BLUE THUNDER TO HIRE WINDFALL GEOTEK FOR MULTIPLE JOBS FOR THE MUUS PROPERTY LOCATED NEAR CHIBOUGAMAU, QUEBEC

DOES NOT CONSTITUTE AN OFFER OF THE SECURITIES DESCRIBED HEREIN

Brossard, Quebec / The Newswire / March 29, 2022 – Windfall Geotek **(TSX-V: WIN, OTCQB: WINKF, FSE: L7C2)** a leader in the use of Artificial Intelligence (AI) with advanced knowledge-extraction techniques since 2005 in the mining sector is pleased to announce it has provided a preliminary version of it's AI Mineral Exploration Targeting services for Blue Thunder Mining Inc **(TSXV:BLUE, OTCQB:BLTMF)** on it's Muus Project in Chibougamau, Quebec.

The Muus Project is located in the eastern part of the Caopatina-Desmaraisville segment of the Abitibi Greenstone Belt, south of the Chibougamau and Chapais mining camps, more specifically between the Kapunapotagen Fault to the north and Guercheville Fault to the south, and the Grenville Front to the east. Gold Mineralization is mostly associated with smokey quartz veins (grey to black) and sulphide minerals in the wall rocks (pyrite, pyrrhotite, chalcopyrite and sphalerite).

Windfall Geotek provided multiple preliminary AI target Models on the Muss property over a total project area of **210** km^2. Multiple high priority Gold exploration targets were identified within 3 primary areas highlighted for follow up exploration work resulting from the AI targeting work.

Simran Kamboj, President of Windfall Geotek commented: *"We're very excited to work alongside the Blue Thunder exploration geology team to help advance the Muus project. With the land package so diverse and large, we're confident that our AI targets will play a key role in their team's exploration process while reducing their exploration time and budget."*

Jean François Métail, President of Blue Thunder Mining Inc commented: *We are highly encouraged that several targets highlighted by Windfall-Geotek coincide with the areas recently identified in our exploration program. This reinforces our confidence in the next round of exploration, in addition to providing new prospective areas. Given the extensive land package we have, it is of primary importance for us to concentrate on the areas of highest potential.*

About Windfall Geotek – Powered by Artificial Intelligence (AI) since 2005

Windfall is an Artificial Intelligence company that has been in business for over 15 years developing its proprietary CARDS analysis (AI) and data mining techniques. Windfall Geotek can count on a multidisciplinary team that includes professionals in geophysics, geology, Artificial Intelligence, and mathematics. It combines available public and private datasets including geophysical, drill hole and surface data. The algorithms designed and employed by Windfall are calculated to highlight areas of interest that have the potential to be geologically similar to other gold deposits and mineralization. The Company's objective is to develop a new royalty stream by significantly enhancing and participating in the exploration success rate of mining and to continue the Land Mine detection application as a high priority. Windfall has played a part in numerous past discoveries utilizing its methodology as described at: https://windfallgeotek.com/.
