

OPUS ONE SELECTS WINDFALL GEOTEK AI SYSTEM ON IT'S CASA BERARDI DOUAY CAMERON GOLD PROPERTIES NEAR MATAGAMI, QC

DOES NOT CONSTITUTE AN OFFER OF THE SECURITIES DESCRIBED HEREIN

Brossard, Quebec / The Newswire / April 6th, 2022 – Windfall Geotek (TSX-V: WIN, OTCQB: WINKF, FSE: L7C2) a leader in the use of Artificial Intelligence (AI) with advanced knowledge-extraction techniques since 2005 in the mining sector is pleased to announce that Windfall will use it's AI technology on the Opus One Vezza North, Vezza Extension and Noyell projects owned by Opus One Gold Corp (TSX-V: OOR). Windfall Geotek's team will conduct an AI target assessment using multiple AI target models (Figure 1) utilizing a large database of public & private data.

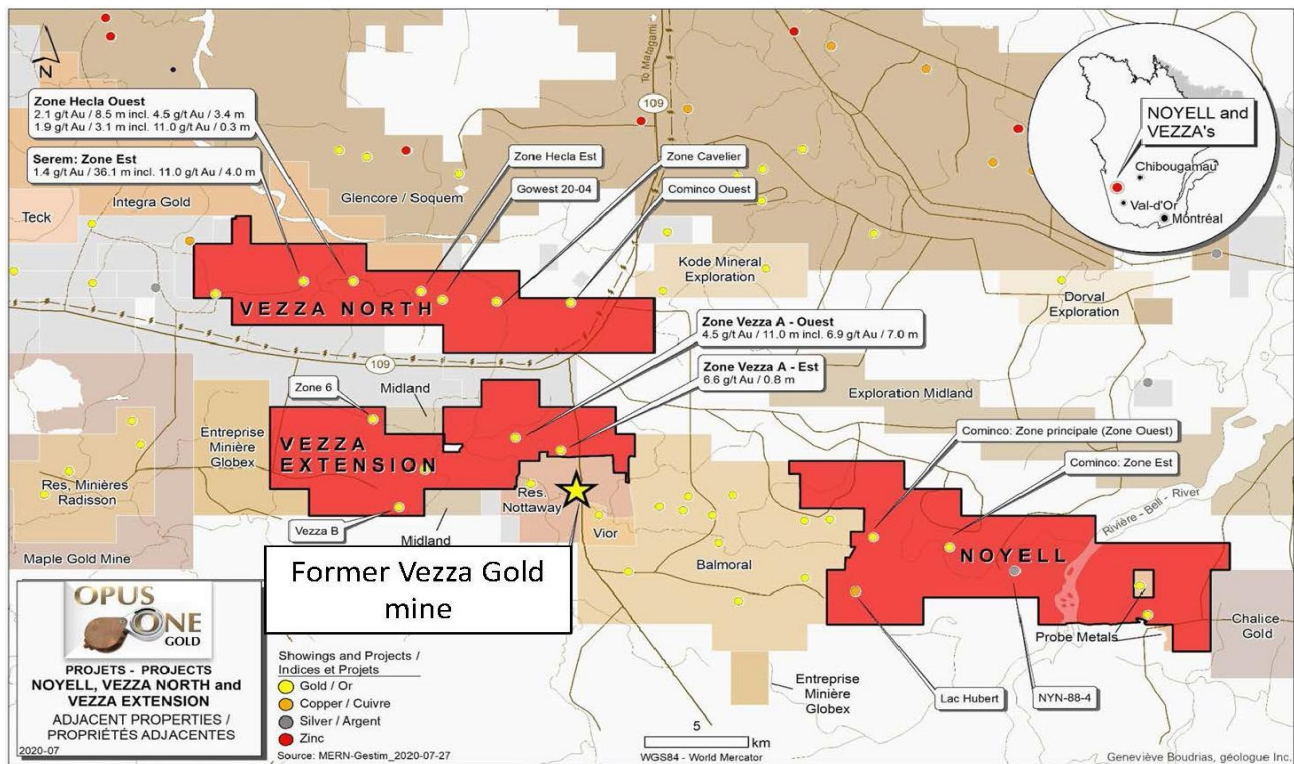

Figure 1: Shows the Opus One Gold Corp projects along with different gold showings on those claims over the years

Dinesh Kandanchatha, Chairman of Windfall Geotek commented: “We’re incredibly excited to work alongside Opus One on their journey to a discovery. Mr.Morin’s [Opus One CEO] truly understands the value our technology brings to the table in exploration and has a plan ready for execution . We aim to

provide his team with an unbiased view of his properties using data, starting with the known Noyell Zone 1 and the neighbouring Vezza mine.”

Louis Morin, CEO of Opus One commented: *“I have followed the evolution of the Windfall AI System since 2007. The latest results from their work seem to confirm that the targets generated by Windfall AI technology can be very accurate with 5-50 meters overburden. Our first objective is to test whether our known gold targets like Noyell Zone 1 and neighbor Vezza mine will overlap existing targets generated by the AI System. Subsequently, we will work on targets generated by AI technology in areas with less historical work done in our Casa-Berardi-Douay-Cameron projects portfolio. It is of great interest for us as those properties are located close to infrastructures, manpower and a mining friendly community.”*

About Windfall Geotek – Powered by Artificial Intelligence (AI) since 2005

Windfall is an Artificial Intelligence company that has been in business for over 15 years developing its proprietary CARDS analysis (AI) and data mining techniques. Windfall Geotek can count on a multidisciplinary team that includes professionals in geophysics, geology, Artificial Intelligence, and mathematics. It combines available public and private datasets including geophysical, drill hole and surface data. The algorithms designed and employed by Windfall are calculated to highlight areas of interest that have the potential to be geologically similar to other gold deposits and mineralization. The Company's objective is to develop a new royalty stream by significantly enhancing and participating in the exploration success rate of mining and to continue the Land Mine detection application as a high priority. Windfall has played a part in numerous past discoveries utilizing its methodology as described at: <https://windfallgeotek.com/>.
