Notes to Condensed Interim Financial Statements

June 30, 2013

(Expressed in Canadian dollars)

1. NATURE OF BUSINESS AND GOING CONCERN

Nature of business

Renforth Resources Inc. (the "Company" or "Renforth"), was incorporated in Canada under the Business Corporations Act (Ontario) and carries on business in one segment, being the acquisition, exploration and development of mineral properties in Canada. The Company's registered and head office is located at 65 Front Street East, Suite 304, Toronto, Ontario M5E 1B5.

These financial statements were approved by the board on August 1, 2013.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of mineral properties and deferred exploration expenditures and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. The amounts shown as exploration and evaluation assets do not necessarily represent present or future values. Changes in future conditions could require material write-downs to the carrying values of the Company's assets.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, First Nations claims, unregistered prior agreements, unregistered claims, and non-compliance with regulatory and environmental requirements. The Company may also be subject to increases in taxes and royalties, renegotiation of contracts and political uncertainties.

Going concern assumption

These financial statements are prepared in accordance with International Financial Reporting Standards with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations in the foreseeable future.

The recoverability of the costs incurred to date on exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, maintaining title and beneficial interest in the properties, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties and deferred exploration expenditures. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities that would be necessary if the Company were unable to obtain adequate financing. Changes in future conditions could require material write-downs to the carrying value of the exploration and evaluation assets. Such adjustments could be material.

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE

a) Statement of compliance

These condensed interim financial statements have been prepared in accordance and compliance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The interim condensed financial statements do not include all the information and disclosures required in the Company's annual financial statements and should be read in conjunction with the Company's annual financial statements for the year ended December 31, 2012.

b) Basis of presentation

The condensed interim financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These condensed interim financial statements have been prepared on a historical cost basis except for certain financial instruments that have been measured at fair value. In addition these condensed interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

These condensed interim financial statements, including comparatives, have been prepared on the basis of IFRS standards that are published at the time of preparation and that are effective or available for the Company's reporting date.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies applied in the preparation of the interim consolidated financial statements are consistent with those followed in the preparation of the Company's December 31, 2012 annual consolidated financial statements, except for the adoption of new standards and interpretations as of January 1, 2013.

The following IFRS standards became effective for the Company on January 1, 2013.

IFRS 7 — Financial Instruments

IFRS 7 — Financial Instruments Disclosures ("IFRS 7") was amended by the IASB in December 2011 to amend the disclosure requirements in IFRS 7 to require information about all recognised financial instruments that are offset in accordance with paragraph 42 of IAS 32 Financial Instruments: Presentation. The amendments also require disclosure of information about recognized financial instruments subject to enforceable master netting arrangements and similar agreements even if they are not set off under IAS 32. The adoption of the amendment to IFRS 7 had no impact on the financial statements.

IFRS 10 - Consolidated Financial Statements

IFRS 10, "Consolidated Financial Statements" (IFRS 10) was issued by the IASB on May 12, 2011 and will replace portions of IAS 27 Consolidated and Separate Financial Statements and interpretation SIC-12Consolidated - Special Purpose Entities. IFRS 10 incorporates a single model for consolidating all entities that are controlled and revises the definition of control to be "An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the current ability to affect those returns through its power over the investee". Along with control, the new standard also focuses on the concept of power, both of which will include a use of judgment and continuous reassessment as facts and circumstances change. IFRS 10 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted. The adoption of IFRS 10 had no impact on the financial statements.

(Expressed in Canadian dollars)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

IFRS 11 – Joint Arrangements

IFRS 11, Joint Arrangements (IFRS 11) was issued by the IASB on May 12, 2011 and will replace IAS31, Interest in Joint Ventures. The new standard will apply to the accounting for interest in joint arrangements where there is joint control. Joint arrangements will be separated into joint ventures and joint operations. The structure of the joint arrangement will no longer be the most significant factor on classifying a joint arrangement as either a joint operation or a joint venture. Proportionate consolidations will be removed and replaced with equity accounting. IFRS 11 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted. The adoption of IFRS 11 had no impact on the financial statements.

IFRS 12 - Disclosure of Interest in Other Entities

IFRS 12, Disclosure of Interest in Other Entities was issued by the IASB on May 12, 2011. The new standard includes disclosure requirements about subsidiaries, joint ventures and associates, as well as unconsolidated structured entities and replaces existing disclosure requirements. IFRS 12 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted. The adoption of IFRS 12 had no impact on the financial statements.

IFRS 13 – Fair Value Measurement

IFRS 13, Fair Value Measurement was issued by the IASB on May 12, 2011. The new standard converges IFRS and US GAAP on how to measure fair value and the related fair value disclosures. The new standard creates a single source of guidance for fair value measurements, where fair value is required or permitted under IFRS, by not changing how fair value is used but how it is measured. The focus will be on an exit price. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted. The adoption of IFRS 13 had no impact on the financial statements.

IAS 1 – Presentation of Financial Statements

IAS 1 – Presentation of Financial Statements ("IAS 1") was amended by the IASB in June 2011. As a result of the amendment, items in other comprehensive income will be required to be presented in two categories: items that will be reclassified into profit or loss and those that will not be reclassified. The flexibility to present a statement of comprehensive income as one statement or two separate statements of profit and loss and other comprehensive income remains unchanged. The adoption of IAS 1 had no impact on the financial statements.

IAS 28 - Investments in Associates and Joint Ventures

IAS 28 - Investments in Associates and Joint Ventures ("IAS 28") was issued by the IASB in May 2011 and supersedes IAS 28 Investments in Associates and prescribes the accounting for investments in associates and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. IAS 28 defines significant influence as the power to participate in the financial and operating policy decisions of the investee but is not control or joint control of those policies. IAS 28 also provides guidance on how the equity method of accounting is to be applied and also prescribes how investments in associates and joint ventures should be tested for impairment. The adoption of IAS 28 had no impact on the financial statements.

4. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The capital of the Company consists of share capital, warrants, contributed surplus and options. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

Notes to Condensed Interim Financial Statements

June 30, 2013

(Expressed in Canadian dollars)

4. CAPITAL MANAGEMENT (continued)

The properties in which the Company currently has an interest are in the exploration and evaluation stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the six months ended June 30, 2013. The Company is not subject to externally imposed capital requirements.

New Alger Gold Project – Quebec

On November 1, 2009, Renforth entered into an agreement (the "agreement") with Cadillac Ventures Inc. ("Cadillac") whereby Renforth shall have the right to acquire from Cadillac a 51% interest in the New Alger gold property in Québec (the "Property"). Renforth may acquire a 51% interest in the Property through (a) the payment of \$250,000 in cash over a period of 3 years to Cadillac, (b) the issuance of 2,500,000 (500,000 common shares post share consolidation) common shares over a period of 2 years to Cadillac and (c) upon spending a minimum of \$2,500,000 in exploration on the Property over a period of 3 years. Upon completion of its obligations, the parties shall be contributing as to the property – 51% Renforth and 49% Cadillac.

As per the original agreement, Renforth shall pay to Cadillac the following amounts on the following dates:

	Cash	Shares

7. EXPLORATION AND EVALUATION ASSETS - continued

New Alger Gold Project (continued)

On January 28, 2013, Renforth entered into an agreement (the "**Purchase Agreement**") with Cadillac to acquire a 100% interest in Cadillac's New Alger Property, located in Cadillac Township, Québec. The Purchase Agreement supersedes previous agreements, as amended, and as described in Note 7.

The Purchase Agreement provides for the payment to Cadillac of the following: (i) \$20,000 cash and 2,000,000 common shares of Renforth at the time of signing the Agreement, (ii) \$210,000 cash by June 15, 2013 (currently finalizing terms on an extension of the payment), and (iii) \$250,000 cash by November 15, 2013. Upon satisfaction of the foregoing conditions, Renforth will acquire a 100% interest in the property, subject to an existing 1% net smelter return royalty and Cadillac will retain an additional 1% net smelter return royalty.

The Purchase Agreement terminates the previous agreement between the parties under which Renforth had an option to acquire a 51% joint venture interest in the New Alger Property.

Red Lake Gold Project

On July 26, 2012, the Company entered into an option agreement with Rubicon Minerals Corporation (the "optionor"), to acquire a 100% undivided interest in certain unpatented mining claims situated in the Townships of Shabumeni Lake, Little Shabumeni Lake, Casummit Lake and Satterly Lake in the District of Red Lake, Ontario.

To exercise the option, Renforth is required to: (i) issue 250,000 common shares of Renforth to the optionor over three years (of which 100,000 shares have been issued and valued at \$4,000), and (ii) pay \$98,000 to the optionor over four years (of which an initial payment of \$20,000 has been paid).

If Renforth acquires and begins commercial production on the Property, the optionor retains a production royalty equal to 1.5% of the net smelter returns, subject to Renforth's right to buy-back half of the royalty (0.75%) for \$750,000.

Mink Lake Gold Project

On February 28, 2012, the Company acquired an option to acquire the Mink Lake Gold Project, located approximately 110 kms east-northeast from the Town of Red Lake in the Birch-Uchi Greenstone Belt. The Project is comprised of 9 unpatented mining claims totaling 123 units (the "Property").

Renforth acquired the option on the Mink Lake Gold Project from Accolade Resources Corporation ("Accolade") through the assumption of Accolade's rights and obligations under a Purchase Option Agreement (the "Option Agreement") between Accolade and an arm's length exploration and development company (the "Optionor"). Renforth now has the right to earn 100% ownership in the Property, subject to a 2% Net Smelter Return Royalty in favour of the Optionor (half of which can be purchased back for a payment of one million dollars to the Optionor), by making the following payments to the Optionor:

- 1) \$15,000 by September 30, 2012 (paid);
- 2) \$20,000 by September 30, 2013; and
- 3) \$25,000 by September 30, 2014.

This is a total of \$60,000 in payments, which can be accelerated at the election of Renforth.

In addition to this Renforth has staked certain units in the area which join the Mink Lake Property to the optioned ground, forming one large land block.

7. EXPLORATION AND EVALUATION ASSETS (continued)

Attawapiskat – James Bay Lowlands

On August 26, 2003, the Company purchased from Greenstone Exploration Company Ltd. ("Greenstone") and Michael Peplinski, their 10-30% beneficial interest in 12 claims comprising of certain claims in Northern Ontario (the "Renforth Claims"). The purchase closed in escrow on August 26, 2003. The purchase price of \$325,000 payable to Greenstone, consisted of \$50,000 in cash and the balance in common shares of the Company at market prices no later than one year subsequent to the anniversary of the signed agreement. On May 31, 2011, the Company and Greenstone settled the remaining \$275,000 (plus 3% interest accrued from the original due date) by the issuance of 6,915,530 common shares (1,383,106 common shares post consolidation) of the Company. Greenstone retained a 1.5% net smelter return royalty ("NSR").

On May 7, 2007, the Company entered into an Option Interest Agreement (the "Agreement") with 1231674 Ontario Limited ("123") to purchase their 100% interest in four mining claims located in the Attawapiskat district of the James Bay Lowlands in Northern Ontario. Under the terms of the Agreement, the Company purchased a 100% interest in the property for \$250,000, consideration consisting of 500,000 common shares of the Company (100,000 common shares post consolidation) at a price of \$0.50 per share (\$2.50 per share post consolidation). 123 retained a NSR of 2% subject to the right of the Company to purchase one half of the NSR, at any time up to commercial production, for \$1,000,000. During the year ended December 31, 2011, these claims were written down by \$91,784 to their estimated net realizable value. In 2012, the Company sold the remaining three claims for net proceeds of \$387,000.

On January 22, 2009, the Company finalized the acquisition of 18 claims (consisting of 288 units) located in the James Bay Lowlands, Ontario. Under the terms of the agreement, the Company purchased a 100% interest in these claims in exchange for \$150,000 and 3,200,000 common shares (640,000 common shares post consolidation) of the Company valued at \$64,000. The 3,200,000 common shares (640,000 common shares post consolidation) were issued on February 16, 2010. These claims expired during 2011 and as such all acquisition and exploration expenditures on the property totalling \$252,246 were written off during 2011.

As at December 31, 2012, the remaining carrying value of the property was written off, as the Company has no current plans for exploration.

Kyle Kimberlite Properties

On July 20, 2006, the Company entered into an Option Agreement with Cliffs Chromite Far North Inc. (formerly Spider Resources Inc.) ("Cliffs") and KWG Resources Inc. ("KWG") to earn a 55% interest in five diamondiferous Kyle Kimberlite properties, consisting of eight claims which are comprised of 128 units (the "Kyle Properties"), located in the James Bay Lowlands area of Northern Ontario.

During 2010, Renforth analyzed the expenses incurred on the property and on October 18, 2010, together with Cliffs and KWG, concluded that Renforth had completed its 55% earn-in on the Kyle Series of diamondiferous kimberlites in the James Bay Lowlands region of Northern Ontario. As part of the option agreement, KWG and Cliffs collectively earned a 45% interest in certain massive sulphide targets held by Renforth in the same region. Renforth, Cliffs and KWG were working towards formalizing their relationship in the form of a joint venture agreement. On December 7, 2011, Renforth issued the 2,000,000 commons shares (400,000 common shares post consolidation) that were issuable under the amended letter (note 9(b)(iii)).

As at December 31, 2012, the carrying value of the property was written off, as the Company has no current plans for exploration.

11. FINANCIAL RISK FACTORS

The Company's risk exposures and the impact on the Company's financial instruments are summarized below. There have been no significant changes in the risks, objectives, policies and procedures during the six months ended June 30, 2013.

Credit risk

The Company's credit risk is primarily attributable to short-term investments included in cash and cash equivalents. The Company has no significant concentration of credit risk arising from operations. Short-term investments consist of bankers acceptances, which have been invested with reputable financial institutions, from which management believes the risk of loss to be remote. Sales tax receivable consists of goods and services tax due from the Federal Government of Canada. Management believes that the credit risk concentration with respect to these items is remote.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at June 30, 2013, the Company had a cash and cash equivalent balance of \$81,973 (December 31, 2012 – \$540,172) to settle current financial liabilities of \$98,276 (December 31, 2012 - \$166,350). (See subsequent event note 15).

Market risk

(a) Interest rate risk

The Company has cash balances and no long term debt. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

(b) Foreign currency risk

The Company's functional currency is the Canadian dollar and all major purchases are transacted in Canadian dollars. Management believes the foreign exchange risk is negligible and therefore does not hedge its foreign exchange risk.

(c) Price risk

The Company is exposed to price risk with respect to commodity prices. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

Sensitivity analysis

The Company has designated its cash and cash equivalents and sales tax receivable as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities, classified as other financial liabilities, are measured at amortized cost.

As at June 30, 2013 the carrying and fair value amounts of the Company's financial instruments are approximately the same.

The Company's financial instruments that are carried at fair value, consisting of cash equivalents have been classified as Level 1 within the fair value hierarchy.

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve month period.

Cash and cash equivalents include liquid investments which are at variable rates. Sensitivity to a plus or minus 1% change in rates would affect net loss by \$819 annualized based on the June 30, 2013 cash and cash equivalents balance.

The Company does not hold balances in foreign currencies to give rise to exposure to foreign exchange risk.

Notes to Condensed Interim Financial Statements

June 30, 2013

(Expressed in Canadian dollars)

Price risk is remote since the Company is not a producing entity.

12. COMMITMENTS AND OPTIONS

Environmental Contingencies

The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

- (a) See *note* 7 for additional commitments and options on evaluation and exploration assets.
- (b) The Company renounced \$175,000 of qualifying exploration expenditures to the shareholders in 2012. Under the "look back" provision governing flow-through shares this amount must be spent by the end of 2013. As at June 30, 2013, the full amount has been spent.
