**Renforth Presenting at Global Mining Symposium Weds. Sept 22
Surimeau Exploration Update**

Renforth Resources Inc. (CSE – RFR) (OTCQB– RFHRF) (FSE-9RR) (“Renforth” or the “Company”) is pleased to announce that a corporate presentation will be made online to any interested parties at the Global Mining Symposium presented by The Northern Miner on Wednesday September 22 at 11:40 am EST, registration is free.

In addition to this the previously announced fall field work at Surimeau has commenced with the chipping almost completed and the mobilization of the stripping crew and their equipment ongoing. Renforth’s geological team will be in the field later this week in order to prospect and sample as the stripping progresses.

Technical disclosure in this press release has been reviewed and approved by Francis R. Newton P.Geo (OGQ#2129), a “qualified person” pursuant to NI 43-101

About Renforth

Renforth holds the Parbec open pit constrained gold deposit in Malartic Quebec, contiguous to the Canadian Malartic mine, with a 2020 resource estimate of 104,000 indicated ounces of gold at a grade of 1.78 g/t Au and 177,000 inferred ounces of gold at a grade of 1.78 g/t Au. This resource estimate is now considered by Renforth to be out of date due to the results received in a 15,569m drill program which has been recently completed. This program was planned to twin, infill and undercut existing drill holes at Parbec, to support a rebuild of the geological model and a resource estimate restatement. In addition to this Renforth wholly owns the 260 km² Surimeau District Property with several areas of historically identified polymetallic and gold mineralization. This includes the Victoria West occurrence, Renforth’s current focus, interpreted to be a nickel-containing ultramafic unit, juxtaposed with VMS-style copper-zinc mineralization which occurs over ~5km of

strike in the western end of the 20km central anomaly at Surimeau. Renforth also holds the Malartic West property, the site of a copper/silver discovery, and Nixon-Bartleman, west of Timmins Ontario, with gold present on surface over a strike length of ~500m. Renforth is well funded, with ~\$5 million in cash and securities on hand (*as at 05/14/21), in addition to the gold contained in our gold deposit.

Forward Looking Statements

This news release contains forward-looking statements and information under applicable securities laws. All statements, other than statements of historical fact, are forward looking. Forward-looking statements are frequently identified by such words as 'may', 'will', 'plan', 'expect', 'believe', 'anticipate', 'estimate', 'intend' and similar words referring to future events and results. Such statements and information are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties, including the speculative nature of mineral exploration and development, fluctuating commodity prices, the risks of obtaining necessary approvals, licenses and permits and the availability of financing, as described in more detail in the Company's securities filings available at www.sedar.com. Actual events or results may differ materially from those projected in the forward-looking statements and the reader is cautioned against placing undue reliance thereon. Forward-looking information speaks only as of the date on which it is provided and the Company assumes no obligation to revise or update these forward-looking statements except as required by applicable law.
