*Dinesh Kandanchatta, Chairman of Windfall added, “We are excited to work with Patrick and the Nine Mile Metals Team on this project. Technologies such as ChatGPT are expanding the art of the possible with AI. Visionaries like Patrick are leading the expansion of AI adoption in the exploration sector. This multi year program represents what is possible when AI driven technology companies and exploration companies work together.”*

*Patrick J. Cruickshank, MBA, CEO & Director states, "This acquisition of West Nine Mile Brook, is a valuable addition to our Nine Mile Brook VMS Portfolio. The Nine Mile Mineralized Synform continues through our new property and has never been tested. We have identified (3) high priority targets within the folded trend and as you can see, numerous VMS occurrences have been discovered on this trend and nodes. We are committed to continuing to enlarge our geophysical footprint in the BMC and add quality value for our shareholders through growth and acquisition strategies. Our work with Windfall Geotek's and its proprietary Artificial Intelligence analysis will be applied to our entire project portfolio (Nine Mile Brook, California Lake And our Canoe Landing Lake (E&W). Working with EarthEX Geophysical Solutions Inc., Windfall and our entire Technical Team is focused on increasing shareholder value and driving our exploration program to success. This analysis compliments and carries all our programs to the leading edge advanced stages in our future programs here at Nine Mile Metals."*

### **About Windfall Geotek – Powered by Artificial Intelligence (AI) since 2005**

Windfall is an Artificial Intelligence company that has been in business for over 15 years developing its proprietary CARDS analysis (AI) and data mining techniques. Windfall Geotek can count on a multidisciplinary team that includes professionals in geophysics, geology, Artificial Intelligence, and mathematics. It combines available public and private datasets including geophysical, drill hole and surface data. The algorithms designed and employed by Windfall are calculated to highlight areas of interest that have the potential to be geologically similar to other gold deposits and mineralization. The Company's objective is to develop a new royalty stream by significantly enhancing and participating in the exploration success rate of mining and to continue the Land Mine detection application as a high priority. Windfall has played a part in numerous past discoveries utilizing its methodology as described at: <https://windfallgeotek.com/>.
