

Windfall Geotek kick's off data analysis at Kirkland Lake Mining camp to Generate New Gold Targets using CARDS Artificial Intelligence

NOT FOR DISSEMINATION IN THE UNITED STATES OR FOR DISTRIBUTION TO U.S. NEWSWIRE SERVICES AND DOES NOT CONSTITUTE AN OFFER OF THE SECURITIES DESCRIBED HEREIN

Brossard, Quebec / The Newswire / July 16, 2020 – Windfall Geotek (TSX-V: WIN) is a leader in the use of Artificial Intelligence (AI) in the mining sector for digital exploration and is pleased to announce that it has started to analyze the data rich Kirkland Lake Mining camp using its CARDS Artificial Intelligence (AI) technology on the entire property and expect initial results within 6 to 8 weeks.

Michel Fontaine President & CEO of Windfall Geotek states: *“We are confident we can replicate the big success we had in Red Lake given the abundance and the quality of public data available in the Kirkland Lake Mining camp. Our team will use our CARDS AI tool to deep dive into Assays, Drill Holes and Mag Survey data to identify high probability, high similarity targets based on the digital signature of known deposit in the area. We will then be in a great position to conclude a strategic alliance with a serious group in the near future and continue to draw attention to Windfall Geotek”.*

Highlights of CARDS AI analysis at the Kirkland Lake area

- The Kirkland Lake Mining Camp in Northeastern Ontario is hosted by the Kirkland Lake-Larder Lake gold belt, located in the Southern Abitibi greenstone belt of Archean Superior province.
- Building a gold pattern signature in one of the best mining camp in Ontario.
- The project covers a total area of 932.45 sq-km.
- The project hosts many known gold deposits: Kirkland Lake, Kerr-Addison-Chesterville, Macassa, Young-Davidson, McBean, Upper Canada, Omega, Eastmaque, Teck-Huges.
- Geophysical data (Mag+DEM) at 15m resolution from the Kirkland Lake-Larder Lake area survey (GDS 1053, Ontario Geological Survey)
- Up to 4 771 gold training points originated from Ontario Drill Hole Database (Ontario Geological Survey)

Dinesh Kandanchatha Chairman of Windfall Geotek states: *“We are very pleased with the way that our CARDS AI is performing to date. With this internal project we will continue to demonstrate the power of our new business model, while building assets and value for our shareholders”.*

Windfall Geotek also would like to welcome Nathan Tribble onto the Board of directors today and wish Mr. Jacques Letendre all the best on his future endeavors. Mr. Tribble, P.Geo. (ON) has over 14 years of professional experience in exploration and mining, with a particular focus on gold and base metal exploration and project evaluation. His current position is Vice President Exploration at Gatling Exploration Inc and past experience includes Senior Principal Geologist for Sprott Mining, Senior Geologist for Bonterra Resources, Jerritt Canyon Gold, Kerr Mines, Northern Gold, Lake Shore Gold and Vale Inco. Mr. Tribble sits on multiple boards affiliated within the mining industry, is registered as a Professional Geoscientist in Ontario and holds a Bachelor of Science degree in Geology from Laurentian University.

About Windfall Geotek – Powered by Artificial Intelligence (AI) since 2005

Windfall Geotek is a service company using Artificial Intelligence (AI) with an extensive portfolio of shares of its clients. Windfall Geotek can count on a multidisciplinary team that includes professionals in geophysics, geology, Artificial Intelligence, and mathematics. The Company objectives is to develop a new royalty stream by significantly enhancing and participating in the exploration success rate of Mining and to continue the Land Mine detection application as a high priority.
