

Taku Commences Exploration in the Yukon

Vancouver, BC, May 24, 2011 - Taku Gold Corp. (the “Company”) (TSXV: TAK) is pleased to announce that its 2011 exploration season is well underway in the Dawson area of Yukon. A thirty person camp has been constructed to accommodate the exploration staff. The camp is located at the centre of Taku’s various properties such that all claim blocks lie within a 35 kilometer radius of the camp. The camp is easily accessible by road and will be supplied from Dawson City. Currently there are seventeen people on site and exploration work in progress involves deep auger-type soil sampling. Taku intends to collect up to 30,000 soil samples in 2011. It is expected that this work will be followed up by trenching and drilling later in the season.

“We will minimize fixed wing and helicopter hours and thereby save a considerable amount of money by having our camp at a road accessible location near the centre of Taku’s property portfolio,” commented Zak Dingsdale, President and CEO. Mark Fekete, P.Geo., is the designated qualified person as defined in Section 1.2 in and for the purposes of National Instrument 43-101 responsible for the review of the technical content contained in this release.

On Behalf of the Board,
Taku Gold Corp.

Zachery Dingsdale,
CEO and President
