### **Renforth Presenting to Emerging Growth Conference at 10:50am EST Wednesday January 11, 2023**

**Renforth Resources Inc. (CSE – RFR) (OTCQB– RFHRF) (FSE-9RR)** (“Renforth” or the “Company”) is pleased to advise shareholders that Nicole Brewster, President and CEO of Renforth, will present to the Emerging Growth Conference at 10:50am EST on Wednesday January 11, 2023. Interested parties can register to attend the conference using the link below, a question period will follow the presentation.

[https://goto.webcasts.com/starthere.jsp?ei=1575091&tp\\_key=4acb9c592c&sti=rhrhf](https://goto.webcasts.com/starthere.jsp?ei=1575091&tp_key=4acb9c592c&sti=rhrhf)

Renforth has commenced permitting for a 2023 drill program anticipated to start late Feb./early March, targeting the western end of the ~20km polymetallic Victoria structure at Surimeau, approximately a 4km step out on the structure from the drilling completed at Victoria prior to Christmas. Assay results from that program are expected to be received in early February and will be released thereafter, prior to that a portion of one hole drilled at Lalonde was sent for rush assay, that will also be released once received.

Technical disclosure in this press release has been reviewed and approved by Francis R. Newton OGQ a “qualified person” pursuant to NI 43-101.

#### **About Renforth**

Renforth is focused on Quebec's newest battery metals district, our wholly owned ~330 km<sup>2</sup> Surimeau District Property, which hosts several known areas of polymetallic "battery metals" mineralization, each with various levels of exploration, as well as a significant amount of unexplored ground. Victoria West has been drilled over a strike length of 2.2km, within a 5km long mineralized structure, proving nickel, copper, zinc and cobalt mineralization, in the western end of a 20km magnetic anomaly. The Huston target, during initial reconnaissance, resulted in a grab sample grading 1.9% Ni, 1.38% Cu, 1170 ppm Co and 4 g/t Ag. Additionally, the Lalonde, Surimeau and Colonie Targets are all polymetallic mineralized occurrences which, along with various gold showings, comprise the areas of potential of this NSR free property.

In addition to the Surimeau District battery metals property Renforth wholly owns the Parbec Gold deposit, a surface gold deposit contiguous to the Canadian Malartic Mine property in Malartic, Quebec. In 2020/21 Renforth completed 15,569m of drilling which successfully twinned certain historic holes, filled in gaps in the

resource model with newly discovered gold mineralization and extended mineralization deeper. Based upon the success of this significant drill program the Company considers the spring 2020 MRE, with a resource estimate of 104,000 indicated ounces of gold at a grade of 1.78 g/t Au and 177,000 inferred ounces of gold at a grade of 1.78 g/t Au to be out of date. With the new data gained Renforth will undertake to complete the first ever structural study of the mineralization at Parbec, as well as additional total metallic assay work in order to better contextualize the nugget effect on the gold mineralization.

Renforth also holds the Nixon-Bartleman property, west of Timmins Ontario, with gold present on surface over a strike length of ~500m.

### **Forward Looking Statements**

This news release contains forward-looking statements and information under applicable securities laws. All statements, other than statements of historical fact, are forward looking. Forward-looking statements are frequently identified by such words as 'may', 'will', 'plan', 'expect', 'believe', 'anticipate', 'estimate', 'intend' and similar words referring to future events and results. Such statements and information are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties, including the speculative nature of mineral exploration and development, fluctuating commodity prices, the risks of obtaining necessary approvals, licenses and permits and the availability of financing, as described in more detail in the Company's securities filings available at [www.sedar.com](http://www.sedar.com). Actual events or results may differ materially from those projected in the forward-looking statements and the reader is cautioned against placing undue reliance thereon. Forward-looking information speaks only as of the date on which it is provided and the Company assumes no obligation to revise or update these forward-looking statements except as required by applicable law.
