MAXTECH TO ACQUIRE 20,000 HECTARES OF MANGANESE CLAIMS IN THE STATE OF MATO GROSSE, BRAZIL

Vancouver, British Columbia – December 6th, 2016 – Maxtech Ventures Inc. (CSE: MVT) (Frankfurt: MIN), (OTC: MTEHF) (“Maxtech” or the “Company”) is pleased to announce that it has entered into an arms-length letter of intent (“LOI”) to acquire 2 mineral claims consisting of 20,000 hectares with indications of manganese in the State of Mato Grosse, Brazil.

The terms of the acquisition include the payment of US\$10,000 and the issuance of 200,000 common shares of Maxtech, the transaction is subject to the CSE and other regulatory approvals.

The manganese mineralization observed in the area is similar as found in the Espigao area of the State of Rondonia. Extensive exploration for both hydrothermal vein style deposits and colluvium rich, clast deposits. The Maxtech claims have manganese showings both the near surface, colluvium clast bearing and potentially larger, structurally controlled, hydrothermal vein systems.

Maxtech CEO Peter Wilson states, “With this pending acquisition, Maxtech is expanding on its goal to be one of the largest explorers of high-grade manganese in Brazil.”

Manganese is the 4th most used metal worldwide primarily because it is indispensable in the production of steel and other alloys. Plus, it is also an essential micronutrient for plant and animal life via the production and use of fertilizer. However, new technologies and applications have emerged as the primary driver of the popular metal.

About MaxtechVentures Inc.

Maxtech Ventures Inc. (CSE: MVT/ FRANKFURT: MIN/ OTC: MTEHF) is a Canadian based diversified industries corporation, with mining interests in Brazil, focused on high-grade manganese.
