(Unaudited)

# Management's Responsibility for Financial Reporting

The accompanying unaudited interim condensed consolidated financial statements of the Company have been prepared by management in accordance with International Financial Reporting Standards. These unaudited interim condensed consolidated financial statements contain estimates based on management's judgment. Management maintains an appropriate system of internal controls to provide reasonable assurance that transactions are authorized, assets safeguarded, and proper records maintained.

The Audit Committee of the Board of Directors reviews the results of the unaudited interim condensed consolidated financial statements prior to submitting the consolidated financial statements to the Board for approval.

Signed: "John McMahon"
Chief Executive Officer

Toronto, Ontario May 30, 2022

#### **NOTICE TO READER**

The accompanying unaudited interim condensed financial statements of the Company have been prepared by and are the responsibility of management. The unaudited interim condensed consolidated financial statements as at and for the three months ended March 31, 2022 have not been reviewed by the Company's auditors.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 1. Nature of Business

Prophecy DeFi Inc. (formerly Bucephalus Capital Corp.) ("PDFI" or the "Company") invests its funds for the purpose of generating returns from capital appreciation and income. It plans to accomplish these goals by bringing together technology start-ups in the Blockchain and Decentralized Finance sectors to fund innovation, elevate industry research, and create new business opportunities in a coherent ecosystem. The Company is a public company incorporated and domiciled in Ontario, Canada. The Company's registered office is located at 87 Scollard Street, Suite 100, Toronto, Ontario M5R 1G4. The Company's subordinate voting shares commenced trading on the Canadian Securities Exchange ("CSE") on March 14, 2016.

In early 2020, there was a global outbreak of COVID-19 (coronavirus), which had a significant impact on businesses through restrictions put in place by the Canadian federal, provincial, and municipal governments regarding travel, business operations, and isolations/quarantine orders. While the Company has not yet experienced any material impact on its ability to conduct operations, it is unknown the extent of the future impact the COVID-19 outbreak may have on the Company as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease and the duration of the outbreak, including the duration of travel restrictions, business closures or disruptions and quarantine/isolation measures that are currently, or may be put, in place by Canada and other countries to fight the virus.

#### 2. Basis of Presentation

#### Statement of Compliance

These unaudited interim condensed consolidated financial statements, including comparative periods have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB").

These unaudited interim condensed consolidated financial statements include those of Prophecy Defi Inc. and its wholly owned subsidy, Layer2 Blockchain Inc. ("Layer2"), from the date on which control is acquired by the Company. The financial statements for the consolidated entity are prepared for the same reporting period as the Company, using consistent accounting policies. All intercompany transactions and balances have been eliminated in the preparation of these consolidated financial statements.

The reporting currency used for the unaudited interim condensed consolidated financial statements is Canadian dollars. The functional currency used by the Company and its subsidiary is Canadian dollars.

These unaudited interim condensed consolidated financial statements were approved by the Company's Board of Directors on May 30, 2022.

These unaudited interim condensed consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair value.

#### 3. Summary of Significant Accounting Policies

These unaudited interim condensed consolidated financial statements have been prepared by management in accordance with IFRS. Outlined below are those policies considered particularly significant for the Company.

#### A. Use of Estimates

The preparation of these unaudited interim condensed consolidated financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the consolidated financial statements and the reported amount of revenues and expenses during the period. Financial statement items subject to significant management judgment include:

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 3. Summary of Significant Accounting Policies - continued

#### A. Use of Estimates - continued

- Credit losses Management exercises judgement to determine the expected credit losses on loans.
- Valuation of portfolio investments Where investments are not traded in an active market, management
  exercises judgement to determine the fair value of these assets. These assumptions include observation of
  recent private sales on the underlying securities (if available).
- The Black-Scholes option pricing model is used to determine the fair value of the share-based payments and utilizes subjective assumptions such as expected price volatility and expected life of the option. Discrepancies in these input assumptions can significantly affect the fair value estimate.
- Business combinations assumptions and estimates are made in determining the fair value of assets and liabilities, including the identification and valuation of separately identifiable intangible assets acquired as part of an acquisition and the allocation of the purchase price. These estimates may be further based on management's best assessment of the related inputs used in valuation models, such as future cash flows and cost of capital.
- Office premise and other Management determines the carrying value of its office premise based on policies
  that incorporate assumptions, estimates and judgements relative to the useful lives and residual values of
  assets.
- Impairment of non-financial assets Impairment exists where the carrying value of an asset, or CGU exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value. The fair value less costs of disposal calculated is based on available data from binding sales transactions in an arm's length transaction of similar assets or other observable market prices less incremental costs of disposal. The value in use calculation is based on discounted cash flow models. The estimated future cash flows are derived from management assumptions, estimates, budgets and past performance and do not include activities that the Company is not yet committed to or significant investments that will enhance the asset's performance of the CGU being tested. The recoverable amount is sensitive to the cost of capital used for the discounted cash flow model as well as the expected future cash flows.
- Revenue recognition The Company recognizes revenue from the provision of liquidity. As consideration
  for these services, the Company receives digital currency. Management has exercised significant judgment
  in determining the completion stage for this revenue stream and examined various factors surrounding the
  substance of the Company's operations, and determined the stage of completion being the receipt of
  proceeds to the Company's control.
- Going concern The Company regularly reviews and makes an assessment of its ability to continue as a going concern. This assessment relies on significant judgements and assumptions, taking into account all known future information.
- Digital currencies valuation Digital currencies consist of cryptocurrency denominated assets and are included in current assets. The digital currency market is still a new market and is highly volatile, historical prices are not necessarily indicative of future value and a significant change in the market prices for digital currencies would have a significant impact on the Company's earnings and financial position.

While management believes that the estimates and assumptions are reasonable, actual results may differ materially from those estimates.

#### B. Financial instruments

Financial assets and financial liabilities, including derivatives, are recognized on the statements of financial position when the Company becomes a party to the financial instrument or derivative contract.

#### Classification

The Company classifies its financial assets and financial liabilities in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss ("FVTPL");
- (2) those to be measured subsequently at fair value through other comprehensive income ("FVTOCI");
- (3) those to be measured subsequently at amortized cost.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 3. Summary of Significant Accounting Policies - continued

#### B. Financial instruments - continued

The classification of financial assets depends on the business model for managing the financial assets and the contractual terms of the cash flows. Financial liabilities are classified as those to be measured at amortized cost unless they are designated as those to be measured subsequently at FVTPL (irrevocable election at the time of recognition). For assets and liabilities measured at fair value, gains and losses are recorded in the statements of operations and comprehensive loss.

The Company reclassifies financial assets when and only when its business model for managing those assets changes. Financial liabilities are not reclassified.

The Company's classification and measurements of financial assets and liabilities are summarized below:

	IFRS 9	
	Classification	
Cash	Amortized cost	
Accrued interest receivable	Amortized cost	
Accounts receivables	Amortized cost	
Bridge loans	Amortized cost	
Portfolio investments	FVTPL	
Accounts payable and accrued liabilities	Amortized cost	
Convertible debentures	Amortized cost	

#### Financial assets at amortized cost

This category includes financial assets that are held within a business model with the objective to hold the financial assets in order to collect contractual cash flows that meet the solely payment of principal and interest ("SPPI") criterion. Financial assets classified in this category are measured at amortized cost using the effective interest method.

### Financial assets at fair value through profit or loss

This category includes derivative instruments as well as equity instruments which the Company has not irrevocably elected, at initial recognition or transition, to classify at FVTOCI. This category also includes debt instruments whose cash flow characteristics fail the SPPI criterion or are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell. Financial assets in this category are recorded at fair value with changes recognized in the statements of operations and comprehensive loss.

#### Measurement

All financial instruments are required to be measured at fair value on initial recognition, plus, in the case of a financial asset or financial liability not at FVTPL, transaction costs that are directly attributable to the acquisition or issuance of the financial asset or financial liability. Transaction costs of financial assets and financial liabilities carried at FVTPL are expensed in profit or loss. Financial assets and financial liabilities with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Financial assets that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortized cost at the end of the subsequent accounting periods. All other financial assets including equity investments are measured at their fair values at the end of subsequent accounting periods, with any changes taken through the statements of operations and comprehensive loss.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited)

(In Canadian Dollars)

### 3. Summary of Significant Accounting Policies - continued

### B. Financial instruments - continued

#### Fair value hierarchy

Financial assets measured at fair value or where their fair value is disclosed in the notes must be classified into one of the three hierarchy levels set forth below for disclosure purposes. Each level is based on the transparency of the inputs used to measure the fair value of assets and liabilities.

- Level 1: Inputs are unadjusted guoted prices of identical instruments in active markets;
- Level 2: Valuation models which utilize predominately observable market inputs; and
- Level 3: Valuation models which utilize predominately non-observable market inputs.

The classification of a financial asset in the hierarchy is based upon the lowest level of input that is significant to the measurement of fair value.

The Company's fair value financial instruments are classified as follows:

Financial instrument Classification
Portfolio investments Levels 1 and 3

At the end of each reporting period, management estimates the fair value of investments based on the criteria below and reflects such valuations in the restated financial statements.

- i. Securities including shares, options, and warrants which are traded in an active market, such as on a recognized securities exchange and for which no sales restrictions apply, are presented at fair value based on quoted closing trade prices at the end of the reporting period or the closing trade price on the last day the security traded if there were no trades at the end of the reporting period. These are included in Level 1 of the fair value hierarchy.
- ii. For options, warrants, and conversion features which are not traded on a recognized securities exchange, no market value is readily available. When there are sufficient and reliable observable market inputs, a valuation technique is used. Valuation models such as the Black-Scholes valuation model ("Black-Scholes") are used when there are sufficient and reliable observable market inputs. These market inputs include risk-free interest rate, exercise price, market price at the date of valuation, expected dividend yield, expected life of the instrument and expected volatility of the underlying security based on historical volatility. These are included in Level 2 of the fair value hierarchy.
- iii. Convertible debts and loans issued by investee companies are generally valued at the price in which the instrument was issued. The Company regularly considers whether any indications of deterioration in the value of the underlying business exist, which suggest that the debt instrument will not be fully recovered. The fair value of convertible debentures is measured using valuation techniques such as Black-Scholes model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment and assumptions provided by management is required in establishing fair values. Judgments include consideration of inputs such as credit risk, discount rates, volatility, probability of certain triggering events, and share price of private company borrowers. Changes in assumptions relating to these factors could affect the reported fair value of the financials instruments. These are included in Level 3 of the fair value hierarchy.

# iv. Private company investments

All privately-held investments (including options, warrants, and conversion features) are initially recorded at the transaction price, being the fair value at the time of acquisition. At the end of each reporting period, the fair value of an investment may (depending upon the circumstances) be adjusted using one or more of the valuation indicators described below.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 3. Summary of Significant Accounting Policies - continued

#### B. Financial instruments - continued

The determination of fair value of the Company's privately-held investments at other than initial cost, is subject to certain limitations. Financial information for private companies in which the Company has investments, may not be available and, even if available, that information may be limited and/or unreliable.

Use of the valuation approach described below may involve uncertainties and determinations based on management's judgment and any value estimated from these techniques may not be realized or realizable.

Company-specific information is considered when determining whether the fair value of a privately-held investment should be adjusted upward or downward at the end of each reporting period. In addition to company-specific information, the Company will also consider trends in general market conditions and the share performance of comparable publicly-traded companies when valuing privately-held investments.

The fair value of a privately-held investment may be adjusted if:

- i. There has been a significant subsequent equity financing provided by outside investors at a valuation different than the current value of the investee company, in which case the fair value of the investment is set to the value at which that financing took place:
- ii. There have been significant corporate, political, or operating events affecting the investee company that, in management's opinion, have a material impact on the investee company's prospects and, therefore, its fair value. In these circumstances, the adjustment to the fair value of the investment will be based on management's judgment and any value estimated may not be realized or realizable;
- iii. The investee company is placed into receivership or bankruptcy;
- iv. Based on financial information received from the investee company, it is apparent to the Company that the investee company is unlikely to be able to continue as a going concern;
- v. Release by the investee company of positive/negative operational results; and
- vi. Important positive/negative management changes by the investee company that the Company's management believes will have a very positive/negative impact on the investee company's ability to achieve its objectives and build value for shareholders.

Adjustments to the fair value of a privately-held investment will be based upon management's judgment and any value estimated may not be realized or realizable. The resulting values for non-publicly traded investments may differ from values that would be realized if a ready market existed.

In addition, the amounts at which the Company's privately-held investments could be currently disposed of may differ from the carrying value assigned.

#### **Convertible Debentures**

Convertible debentures issued by the Company are comprised of convertible unsecured debentures that can be converted to common shares at the option of the holder. The host liability component of a compounded financial instrument is recognized initially at the fair market value of a similar liability that does not have an equity conversion option. Any directly attributable transaction costs are allocated entirely to the host liability component.

#### Expected credit losses on financial assets

Determining an allowance for expected credit losses ("ECLs") for all debt financial assets not held at fair value through profit or loss ("FVTPL") requires management to make assumptions about the historical patterns for the probability of default, the timing of collection, and the amount of incurred credit losses, which are adjusted based on management's judgment about whether economic conditions and credit terms are such that actual losses may be higher or lower than what the historical patterns suggest.

Upon disposal of an investment, previously recognized unrealized gains or losses are reversed to recognize the full realized gain or loss in the period of disposition.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 3. Summary of Significant Accounting Policies - continued

# C. Provisions

The Company recognizes provisions when a legal or constructive obligation exists as a result of past events, when it is probable that there will be an outflow of economic benefits from the entity, and a reliable estimate of the amount of the obligation can be made. When a provision is expected to settle beyond the immediate term, the provision is measured at the present value of future cash flows, discounted at prevailing market interest rates. With the passage of time, additional expenses are recorded as the provision accretes.

#### D. <u>Business Combinations</u>

All business combinations are accounted for by applying the acquisition method. Upon acquisition the assets (including intangible assets), liabilities and contingent liabilities acquired are measured at their fair value. The Company recognizes identifiable intangible assets as part of business combinations at fair value at the date of acquisition. The determination of these fair values is based upon management's judgement and includes assumptions on the timing and amount of future incremental cash flows generated by the assets acquired and the selection of an appropriate cost of capital. Acquisition and integration costs are recognized in profit or loss as incurred.

Goodwill represents the excess of the identifiable cost of an acquisition over the fair value of the Company's share of the net assets acquired at the date of acquisition. If the identifiable cost of acquisition is less than the fair value of the Company's share of the net assets acquired (i.e. a discount on acquisition) the difference is credited to the statement of income (loss) and comprehensive statement of income (loss) in the period of acquisition. At the acquisition date, goodwill acquired is recognized as an asset and allocated to each cash generating unit ("CGU") expected to benefit from the business combination's synergies and to the lowest level at which management monitors goodwill.

#### E. Revenue Recognition

The Company derives its income from digital currency received for providing liquidity to decentralized cryptocurrency exchanges. Revenue is recognized by the Company when payment, in the form of digital currency, is received for liquidity services rendered. Revenue is measured based on the fair value of the coins received. The fair value is determined using the daily weighted close price for the digital currency on a cryptocurrency data aggregator.

Realized gains (losses) on disposal of digital currencies are reflected in the statements of operations and comprehensive loss on the transaction date. The Company has the control of the crypto assets prior to the sale and records revenue at the point in time when the sale is confirmed on the respective blockchain.

Realized gains (losses) on disposals of investments and unrealized gains (losses) on securities classified as FVTPL are reflected in the statements of operations and comprehensive loss on the transaction date and are calculated on an average cost basis. For all financial instruments measured at amortized cost and interest-bearing financial assets, interest income or expenses are recorded using the effective interest rate, which is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

#### F. Foreign Currency Translation

Monetary assets and liabilities denominated in currencies other than Canadian dollars are translated into Canadian dollars at the rate of exchange in effect at the end of the reporting period. Non-monetary assets and liabilities are translated at the historical rates. Revenues and expenses are translated at the transaction exchange rate. Foreign currency gains and losses resulting from translation are reflected in profit or loss.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 3. Summary of Significant Accounting Policies - continued

#### G. Income Taxes

Income tax comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity or other comprehensive income, in which case the income is also recognized directly in equity or other comprehensive income.

Current income tax is the expected tax payable on the taxable income for the period, using tax rates enacted at the end of the reporting period, and any adjustments to tax payable in respect of previous years. Current tax assets and current tax liabilities are only offset if a legally enforceable right exists to offset the amounts and the Company intends to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred income tax is recognized in respect of all qualifying temporary differences arising between the tax basis of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the end of the reporting period and are expensed to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognized to the extent that it is probable that the assets can be recovered. Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Deferred tax assets are recognized to the extent future recovery is probable. At each reporting period end, deferred tax assets are reduced to the extent that it is no longer probable that sufficient taxable earnings will be available to allow all or part of the asset to be recovered.

#### H. Cash

Cash consists of cash balances and highly liquid investments with original maturities of three months or less.

# I. <u>Digital currencies</u>

Digital currencies meet the definition of intangible assets as they are identifiable non-monetary assets without physical substance. They are initially recorded at the fair value on the acquisition date and the revaluation method is used to measure the digital assets subsequently. Under the revaluation method, increases in fair value are recorded in other comprehensive income, while decreases are recorded in profit or loss.

The Company revalue its digital assets at the end of its reporting periods. There is no recycling of gains from other comprehensive income to profit or loss. However, to the extent that an increase in fair value reverses a previous decrease in fair value that has been recorded in profit or loss, that increase is recorded in profit or loss. Decreases in fair value that reverse gains previously recorded in other comprehensive income are recorded in other comprehensive income.

The Company holds a variety of digital currencies which are measured at fair value using the quoted prices on a cryptocurrency data aggregator. The digital currencies are valued based on the daily weighted closing price obtained at the time the digital currencies are acquired and at each reporting date. Management considers the fair value to be a level two input under the fair value hierarchy as the prices from this source represents an average of quoted prices on multiple digital currency exchanges.

The Company's determination to classify its holdings as current assets is based on management's assessment that the digital currencies held can be considered to be a commodity that may be readily sold because liquid markets are available.

#### J. Office premise and other

Furniture, office equipment and leasehold improvements are stated at historical cost, less any accumulated amortization and accumulated impairment in value. Historical cost includes all costs directly attributable to the acquisition.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 3. Summary of Significant Accounting Policies - continued

#### J. Office premise and other - continued

Amortization is recognized using the declining balance method at a rate of 20% to amortize the cost of furniture and office equipment to their residual values over their estimated useful lives in profit or loss.

Amortization methods, useful lives and residual values are reviewed at the reporting period date. Such a review takes into consideration the nature of the assets, their intended use and technological changes.

Gains or losses on the sale of furniture and office equipment are determined by comparing the proceeds with the carrying amount and are recognized in the profit or loss in the period of disposition.

Leasehold improvements and right-of-use assets are amortized on a straight-line basis over their lease term and are accounted for at cost less accumulated amortization and reviewed at each balance sheet date to determine whether there is an indication of impairment.

#### K. Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the identifiable assets and liabilities acquired determined at the date of acquisition. Goodwill is carried at cost less any accumulated impairment losses.

Goodwill is reviewed for impairment annually by assessing the recoverable amount of each CGU to which it relates, where applicable. The recoverable amount is the higher of fair value less costs of disposal, and value in use. When the recoverable amount of the CGU is less than the carrying amount, an impairment loss is recognized. Any impairment is recognized immediately in profit or loss and comprehensive profit or loss.

#### L. Share-based payments

The costs of equity-settled transactions with employees are measured by reference to the fair value at the date on which they are granted. In situations where equity instruments are issued to non-employees and some of all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment.

The costs of equity-settled transactions are recognized, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award ("the vesting date"). The cumulative expense recognized for equity-settled transaction at each reporting date until the vesting date reflects the Company's best estimate of the number of equity instruments that will ultimately vest. The profit or loss charge or credit for period represents the movement in cumulative expense recognized as at the beginning and end of that period and the corresponding amount is represented in contributed surplus.

No expense is recognized for awards that do no ultimately vest, except for awards where vesting is conditional upon a market condition, which are treated as vesting irrespective of whether or not the market condition is satisfied provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled aware are modified, the minimum expense recognized is the expense as if the terms had not been modified. An additional expense is recognized for any modification which increases the total fair value of the share-based payment arrangement or is otherwise beneficial to the employee as a measure at the date of modification.

The dilutive effect of outstanding options is reflected as additional dilution in the computation of earnings or loss per share.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 3. Summary of Significant Accounting Policies - continued

#### M. Loss per share

Basic loss per share is calculated using the weighted average number of multiple, subordinate and common shares outstanding during the period.

Diluted loss per share is calculated by dividing net loss available to shareholders for the period by the diluted weighted average number of multiple, subordinate and common shares outstanding during the period. The diluted weighted average number of shares includes the potential dilution from shares issuable through stock options, if dilutive. This assumes that the proceeds from any shares issued on the exercise of stock options are used by the Company to repurchase and cancel shares at the average market price of the Company's share price for the period. As such, where the strike price of stock options exceeds the average market price of the Company's shares for the reporting period, the inclusion of these shares under the treasury stock method would be anti-dilutive, so these shares are excluded from the calculation of the weighted average number of diluted shares outstanding.

### 4. Significant New Accounting Standards

The following new standards, amendments and interpretations have been issued but are not effective for the three months ended March 31, 2022 and, accordingly, have not been applied in preparing these consolidated financial statements.

A. Improving Accounting Policy Disclosures and Clarifying Distinction between Accounting Policies and Accounting Estimates (Amendments to IAS 1 and IAS 8)

In February 2021, the IASB issued narrow-scope amendments to IAS 1 Presentation of Financial Statements, IFRS Practice Statement 2 Making Materiality Judgments and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors.

The amendments to IAS 1 require companies to disclose their material accounting policy information rather than their significant accounting policies. The amendments to IFRS Practice Statement 2 provide guidance on how to apply the concept of materiality to accounting policy disclosures.

The amendments to IAS 8 clarify how companies should distinguish changes in accounting policies from change in accounting estimates. That distinction is important because changes in accounting estimates are applied prospectively only to future transactions and other future events, but changes in accounting policies are generally also applied retrospectively to past transactions and other past events.

The amendments are effective for annual reporting periods beginning on or after January 1, 2023. Earlier application is permitted. The Company is assessing the potential impact of these amendments.

# B. IAS 12: Amendment to IAS 12, Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction

In May 2021, the IASB issued targeted amendments to IAS 12 – Income Taxes to specify how companies should account for deferred tax on transactions such as leases and decommissioning obligations. In specified circumstances, companies are exempt from recognizing deferred tax when they recognize assets or liabilities for the first time. Previously, there had been some uncertainty about whether the exemption applied to transactions such as leases and decommissioning obligations transactions for which companies recognize both an asset and a liability. The amendments clarify that the exemption does not apply and that companies are required to recognize deferred tax on such transactions. The aim of the amendments is to reduce diversity in the reporting of deferred tax on leases and decommissioning obligations. The amendments are effective for annual reporting periods beginning on or after January 1, 2023, with early application permitted. The Company is assessing the potential impact of the amendment. The Company applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after January 1, 2021. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 4. Significant New Accounting Standards - continued

# C. <u>Interest Rate Benchmark Reform – Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)</u>

The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). The amendments include the following practical expedients:

A practical expedient to require contractual changes, or changes to cash flows that are directly required by the reform, to be treated as changes to a floating interest rate, equivalent to a movement in a market rate of interest

Permit changes required by IBOR reform to be made to hedge designations and hedge documentation without the hedging relationship being discontinued

Provide temporary relief to entities from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component

These amendments had no impact on the consolidated financial statements of the Company. The Company intends to use the practical expedients in future periods if they become applicable.

#### D. Covid-19-Related Rent Concessions beyond June 30, 2021 Amendments to IFRS 16

On May 28, 2020, the IASB issued Covid-19-Related Rent Concessions - amendment to IFRS 16 Leases. The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the Covid-19 pandemic. As a practical expedient, a lessee may elect not to assess whether a Covid-19 related rent concession from a lessor is a lease modification. A lessee that makes this election accounts for any change in lease payments resulting from the Covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change were not a lease modification.

The amendment was intended to apply until June 30, 2021, but as the impact of the Covid-19 pandemic is continuing, on March 31, 2021, the IASB extended the period of application of the practical expedient to June 30, 2022. The amendment applies to annual reporting periods beginning on or after April 1, 2021.

However, the Company has not received Covid-19-related rent concessions but plans to apply the practical expedient if it becomes applicable within allowed period of application.

#### 5. Business Combination

The Company acquired 60% of the shares of Layer2 Blockchain Inc. ("Layer2"), on July 8, 2021, as consideration the Company issued 25,000,000 common shares of the Company to the shareholders of Layer2. The Company subsequently acquired the remaining 40% of the shares of Layer2 on September 13, 2021, as consideration the Company issued a further 25,000,000 common shares of the Company to the shareholders of Layer2 for a total purchase price of \$21,670,375. Layer2 is a technology company focused on the rapidly emerging Ethereum Layer Two decentralized finance ecosystem. The Company incurred acquisition-related costs of \$43,149, representing legal and other fees, which were recognized through profit or loss in the prior period.

Goodwill calculated in this acquisition represents the expected synergies from combining the operations of Layer2 with the Company, revenue growth, future market development and expertise in the sector. These benefits are not recognized separately from goodwill as their fair value cannot be measured reliably individually. Goodwill from this acquisition is deductible for tax purposes, and was established as follows:

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited)

(In Canadian Dollars)

# 5. Business Combination - continued

Balance, December 31, 2021	\$ 19,704,882
Balance, March 31, 2022	\$ 19,704,882

#### 12. Lease Liability

The Company leases an office premise at 87 Scollard Street, Suite 100, Toronto, Ontario M5R 1G4. The lease expires in 2026, with a five-year option to extend.

The lease liability is measured at the present value of the lease payments that are not paid at the balance sheet date. Lease payments are apportioned between interest expense and a reduction of the lease liability using the Company's incremental borrowing rate to achieve a constant rate of interest on the remaining balances of the liability.

The carrying value of the Company's lease liability is as follows:

Balance, January 1, 2021	\$ -
Addition of lease liability	636,753
Interest expense	15,757
Cash payments	(35,057)
Balance, December 31, 2021	\$ 617,453
Interest expense	15,270
Cash payments	(35,057)
Balance, March 31, 2022	597,666
Current portion of lease liability	 (113,330)
Non-current portion of lease liability	\$ 484,336

As at March 31, 2022, the carrying rate of the Company's lease liability was \$597,666 (December 31, 2021 - \$617,453) and the carrying rate of the right-of-use asset was \$583,583 (December 31, 2021 - \$616,616).

#### 13. Convertible Debentures

On December 23, 2021, the Company completed the offering of \$5,854,000 aggregate principal amount of 10% unsecured convertible debentures of the Company. Each convertible debenture matures 36 months following the closing of the offering and bears interest at a rate of 10% per annum, payable quarterly in cash. For the three months ended March 31, 2022, \$146,350 of interest has been paid.

The convertible debentures are convertible into common shares of the Company at the option of the holder at any time prior to the maturity date or on the business day immediately preceding a date fixed for redemption of the convertible debentures, at a conversion price equal to \$0.60 per common share. The Company has the right to force conversion of the convertible debentures at the conversion price if the daily volume weighted average trading price of the common shares on the Canadian Securities Exchange is greater than \$1.20 for 10 consecutive trading days.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 13. Convertible Debentures - continued

Each convertible debenture includes 1,667 common share purchase warrants of the Company. Each warrant is exercisable into one common share at a price of \$0.90 per common share for a period of 36 months from the closing of the offering.

The host liability component of the convertible debentures recognized on the interim condensed consolidated financial statements of financial position was calculated as follows:

Principal amount outstanding	\$ 5,854,000
Less: Transaction costs (net of amortization)	 (684,249)
Liability component on initial recognition	5,169,751
Debenture discount (net of amortization)	(291,354)
	\$ 4,878,397

#### 14. Share Capital

Balance March 31, 2022		-	-	-	132,147,212	28,327,353	

# c) Stock Options

The Company has a stock option plan (the "Plan") under which the Company may grant options to directors, officers, employees and consultants. The maximum number of common shares reserve for issue under the plan at any point in time may not exceed 10% of the number of shares issued and outstanding. As at March 31, 2022, the Company had 5,489,721 (December 31, 2021 – 5,489,721) options available for issuance under the plan.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 14. Share Capital - continued

The continuity of outstanding stock options for the three months ended March 31, 2022 is as follows:

	Number of stock options	Weighted average exercise price per share \$	
Balance, December 31, 2021	7,725,000	0.43	
Exercised	-	-	
Granted	-	-	
Balance, March 31, 2022	7,725,000	0.43	

During the three months ended March 31, 2022, the Company recognized \$141,786 of stock-based compensation related to stock options granted in the prior year.

#### 15. Income (loss) per Share

Basic income (loss) per share has been calculated using the weighted average number of SVS, MVS and CS outstanding during the period. Diluted income (loss) per share has been calculated using the weighted average number of SVS, MVS and CS outstanding during the period as the effect of stock options and warrants issued and outstanding are considered antidilutive.

#### 16. Fair Value and Financial Risk Management

The primary goals of the Company's risk management programs are to ensure that the outcomes of activities involving elements of risk are consistent with the Company's objectives and risk tolerance, and to maintain an appropriate risk/reward balance while protecting the Company's financial operations from events that have the potential to materially impair its financial strength. Balancing risk and reward is achieved through aligning risk tolerance with the Company's business strategy, diversifying risk, pricing appropriately for risk, mitigating risk through preventative controls and transferring risk to third parties.

#### Capital Management

The Company considers the items included in shareholders' equity as capital. The Company's capital management objectives are to maintain a strong and efficient capital structure to provide liquidity to support continued asset growth. A strong capital position also provides flexibility in considering accretive growth opportunities. It is the intention of the Company in the long term to pay out a portion of its future annual earnings to shareholders in the form of dividends. There has been no change in the capital management approach from the prior period.

#### Risk Management

The success of the Company is dependent upon its ability to assess and manage all forms of risk that affect its operations. The Company is exposed to many factors that could adversely affect its business, financial conditions or operating results. Developing policies and procedures to identify risk and the implementation of appropriate risk management policies and procedures is the responsibility of senior management and the Board of Directors. The Board directly, or through its committees, reviews and approves these policies and procedures, and monitors their compliance with them through ongoing reporting requirements. A description of the Company's most prominent risks follows.

#### Credit Risk

Concentration of credit risk may arise from exposures to a single debtor or to a group of debtors having similar characteristics such that their ability to meet their current obligations is expected to be affected similarly by changes in economic or other conditions. The Company is exposed to credit risk on its cash, accrued interest receivable, and bridge loans. The Company's maximum exposure to credit risk is \$2,762,843 (December 31, 2021 - \$6,760,047).

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

### 16. Fair Value and Financial Risk Management - continued

#### Market Risk

The Company is exposed to certain market risk that the value of, or future cash flows from, the Company's financial assets will significantly fluctuate due to changes in market prices. The value of the financial assets can be affected by changes in interest rates, foreign exchange rates, and equity and commodity prices. The Company is required to mark to market its fair value through profit or loss investments at the end of each reporting period. This process could result in significant write-downs of the Company's portfolio investment over one or more reporting periods, particularly during periods of overall market instability, which would have a significant unfavorable effect on the Company's financial position.

#### Digital Currencies Risk

Digital currencies are measured using level two fair values, determined by taking the rates from a cryptocurrency data aggregator.

Digital currency prices are affected by various forces including global supply and demand, interest rates, exchange rates, inflation or deflation and the global political and economic conditions. The profitability of the Company is directly related to the current and future market price of coins; in addition, the Company may not be able to liquidate its inventory of digital currency at its desired price if required. A decline in the market prices for coins could negatively impact the Company's future operations. The Company has not hedged the conversion of any of its coin sales.

Digital currencies have a limited history, and the fair value historically has been very volatile. Historical performances of digital currencies are not indicative of their future price performance.

# Liquidity Risk

Liquidity risk is the risk that the Company will not have sufficient cash to meet its obligations as they become due. As at March 31, 2022, the Company has cash of \$2,651,924 (December 31, 2021 - \$6,652,988) to meet current financial liabilities of \$380,192 (December 31, 2021 - \$533,383).

#### Currency Risk

The Company is exposed to certain currency risks that the value of certain financial instruments will fluctuate due to changes in foreign exchange rates. The Company does not hedge against this foreign currency risk.

### 17. Transactions with Related Parties

a) Compensation of key management personnel

The remuneration expense of directors and other members of key management personnel during the three months ended March 31, 202 and 2021 as follows:

		2022	2021	
Consulting fees and salaries	\$	71.400	\$	161,500
Stock based compensation	<u> </u>	- 1,100	Ψ	71,080
	\$	71,400	\$	232,580

b) As at March 31, 2022, included in accounts payable is \$93,008 (December 31, 2021 - \$68,905) due to directors and officers of the Company.

Notes to the Interim Condensed Consolidated Financial Statements For the three months ended March 31, 2022 (Unaudited) (In Canadian Dollars)

#### 18. Commitments and Contingencies

#### Management Contingency

The Company is party to certain management contracts. These contracts require that additional payments of up to approximately \$1,080,000 be made upon the occurrence of certain events such as a change of control or termination. As a triggering event has not taken place, the contingent payments have not been reflected in these consolidated financial statements.

#### Legal Contingency

The Company is, from time to time, involved in various claims and legal proceedings. The Company cannot reasonably predict the likelihood or outcome of these activities. The Company does not believe that adverse decisions in any ending or threatened proceedings related to any matter, or any amount which may be required to be paid by reasons thereof, will have a material effect on the financial condition or future results of operations.

On February 12, 2022, a claim was commenced against Layer2 Blockchain Inc. and several other defendants for equitable relief or, in the alternative, damages in an amount to be determined. The Company believes this action is without merit and it intends to defend the proceedings. At this stage, it is not possible to predict the outcome of the proceedings.

#### 19. Subsequent Events

On April 6, 2022, the Company provided an update regarding the exposure it's wholly owned subsidiary, Layer2 Blockchain Inc. had to the Ronin Network and its recent security breach. Layer2 has been providing liquidity to the decentralized exchange (DEX), Katana, which runs on the Ronin blockchain. Layer2 had approximately \$1 million of tokens deployed into a liquidity pool on the Katana DEX prior to the security breach. Currently, Layer2 has access to the tokens it has deployed into a Katana liquidity pool. The Ronin Network bridge will open once it has undergone a security upgrade and several audits.
