draws from multiple sets of data that includes technical trading data but adds both macro and micro economic indicators, international currency trading pairs, and up to the minute news flow.

Internal trials over the past year has resulted in superior returns to holding the crypto currency and provides predictions for buying, selling and shorting trades.

A completed subscription-based version of the App is anticipated to be made available to the general public on a subscription basis commencing in early 2021.
