

**MANAGEMENT'S DISCUSSION AND ANALYSIS
OF THE COMPANY'S FINANCIAL CONDITION AND RESULTS OF OPERATIONS
FOR THE YEAR ENDED DECEMBER 31, 2012**

FORM 51-102F1

DATE AND SUBJECT OF REPORT

The following Management Discussion & Analysis ("MD&A") is intended to assist in the understanding of the trends and significant changes in the financial condition and results of operations of Abenteuer Resources Corp. ("Abenteuer" or the "Company") for the year ended December 31, 2012. The MD&A includes comparisons for the corresponding year ended December 31, 2011. It should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2012. The MD&A has been prepared as of April 18, 2013.

The following information has been prepared by management in accordance with International Financial Reporting Standards ("IFRS") unless otherwise indicated. All financial results are reported in Canadian dollars and production numbers represent Abenteuer's ownership interest.

Additional information relating to the Company can be found on the SEDAR website at www.sedar.com or the Company's website at www.abuoil.com.

FORWARD LOOKING STATEMENTS

This document contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to as "forward-looking statements"). Often, but not always, forward-looking statements can be identified by the use of words such as "plans," "expects" or "does not expect," "is expected," "planned," "budget," "scheduled," "estimates," "continues," "forecasts," "projects," "predicts," "intends," "anticipates" or "does not anticipate," or "believes," or variations of such words and phrases, or statements that certain actions, events or results "may," "could," "would," "should," "might" or "will" be taken, occur or be achieved.

Forward-looking statements included or incorporated by reference in this document include statements with respect to:

- The Company's acquisition strategy and 2013 revenue expectations as defined in the Company's Business and Review section;
- The Company's expectations of long term future oil prices and its existing reserve valuation; and
- The Company's expectations regarding its ability to raise capital and meet its obligations.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any of our future results, performance or achievements expressed or implied by the forward-looking statements; consequently, undue reliance should not be placed on forward-looking statements.

Management believes the primary risk factors have been identified in the Risks and Uncertainties section of this document.

Forward-looking statements are based on a number of assumptions that may prove to be incorrect, including, but not limited to, assumptions about:

- general business and economic conditions;
- the timing of the receipt of required approvals for our operations;
- the availability of equity and other financing on reasonable terms;
- our ability to procure equipment and operating supplies in sufficient quantities and on a timely basis;
- our ability to attract and retain skilled labour and staff; and
- our ongoing relations with our employees and with our business/joint venture partners.

We caution you that the foregoing lists of important risk factors and assumptions are not exhaustive. Events or circumstances could cause our actual results to differ materially from those estimated or projected and expressed in, or implied by, these forward-looking statements. We undertake no obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of factors, whether as a result of new information or future events or otherwise, except as may be required under applicable laws.

DESCRIPTION OF BUSINESS AND REVIEW

Abenteuer is a Canadian junior oil and gas company incorporated under the laws of British Columbia, with its common shares listed for trading on the TSX Venture Exchange under the symbol “**ABU**”. Its head office is located at suite 1578 – 609 Granville St., Vancouver, BC V7Y 1G5. The Company is engaged primarily in exploration for, and production of, petroleum. Current operations are focused on the Western Canadian Sedimentary Basin, specifically south eastern Saskatchewan, which is an area of primarily low risk oil development. However, management is actively evaluating additional resource projects in Canada and internationally.

The Company is experiencing declining production from its existing wells and ever increasing salt water content in the flow being pumped as a result of which the Company’s total oil revenues decreased in 2012.

OIL PROPERTIES

West Kingsford, Saskatchewan – Oil

During the year ended December 31, 2012, the Company continued to receive cash flow from its joint operations in the West Kingsford area of Saskatchewan.

Abenteuer has working interests in five wells in south east Saskatchewan. Wells 2 and 3 are both horizontal wells (HZ) while the other 3 wells are vertical wells.

Well #	Well Identifier	Working Interest (%)	Net Revenue Interest (%)
1	King 141/08-13-004-07 W2M	45.90	39.02%
2	King 91/06 HZ 1D08-13-1D06-18-04-06 W2M	13.00	13.00%
3	King 92/07 HZ 2C5-18-1D7-13-04-07 W2M	45.90	39.02%
4	King 4D8-14/2A11-13-004-07 W2	10.50	8.93%
5	King 03-27-004-07 W2	100.00	84.50%

The Company has determined that it has two cash generating units (“CGUs”) based on a shared reservoir, operator and equipment for four of the wells.

All disclosure of scientific or technical information on the Company's oil properties contained in this Management’s Discussion and Analysis is based on information prepared by or under the supervision of the Company's Independent Qualified Reserves Evaluator, E.P. Webb of Citadel Engineering Ltd. The Company filed its most recent annual 51-101F2 Report on Reserves Data as of December 31, 2012 on SEDAR on April 18, 2013.

Production during the year:

Location	2012	2011
Well # 1	118.4	240.6
Well # 2	70.1	93.0
Well # 3	384.7	327.3
Well # 4	111.1	161.0
Well # 5	278.6	328.5
Period Total in cubic meters	962.9	1,150.4
Period Total in barrels	6,056	7,236.0
Barrels per day	16.6	19.8

The average price received for oil was \$78.53 per barrel during the year ended December 31, 2012 and \$83.65 per barrel during the prior year.

The #5 well was shut-in during the first half of March 2012 due to road bans in the area, but it was subsequently reactivated in the third week of May 2012.

According to the Company's 51-101F2 Report on Reserves Data at December 31, 2012, the Net Present Value of Future Net Revenue (before Income taxes) using a 10% discount rate is approximately \$3,068,000. This valuation includes both Proved and Probable Reserves. The valuation is determined based on estimated future oil prices as follows:

YEAR	OIL \$/BBL ⁽¹⁾
2013	90.41
2014	92.50
2015	88.62
2016	92.27
2017 ⁽²⁾	94.79

⁽¹⁾ Price based upon future forecast product prices for Cromer Medium Crude. Prices shown have been adjusted for API quality.

⁽²⁾ Prices were escalated at a rate of 2% per annum thereafter.

Operating profit for the year ended December 31, 2012:

	Well #1 (\$)	Well #2 (\$)	Well #3 (\$)	Well #4 (\$)	Well #5 (\$)	Total (\$)
Sales	59,742	35,228	193,907	57,565	129,159	475,601
Royalties	9,106	471	29,643	9,909	20,019	69,148
Net Revenue	50,636	34,757	164,264	47,656	109,140	406,453
Operating expenses	34,794	17,877	66,651	36,025	108,334	263,681
Operating profit	15,842	16,880	97,613	11,631	806	142,772

RESULTS OF OPERATIONS

Current Quarter

Gross oil sales in the fourth quarter ended December 31, 2012 decreased from \$157,688 during the prior year period to \$103,625. The difference of \$54,063 (34%) can be attributed to decreased production due to the #5 well being shut-in and lower average oil prices in 2012.

Royalties in the period declined to \$15,548 from \$17,165 in the prior year. This difference of \$1,617 (9%) is due to reduced revenue in the period from declining production.

Operating expenses for the quarter increased to \$78,533 from \$67,798 during the prior year period. The \$10,735 (16%) was related to increased maintenance costs incurred on the #5 well.

General and administrative expenses are in large measure made up of management fees, professional fees, director's fees and office rent. They have increased by \$13,028 (17%) from \$77,935 in 2011 to \$90,963 in 2012. The difference is primarily attributed to additional office rental costs and general inflation in the current period.

The Company received a \$25,000 payment in November 2012 to extend the Admiralty farm-out option for an additional six months.

Year

Gross oil sales for the year ended December 31, 2012 decreased from \$605,277 in 2011 to \$475,601. The difference of \$129,676 (21%) is primarily attributed to an extended well shut-in period during March and April 2012 due to weather and a shut-in during December 2012 due to maintenance. Additionally, declining production, increasing salt water content, and lower average oil prices also contributed to lower sales during the year.

Royalties in the year decreased by 47% from \$130,804 to \$69,148 due to lower production, a change in estimated royalties and the discontinuation of certain royalties that were previously being withheld on the #4 well. Furthermore, the Company received a refund of royalty expenses of \$28,000 for royalties paid from 2009 to 2011.

Operating expenses for the period decreased to \$263,681 from \$272,180 during the prior year. The \$8,499 (3%) decrease is a result of an extended shut-in on the #5 well due to bad weather and road conditions.

General and administrative expenses are in large measure made up of management fees, professional fees, director's fees and office rent. They have increased by \$35,124 (11%) from \$321,665 in 2011 to \$356,789 in 2012. The difference is attributed to additional office rental costs and general inflation in the current period.

The Company incurred no stock-based compensation payments in the current year as no stock options were granted and all of the stock options granted in prior years had fully vested. The \$115,798 reported in the prior year was in connection with 1,150,000 incentive stock options granted.

Interest income in the year decreased from \$15,155 in 2011 to \$10,330 in the current year. The difference of \$4,825 (32%) is attributed to lower interest rates on risk free term deposits in the current year.

The Company received a \$25,000 payment in November 2012 to extend the Admiralty farm-out option for an additional six months.

SELECTED ANNUAL INFORMATION

The Company's functional and presentation currency is the Canadian Dollar for all years presented.

	2012 (\$)	2011 (\$)	2010 (\$)
Petroleum sales, net of royalties	406,453	\$ 474,473	\$ 431,500
Interest income	10,330	15,155	3,618
Gain on farm-out	25,000	-	-
Recovery of royalty expense	28,020	-	-
Expenses	(620,470)	(726,052)	(1,102,209)
Income tax recovery	-	-	29,986
Net loss	(150,667)	(236,424)	(637,105)
Net loss per share basic and diluted	(0.01)	(0.01)	(0.04)
Total assets	2,149,241	2,288,068	2,573,210
Total long-term liabilities	143,036	141,052	107,895
Future income tax liability	-	-	-
Cash dividends	-	-	-

SELECTED QUARTERLY INFORMATION

The following table summarized the results of operations for the eight most recent quarters.

	Dec 31 2012	Three months ended		
		Sep 30 2012	Jun 30 2012	Mar 31 2012
Petroleum sales, net of royalties	88,082	109,088	95,523	113,760
Interest income	982	-	4,537	4,811
Gain on farm-out	25,000	-	-	-
Recovery of royalty expense	-	-	28,020	-
Expenses	(169,496)	(157,091)	(159,465)	(134,418)
Net loss	(55,437)	(48,003)	(31,380)	(15,847)
Net loss per share and diluted loss per share	(0.01)	(0.00)	(0.00)	(0.00)

	Dec 31 2011	Three months ended		
		Sep 30 2011	Jun 30 2011	Mar 31 2011
Petroleum sales, net of royalties	140,523	130,594	87,656	115,700
Interest income	5,403	2,098	7,614	40
Expenses	(262,861)	(172,859)	(82,971)	(207,361)
Net income (loss)	(116,935)	(40,167)	12,299	(91,621)
Net earnings (loss) per share and diluted earnings (loss) per share	(0.01)	(0.00)	0.00	(0.00)

Note: The quarters ended June 30, 2012 and June 30, 2011 both showed material variations in petroleum sales, net of royalties as it was during these periods that the Company experienced extended shut-ins of its #5 well. It caused a significant reduction in both oil sales and expenses.

COMMITMENTS

The Company has a three year office lease commitment. It will require future aggregate payments as follows:

2013 - \$ 98,753
2014 - \$103,841
2015 - \$ 26,158

Further, the Company currently has no capital commitments beyond the reclamation costs which are disclosed in the Company's annual audited financial statements for the year ended December 31, 2012.

ADMIRALTY FARM-OUT

During the year ended December 31, 2011, the Company executed a farm-out agreement with Admiralty Oils Ltd. ("Admiralty"), an arm's length private Saskatchewan oil company, to drill at least one test well on Section 27 of the West Kingsford pool in southeastern Saskatchewan. The Company currently operates a producing 100-per-cent-owned horizontal well on this property that was initially drilled in 2003. The proposed well is far enough away from the existing well to have no impact on production from that well.

Under the terms of the agreement, Admiralty can earn a 70-per-cent working interest in the well and farm-out lands by incurring 100 per cent of the drilling and well-completion costs, up to equipping and tie-in. The Company can elect to convert its 30-per-cent working interest into a 10-per-cent gross overriding royalty. Admiralty, as operator, was required to spud the first well prior to October 20, 2012. This deadline was not met and the Company granted Admiralty a six month extension in exchange for \$25,000, which was received in November 2012 and recorded as gain on farm-out.

On December 27, 2012 Admiralty announced that it had spudded a vertical well. The well was drilled under an Authorization for Expenditure ("AFE") that had costs estimated as follows:

DESCRIPTION	AMOUNT (\$)
Drilling	484,598
Completion	192,385
Equipping	145,850
Sub-total	822,833
Contingency of 15%	123,425
Grand Total	946,258

The Company has been advised that the well reached target depth, but has yet to be tested or completed. Results will be released as they become known to the Company.

Any subsequent wells that are drilled would have costs split according to the working interest of each party.

LIQUIDITY

The Company's cash position decreased by \$34,390 (21%) from \$164,906 on December 31, 2011 to \$130,516 on December 31, 2012. Working capital decreased by only 4% from \$1,188,534 on December 31, 2011 to \$1,141,614 at the end of the current year.

While the Company does currently have working interests in 5 producing oil wells and does derive significant revenues from operations, the Company's activities have also been funded through equity placements. However, if such funds are not available in the future or other sources of financing cannot be obtained, then the Company may be forced to curtail its activities to a level for which funding is available and can be obtained.

Management believes the Company has sufficient internally generated financial resources to meet its present obligations as they become due, and to participate in future drilling opportunities as they are presented.

The Company experienced a cash outflow from operations of \$34,390 in the current year. As at December 31, 2012, the Company had total assets of \$2,149,241 and the principal non-cash assets of the Company were its working interest in 5 oil wells in southeastern Saskatchewan with a carrying value of \$865,080 representing 40% of its total assets.

At December 31, 2012, the Company had long term liabilities consisting of a decommissioning provision on its Saskatchewan oil interests, estimated to have a present value of \$143,036. The Company has a reclamation bond in place with the Saskatchewan Industry and Resources for \$32,506 in respect of its oil interests.

CAPITAL RESOURCES

During the year ended December 31, 2011, the Company raised a total \$132,750 from the exercise of share purchase warrants at \$0.15 per share and a total of \$33,000 from the exercise of stock options at prices between \$0.10 and \$0.23 per share.

The Company did not raise any additional capital through share offerings during the year.

CAPITAL MANAGEMENT

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence and to sustain future development of the business. The capital structure of the Company consists of equity, comprising share capital, net of accumulated deficit.

The Company manages its capital requirements by maintaining a budgeting and forecasting process to determine whether equity funding is required.

The Company is not subject to any externally imposed capital requirements.

OUTSTANDING SHARE DATA

As at April 18, 2013, the Company had the following share structure:

	Number
Common shares	18,278,266
Options	1,150,000
	<hr/>
Fully diluted	19,428,266
	<hr/>

OUTLOOK

Oil prices have improved significantly in the last three years. While there has been wide fluctuation, the price is still far surpassing historical returns. The Company sees this trend continuing into the future and will continue to evaluate other petroleum based opportunities.

Commodity prices such gold, silver and other precious metals have risen in tandem with oil. As a result, the Company has been evaluating opportunities outside the petroleum sector which might improve the Company's ability to access capital and ultimately increase shareholder value.

OFF-BALANCE SHEET ARRANGEMENTS

The Company did not enter into any off-balance sheet arrangements during the year.

SUBSEQUENT EVENTS

There were no material events subsequent to the end of the year.

RISKS AND UNCERTAINTIES

The Company is in the oil and gas exploration and development business and as such is exposed to a number of risks and uncertainties that are not uncommon to other companies in the same business. Exploration for and development of oil properties involves a high degree of risk, and the cost of conducting programs may be substantial and the likelihood of success is difficult to assess.

Beyond exploration risk, management is faced with other possible risks which include the following:

Oil Price Risk

The price of oil greatly affects the value of the Company and the potential value of its properties.

Financial Market Risk

The Company is in part dependent on the equity markets as a source of capital for making acquisitions or drilling new wells. Accordingly, the Company's capital resources and ability to make acquisitions or drill new wells are largely determined by the strength of the resource markets and by the status of the Company's projects in relation to these markets, and its ability to compete for the investor support of its projects.

Title Risk

The Company has investigated its right to explore and exploit its properties and, to the best of its knowledge, there are no known encumbrances. However, the results of the Company's investigations should not be construed as a guarantee of title.

Environmental Risk

The Company seeks to operate within environmental protection standards that meet or exceed existing requirements in the country in which the Company operates. Present or future laws and regulations, however, may affect the Company's operations. Future environmental costs may increase due to changing requirements or costs associated with exploration and the developing, operating and closing of oil wells. Programs may also be delayed or prohibited in some areas.

Value Risk

There is no certainty that the carrying value of oil properties which the Company has recorded as assets on its consolidated balance sheet will be realized at the amounts recorded.

Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, then actual results may vary materially from those described on forward-looking statements.

TRANSACTION WITH RELATED PARTIES

The Company incurred the following transactions with directors and companies that are controlled by directors of the Company.

	2012 (\$)	2011 (\$)
Director fees	24,000	27,000
Mineral royalties paid to a director of the Company ¹	2,698	5,090
	26,698	32,090

Key management compensation ²

	2012 (\$)	2011 (\$)
Management fees paid to the CEO	29,500	30,000
Professional fees paid to the CFO	81,000	63,527
Share-based compensation	-	50,704
	110,500	144,231

¹ A 3.75% royalty is held by J. Lewis Dillman, CEO and director of Abenteuer, on the #4 well.

² Key Management includes the CEO and the CFO.

As at December 31, 2012 a total of \$228 (2011 - \$649) was owing to a director of the Company for mineral royalties on the #4 well.

CRITICAL ACCOUNTING ESTIMATES

The preparation of the Company's consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can differ from these estimates. The following areas required a significant degree of estimation and judgment:

Depletion of oil assets

Oil properties are depleted using the UOP method over proved reserves. The calculation of the UOP rate of depletion could be impacted to the extent that actual production in the future is different from current forecast production based on proved reserves. This would generally result from significant changes in any of the factors or assumptions used in estimating reserves (Note 7).

Reserve base

The oil and gas properties are depreciated on a unit of production (“UOP”) basis at a rate calculated by reference to proved reserves determined in accordance with National Instrument 51-101 “Standards of Disclosure for Oil and Gas Activities” and incorporate the estimated future cost of developing and extracting those reserves. Proved reserves are determined using estimates of oil in place, recovery factors and future prices. Future development costs are estimated using assumptions as to number of wells required to produce the reserves, the cost of such wells and associated production facilities and other capital costs (Note 7). Proved reserves are estimated using independent reserve engineer reports and represent the estimated quantities of oil which geological, geophysical and engineering data demonstrate with a specified degree of certainty to be recoverable in future years from known reservoirs and which are considered commercially producible. Proved reserves are those reserves that can be estimated with a high degree of certainty to be recoverable.

Determination of cash generating units

Oil properties are grouped into cash generating units for purposes of impairment testing. Management has evaluated the oil properties of the Company, and grouped the properties into cash generating units on the basis of their ability to generate independent cash inflows, similar reserve characteristics, geographical location, and shared infrastructure.

Impairment indicators and calculation of impairment

At each reporting date, the Company assesses whether or not there are circumstances that indicate a possibility that the carrying values of oil properties and equipment are not recoverable, or impaired. Such circumstances include incidents of deterioration of commodity prices, changes in the regulatory environment, or a reduction in estimates of proved and probable reserves. When management judges that circumstances clearly indicate impairment, property and equipment are tested for impairment by comparing the carrying values to their recoverable amounts. The recoverable amounts of cash generating units are determined based on the higher of value in use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions that are subject to changes as new information becomes available including information on future commodity prices, expected production volumes, quantity of reserves, discount rates, as well as future development and operating costs.

Decommissioning provisions

Restoration costs will be incurred by the Company at the end of the operating life of the Company’s oil properties. The ultimate restoration liability is uncertain and can vary in response to many factors including changes to relevant legal requirements, the emergence of new restoration techniques, experience at other production sites, or changes in the risk-free discount rate. The expected timing and amount of expenditure can also change in response to changes in reserves or changes in laws and regulations or their interpretation. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

Stock-based compensation

The Company uses the Black-Scholes option pricing model for valuation of stock-based compensation. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

The IASB issued the following standards which have not yet been adopted by the Company: IFRS 9, Financial Instruments (IFRS 9), IFRS 10, Consolidated Financial Statements (IFRS 10), IFRS 11, Joint Arrangements (IFRS 11), IFRS 12, Disclosure of Interests in Other Entities (IFRS 12), IAS 27, Separate Financial Statements (IAS 27), IFRS 13, Fair Value Measurement (IFRS 13) and amended IAS 28, Investments in Associates and Joint Ventures (IAS 28). Each of the new standards is effective for annual periods beginning on or after January 1, 2013 with early adoption permitted, with the exception of IFRS 9 which is effective for annual periods beginning on or after January 1, 2015.

The following is a brief summary of the new standards:

IFRS 9 – Financial Instruments

In October 2010, the IASB added the requirements for financial liabilities in the previously issued IFRS 9 *Financial Instruments* ("IFRS 9"). This standard is effective for annual periods beginning on or after January 1, 2015 and replaces the parts of IAS 39 *Financial Instruments: Recognition and Measurement* ("IAS 39") that relate to the classification and measurement of financial instruments. IFRS 9 requires financial assets to be classified into two measurement categories: those measured at fair value and those measured at amortized cost. The determination is made at initial recognition and the classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. For financial liabilities, IFRS 9 retains most of the IAS 39 requirements. The main difference is that, in cases where the fair value option is taken for financial liabilities, the past of the a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than the income statement, unless this creates an accounting mismatch. The Company is currently assessing the impact of early adoption and the impact of this standard on its consolidated financial statements.

IFRS 10 – Consolidation

In May 2011, the IASB issued IFRS 10 *Consolidation* ("IFRS 10"), which replaces IAS 27 *Consolidated and Separate Financial Statements* and SIC-12 *Consolidation – Special Purpose Entities*. IFRS 10 requires an entity to consolidate an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Under existing IFRS, consolidation is required when an entity has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. This standard is effective for annual periods beginning on or after January 1, 2013. The adoption of this standard is not expected to have a material impact on the Company's financial statements.

IFRS 11 - Joint Arrangements

In May 2011, the IASB issued IFRS 11 *Joint Arrangements* (“IFRS 10”), which replaces IAS 31 *Interests in Joint Ventures* and SIC-13 *Jointly Controlled Entities – Non-monetary Contributions by Venturers*. IFRS 11 requires a venturer to classify its interest in a joint arrangement as a joint venture or joint operation. Joint ventures will be accounted for using the equity method whereas for a joint operation the venturer will recognize its share of the assets, liabilities, revenue and expenses of the joint operation. Under existing IFRS, entities have the choice to proportionately consolidate or equity account for interests in joint ventures. This standard is effective for annual periods beginning on or after January 1, 2013. The adoption of this standard is not expected to have a material impact on the Company’s financial statements.

IFRS 12 – Disclosure of Interests in Other Entities

In May 2011, the IASB issued IFRS 12 *Disclosure of Interests in Other Entities* (“IFRS 12”), which establishes disclosure requirements for interests in other entities, such as joint arrangements, associates, special purpose vehicles and off balance sheet vehicles. The standard carries forward existing disclosures and also introduces significant additional disclosure requirements that address the nature of, and risks associated with, an entity’s interests in other entities. This standard is effective for annual periods beginning on or after January 1, 2013. The adoption of this standard is not expected to have a material impact on the Company’s financial statements.

IAS 28 Investments in Associates and Joint Ventures

As a consequence of the issue of IFRS 10, IFRS 11 and IFRS 12, IAS 28 has been amended. IAS 28 will provide the accounting guidance for investments in associates, and sets out the requirements for the application of the equity method when accounting for investments in associates and joint ventures. These amendments are effective for annual periods beginning on or after January 1, 2013 and early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company’s financial statements.

IFRS 13 - Fair Value Measurement

In May 2011, the IASB issued IFRS 13 *Fair Value Measurement* (“IFRS 13”), which is a comprehensive standard for fair value measurement and disclosure requirements for use across all IFRS standards. The new standard clarifies that fair value is the price that would be received to sell an asset, or paid to transfer a liability in an orderly transaction between market participants, at the measurement date. It also establishes disclosures about fair value measurement. Under existing IFRS, guidance on measuring and disclosing fair value is dispersed among the specific standards requiring fair value measurements and in many cases does not reflect a clear measurement basis or consistent disclosures. This standard is effective for annual periods beginning on or after January 1, 2013. The adoption of this standard is not expected to have a material impact on the Company’s financial statements.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The information provided in this report, including the financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying consolidated financial statements.

CONTROLS AND PROCEDURES

In connection with Exemption Orders issued in November 2007 and revised in December 2008 by each of the securities commissions across Canada, the Chief Executive Officer and Chief Financial Officer of the Company will file a Venture Issuer Basic Certificate with respect to the financial information contained in the unaudited interim financial statements and the audited annual financial statements and respective accompanying Management's Discussion and Analysis.

In contrast to the certificate under National Instrument ("NI") 52-109 (Certification of disclosure in an Issuer's Annual and Interim Filings), the Venture Issuer Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109.

DISCLOSURE CONTROLS AND PROCEDURES

Disclosure controls and procedures ("DC&P") are intended to provide reasonable assurance that information required to be disclosed is recorded, processed, summarized and reported within the time periods specified by securities regulations and that information required to be disclosed is accumulated and communicated to management. Internal controls over financial reporting ("ICFR") are intended to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purpose in accordance with Canadian generally accepted accounting principles.

TSX-V listed companies are not required to provide representations in the annual filings relating to the establishment and maintenance of DC&P and ICFR, as defined in Multinational Instrument 52-109. In particular, the CEO and CFO certifying officers do not make any representations relating to the establishment and maintenance of (a) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation, and (b) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in their certificates regarding the absence of misrepresentations and fair disclosure of financial information. Investors should be aware that inherent limitations on the ability of certifying officers of a TSX-V issuer to design and implement on a cost effective basis DC&P and ICFR as defined in Multinational Instrument 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.
