Notes to Financial Statements

September 30, 2014

(Expressed in Canadian dollars)

1. NATURE OF BUSINESS AND GOING CONCERN

Nature of business

Renforth Resources Inc. (the "Company" or "Renforth"), was incorporated in Canada under the Business Corporations Act (Ontario) and carries on business in one segment, being the acquisition, exploration and development of mineral properties in Canada. The Company's registered and head office is located at 65 Front Street East, Suite 304, Toronto, Ontario M5E 1B5.

These financial statements were approved by the board on November 26, 2014.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of exploration and evaluation assets and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. The amounts shown as exploration and evaluation assets do not necessarily represent present or future values. Changes in future conditions could require material write-downs to the carrying values of the Company's assets.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, First Nations claims, unregistered prior agreements, unregistered claims, and non-compliance with regulatory and environmental requirements. The Company may also be subject to increases in taxes and royalties, renegotiation of contracts and political uncertainties.

Going concern assumption

These financial statements are prepared in accordance with International Financial Reporting Standards with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations in the foreseeable future.

The recoverability of the costs incurred to date on exploration and evaluation assets is dependent upon the existence of economically recoverable reserves, maintaining title and beneficial interest in the properties, the ability of the Company to obtain the necessary financing to complete the exploration and development of its properties and upon future profitable production or proceeds from the disposition of the properties and deferred exploration expenditures. The Company will periodically have to raise funds to continue operations and, although it has been successful in doing so in the past, there is no assurance it will be able to do so in the future.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities that would be necessary if the Company were unable to obtain adequate financing. Changes in future conditions could require material write-downs to the carrying value of the exploration and evaluation assets. Such adjustments could be material. Management is aware, in making its assessment of material uncertainties related to events or conditions that cast significant doubt upon the entity's ability to continue as a going concern. The Company has incurred net loss of \$93,828 for the nine months ended September 30, 2014 (2013 - \$523,876) and has an accumulated deficit of \$11,638,348 (December 31, 2013 - \$11,544,520) and a working capital deficiency of \$175,478 (December 31, 2013 - 237,783).

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE

Statement of compliance

These condensed interim financial statements have been prepared in accordance and compliance with International Financial Reporting Standards ("IFRS") applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. The interim condensed financial statements do not include all the information and disclosures required in the Company's annual financial statements and should be read in conjunction with the Company's annual financial statements for the year ended December 31, 2013.

Basis of presentation

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

These financial statements have been prepared on a historical cost basis except for certain financial instruments that have been measured at fair value. In addition these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

These financial statements, including comparatives, have been prepared on the basis of IFRS standards that are published at the time of preparation and that are effective or available for the Company's reporting date.

Functional currency

The presentation currency of the Company and the functional currency of the Company is the Canadian dollar.

Critical judgments and estimation uncertainties

The preparation of financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions about future events that affect the amounts reported in the financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may differ from those estimates and these differences could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

- Assets' carrying values and impairment charges

In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

- Capitalization of exploration and evaluation costs

Management has determined that exploration and evaluation costs incurred during the year have future economic benefits and are economically recoverable. In making this judgement, management has assessed various sources of information including but not limited to the geologic and metallurgic information, history of conversion of mineral deposits to proven and probable mineral reserves, scoping and feasibility studies, proximity of operating facilities, operating management expertise and existing permits. See Note 7 for details of capitalized exploration and evaluation costs.

RENFORTH RESOURCES INC.

Notes to Financial Statements

(Expressed in Canadian dollars)

2. BASIS OF PRESENTATION AND STATEMENT OF COMPLIANCE (continued)

- Impairment of exploration and evaluation assets

While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of exploration and evaluation assets. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Estimates include but are not limited to estimates of the discounted future cash flows expected to be derived from the Company's properties, costs to sell the properties and the appropriate discount rate.

Reductions in metal price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company's exploration and evaluation assets.

- Income taxes and recoverability of potential deferred tax assets

In assessing the probability of realizing income tax assets recognized, management makes estimates related to expectations of future taxable income, applicable tax planning opportunities, expected timing of reversals of existing temporary differences and the likelihood that tax positions taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. The Company considers whether relevant tax planning opportunities are within the Company's control, are feasible, and are within management's ability to implement. Examination by applicable tax authorities is supported based on individual facts and circumstances of the relevant tax position examined in light of all available evidence. Where applicable tax laws and regulations are either unclear or subject to ongoing varying interpretations, it is reasonably possible that changes in these estimates can occur that materially affect the amounts of income tax assets recognized. Also, future changes in tax laws could limit the Company from realizing the tax benefits from the deferred tax assets. The Company reassesses unrecognized income tax assets at each reporting period.

- Share-Based Payments

Management determines costs for share-based payments using market-based valuation techniques. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies applied in the preparation of the interim consolidated financial statements are consistent with those followed in the preparation of the Company's December 31, 2013 annual financial statements, except for the adoption of new standards and interpretations as of January 1, 2014.

Recent accounting pronouncements

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods on or after January 1, 2014 or later periods. Many are not applicable or do not have a significant impact to the Company and have been excluded.

IFRS 9 – Financial Instruments (“IFRS 9”) was issued by the IASB in November 2009 with additions in October 2010 and May 2013 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity's own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

IAS 19 - Employee Benefits (“IAS 19”) was amended by the IASB in November 2013 to simplify the accounting for contributions from employees or third parties to defined benefit plans that are independent of the number of years of service. The amendments to IAS 19 are effective for annual periods beginning on or after July 1, 2014. The adoption of this standard had no impact on the Company.

IAS 32 – Financial Instruments: Presentation (“IAS 32”) was amended by the IASB in December 2011 to clarify certain aspects of the requirements on offsetting. The amendments focus on the criterion that an entity currently has a legally enforceable right to set off the recognized amounts and the criterion that an entity intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously. The adoption of this standard had no impact on the Company.

IAS 36 – Impairments of Assets (“IAS 36”) was amended by the IASB in May 2013 to clarify the requirements to disclose the recoverable amounts of impaired assets and require additional disclosures about the measurement of impaired assets when the recoverable amount is based on fair value less costs of disposal, including the discount rate when a present value technique is used to measure the recoverable amount. The adoption of this standard had no impact on the Company.

IAS 39 – Financial Instruments: Recognition and Measurement (“IAS 39”) was amended by the IASB in June 2013 to clarify that novation of a hedging derivative to a clearing counterparty as a consequence of laws or regulations or the introduction of laws or regulations does not terminate hedge accounting. The adoption of this standard had no impact on the Company.

IFRIC 21 – Levies (“IFRIC 21”) was issued in May 2013. IFRIC 21 provides guidance on the accounting for levies within the scope of IAS 37 – Provisions, Contingent Liabilities and Contingent Assets (“IAS 37”). IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past event (“obligating event”). IFRIC 21 clarifies that the obligating event that gives rise to a liability to pay a levy is the activity described in the relevant legislation that triggers the payment of the levy. The adoption of this standard had no impact on the Company.

4. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The capital of the Company consists of share capital, warrants, contributed surplus and options. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The properties in which the Company currently has an interest are in the exploration and evaluation stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the nine months ended September 30, 2014. The Company is not subject to externally imposed capital requirements.

New Alger Gold Project

On November 1, 2009, Renforth entered into an agreement (the “agreement”) with Cadillac Ventures Inc. (“Cadillac”) whereby Renforth shall have the right to acquire from Cadillac a 51% interest in the New Alger gold property in Québec (the “Property”). Renforth may acquire a 51% interest in the Property through (a) the payment of \$250,000 in cash over a period of 3 years to Cadillac, (b) the issuance of 2,500,000 (500,000 common shares post share consolidation) common shares over a period of 2 years to Cadillac and (c) upon spending a minimum of \$2,500,000 in exploration on the Property over a period of 3 years. Upon completion of its obligations, the parties shall be contributing as to the property – 51% Renforth and 49% Cadillac.

As per the original agreement, Renforth shall pay to Cadillac the following amounts on the following dates:

	Cash	Shares
Formation date	\$10,000 paid	-

7. EXPLORATION AND EVALUATION ASSETS (continued)

On January 28, 2013, Renforth entered into an agreement (the "**Purchase Agreement**") with Cadillac to acquire a 100% interest in Cadillac's New Alger Property, located in Cadillac Township, Québec. The Purchase Agreement supersedes previous agreements, as amended.

The Purchase Agreement provides for the payment to Cadillac of the following: (i) \$20,000 cash and 2,000,000 common shares of Renforth at the time of signing the Agreement (paid and common shares issued), (ii) \$210,000 cash by June 15, 2013 and (iii) \$250,000 cash by November 15, 2013. Upon satisfaction of the foregoing conditions, Renforth will acquire a 100% interest in the property, subject to an existing 1% net smelter return royalty and Cadillac will retain an additional 1% net smelter return royalty.

On September 30, 2013, Renforth and Cadillac signed an agreement whereby Cadillac agreed to accept common shares in lieu of the June 15, 2013 cash payment at an agreed price of \$0.05. On October 24, 2013, Renforth issued 4,200,000 common shares to Cadillac, valued at \$168,000 based on the fair value of common shares at the date of issuance. (See Note 16)

On February 1, 2014, Renforth and Cadillac agreed to settle the final payment through quarterly instalments of \$15,000 (commencing February 2014), with the balance of \$190,000 payable February 2015. In consideration for the restructuring of the payment, Renforth will pay an additional fee of \$10,000 payable February 2015.

The Purchase Agreement terminated the previous agreement between the parties under which Renforth had an option to acquire a 51% joint venture interest in the New Alger Property.

On February 18, 2014, the Company acquired (the "Property") the western boundary of Renforth's flagship New Alger project.

The acquisition is subject to several terms and conditions, including the following:

- 1- Renforth shall issue to the vendor 200,000 common shares of Renforth from treasury (note 9);
- 2- Upon or before the date which is 12 months from the signing of the agreement Renforth shall carry out \$20,000 in exploratory work on the Property, issue to the vendor 100,000 Renforth treasury common shares and pay the vendor \$10,000, to acquire a 25% interest in the Property;
- 3- Upon or before the date which is 24 months from the signing of the agreement Renforth shall carry out \$30,000 in work on the Property, issue to the vendor 250,000 Renforth treasury common shares and pay the vendor \$15,000, to earn Renforth an additional 30% interest in the Property;
- 4- Upon or before the date which is 36 months from the signing of the agreement Renforth shall carry out \$50,000 in work on the Property, issue to the vendor 250,000 common shares of Renforth from treasury and pay the vendor \$25,000 in cash, to earn Renforth the final 45% interest in the Property.

Nixon Bartleman Property

On August 4, 2014 Renforth entered into an option agreement to earn a 55% interest in the Nixon-Bartleman Property located in the West Timmins Mining Area, in the western part of the Porcupine Mining Camp. The property is comprised of 19 claims, four of which are patent claims, with the Porcupine-Destor Fault running across the centre of the property. On the patent claims there have been 5 gold-bearing quartz veins uncovered by previous operators, along with extensive stripping and channel sampling, a total of 43 holes have been drilled on this property.

In order to earn a 55% interest in the property, Renforth must incur \$25,000 in exploration spending on the property during August 2014, within 12 months spend an additional \$125,000 on the property and issue 1,000,000 shares to the vendor, and within 24 months spend an additional \$150,000 on the property and issue 1,250,000 shares to the vendor.

11. FINANCIAL RISK FACTORS

The Company's risk exposures and the impact on the Company's financial instruments are summarized below. There have been no significant changes in the risks, objectives, policies and procedures during the three and nine months ended September 30, 2014 and 2013.

Credit risk

The Company's credit risk is primarily attributable to short-term investments included in cash and cash equivalents. The Company has no significant concentration of credit risk arising from operations. Short-term investments consist of bankers acceptances, which have been invested with reputable financial institutions, from which management believes the risk of loss to be remote. Sales tax receivable consists of goods and services tax due from the Federal Government of Canada. Management believes that the credit risk concentration with respect to these items is remote.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2014, the Company had a cash and cash equivalent balance of \$84,358 (December 31, 2013 – \$160,981) to settle current financial liabilities of \$298,179 (December 31, 2013 - \$451,394).

Market risk

(a) Interest rate risk

The Company has cash balances and no long term debt. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

(b) Foreign currency risk

The Company's functional currency is the Canadian dollar and all major purchases are transacted in Canadian dollars. Management believes the foreign exchange risk is negligible and therefore does not hedge its foreign exchange risk.

(c) Price risk

The Company is exposed to price risk with respect to commodity prices. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

Sensitivity analysis

The Company has designated its cash and sales tax receivable as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities, classified as other financial liabilities, are measured at amortized cost.

As at September 30, 2014, the carrying and fair value amounts of the Company's financial instruments are approximately the same.

The Company's financial instruments that are carried at fair value, consisting of cash equivalents have been classified as Level 1 within the fair value hierarchy.

Based on management's knowledge and experience of the financial markets, the Company believes the following movements are "reasonably possible" over a twelve month period.

Cash and cash equivalents include liquid investments which are at variable rates. Sensitivity to a plus or minus 1% change in rates would affect net loss by \$840 annualized based on the September 30, 2014 cash and cash equivalents balance.

The Company does not hold balances in foreign currencies to give rise to exposure to foreign exchange risk.

Price risk is remote since the Company is not a producing entity.

12. COMMITMENTS AND CONTINGENCIES

Environmental Contingencies

The Company's mining and exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

- (a) See *note 7* for additional commitments and contingencies on evaluation and exploration assets.
(b) The Company renounced \$137,670 of qualifying exploration expenditures to the shareholders in 2013. Under the "look back" provision governing flow-through shares, \$95,020 of this amount had to be spent by the end of 2014. The Company spent the required amount.
