Renforth Successfully Increases Inferred Strike of Malartic West Copper/Silver Discovery

Renforth Resources Inc. (CSE – RFR) (OTC Pink – RFHRF) (“Renforth” or the “Company”) has successfully extended the Beaupre copper/silver discovery on Renforth’s wholly owned Malartic West property, contiguous to the Canadian Malartic Mine, to a current total strike length of 165m, an increase of just over 100m, and exposed en-echelon quartz veining to the south. The strike is still open, exploration work was ended, as expected, by several days of snowfall.

Samples have been taken in the field, consisting of channels cut and grab samples, these will be delivered to the lab for assay work, the results reported upon when available. Locations sampled include the shear zone and quartz veining, visual identification in the field of mineralization included chalcopyrite, bornite and pyrite.

Renforth’s geologists have repositioned to New Alger and are spotting the planned holes, managing the mobilization of the drill to the property, drilling will commence as soon as possible.

Technical information in this press release was reviewed and approved by Brian H. Newton P.Ge, a “Qualified Person” pursuant to NI 43-101.

ABOUT RENFORTH

Renforth Resources Inc. is a Toronto-based gold exploration company with five wholly owned surface gold bearing properties located in the Provinces of Quebec and Ontario, Canada.

In Quebec Renforth holds the New Alger and Parbec properties, in the Cadillac and Malartic gold camps respectively, with gold present at surface and to some depth, located on the Cadillac Break. In both instances additional gold bearing structures, other than the Cadillac Break, have been found on each property and require additional exploration. Renforth also holds Malartic West, contiguous to the western boundary of the Canadian Malartic Mine property, located in the Pontiac Sediments, this property is gold bearing and was the recent site of a copper discovery. In addition to this Renforth has optioned the wholly owned Denain-Pershing gold bearing property, located near Louvicourt, Quebec, to O3 Mining Inc.

In Ontario Renforth holds the Nixon-Bartleman surface gold occurrence west of Timmins Ontario, drilled, channeled and sampled over 500m – this historic property also requires additional exploration to define the extent of the mineralization.
