

For Immediate Release

CORPORATE UPDATE

Surrey, British Columbia, June 9, 2011/ GRENVILLE GOLD CORP. (“Grenville Gold” or the “Company”) (TSX.V: GVG) is pleased to announce that it has made significant achievements in advancing its Peruvian projects. The Company has opened and staffed a new local office located in Mira Flores, Lima, Peru. A complete change of management in Peru has also been effected along with a new, more experienced exploration team. Mr. Juan Carlos Chinga has been named General Manager of the Company’s Peruvian operations and Mr. Wilfredo Jimenez has been named Exploration Manager for all Peruvian exploration activities.

Mr. Chinga is a mining engineer with 11 years of experience working with various Canadian exploration companies in Peru. He has experience in personnel management, project logistics and in dealing with community relations and mining health and safety factors.

Mr. Jimenez is a geologist with 15 years of experience working for various international companies such as Vena Resources Inc., Pacific Rim S.A., Cori Iri S.A. and others. Mr. Jimenez has held positions of General Manager of Explorations and Chief Exploration Geologist and was responsible for the discovery of several mineral deposits such as the Karolina Mine in La Libertad province (low sulphidation epithermal gold), the Gianderi Project in La Libertad province (porphyry molybdenum), the JR-24 Project in Huaraz province (porphyry copper-molybdenum-gold), and the Rondoni Project in Huanuco Province (copper-zinc-lead-silver-gold skarn).

In March, 2011, Mr. Thomas R. Tough, P. Eng., the new President of Grenville Gold, and new Company directors, along with Company geologists completed a geologic review of Grenville Gold’s land holdings when they visited the properties. Since then the Company has organized several exploration initiatives that are currently being carried out by the new technical team.

Silveria Project Exploration Update

The Silveria project is located approximately 75 km east-northeast of Lima, Peru. The mobilization of an experienced exploration crew along with the construction of a camp was completed under the supervision of Mr. Jimenez in late April, 2011. Exploration work on the Silveria concessions commenced in May and to date work has consisted of reconnaissance and detailed mapping, along with rock chip sampling. The samples will be sent to ALS Chemex in Lima, Peru for analysis and results will be announced upon receipt.

The Company has been working on compiling several generations of previous work programs from the Silveria Concession Group and has contracted Exploration Alliance Ltd. to provide a current NI43-101 report. This report is expected to be completed soon.

Española Project Exploration Update

The Española project is located approximately 90 km south of Lima, Peru and is only about 13km from the Condestable Mine which operates at a rate of 6,000 tonnes per day producing copper-silver-gold concentrates.

An initial exploration program of the Company's Española property has commenced and consists of mapping and sampling. The property has been mined intermittently in the past when high grade copper was mined from a 1-4 meter wide vein mineralized with chalcopyrite, bornite and associated gold and silver. The Company currently has the exploration team on the ground performing a thorough geological investigation of the area with the view to identifying a similar style of deposit as that of the nearby Condestable Mine.

The new management team of Grenville Gold Corp. has been working diligently since late 2010 to reorganize the Company and resolve disputes developed over the past several years. In a short period of time the new team has managed to terminate legal proceedings in Canada between the Company and Newton Gold Corp. (see news release dated Feb 11, 2011). Disputes in Peru between the Company and several past employees, contractors and property vendors have been resolved. The Company's website has been updated and previous non-compliant NI43-101 content and statements have been removed. The Company's name has been changed and its shares have been consolidated to provide a new platform for investors. Management is pleased with the current status of the new Grenville Gold Corp. now that it is able to concentrate on the advancement of its exploration projects.

On behalf of GRENVILLE GOLD CORP.

“Thomas R. Tough”
