The following information includes financial information derived from the consolidated financial statements of the Company, which have been prepared in accordance with International Financial Reporting Standards (IFRS). All financial results are reported in Canadian dollars.

The Company's head office is located at 400-1681 Chestnut Street, Vancouver, BC V6J 4M6. Additional information relating to the Company can also be found on the Company's website at www.supernovametals.com or on the SEDAR+ website at www.sedarplus.ca.

FORWARD LOOKING STATEMENTS

This document contains certain forward-looking information and forward-looking statements, as defined in applicable securities laws (collectively referred to as "forward-looking statements"). Often, but not always, forward-looking statements can be identified by the use of words such as "plans," "expects" or "does not expect," "is expected," "planned," "budget," "scheduled," "estimates," "continues," "forecasts," "projects," "predicts," "intends," "anticipates" or "does not anticipate," or "believes," or variations of such words and phrases, or statements that certain actions, events or results "may," "could," "would," "should," "might" or "will" be taken, occur or be achieved.

Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any of our future results, performance or achievements expressed or implied by the forward-looking statements; consequently, undue reliance should not be placed on forward-looking statements.

Management believes the primary risk factors have been identified in the Risks and Uncertainties section of this document.

Forward-looking statements are based on a number of assumptions that may prove to be incorrect, including, but not limited to, assumptions about:

- general business and economic conditions;
- the availability of equity and other financing on reasonable terms;
- our ability to procure equipment and operating supplies in sufficient quantities and on a timely basis; and
- our ability to attract and retain skilled labour and staff.

We caution you that the foregoing lists of important risk factors and assumptions are not exhaustive. Events or circumstances could cause our actual results to differ materially from those estimated or projected and expressed in, or implied by, these forward-looking statements. We undertake no obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of factors, whether as a result of new information or future events or otherwise, except as may be required under applicable laws.

Supernova Metals Corp.

Management's Discussion and Analysis
Nine Month Period Ended September 30, 2024

DESCRIPTION OF BUSINESS

Supernova is a Canadian exploration company incorporated on November 20, 2000 and continued under the Business Corporations Act (British Columbia) on December 30, 2010, and its common shares are listed for trading on the Canadian Securities Exchange (the "CSE") under the symbol "SUPR".

The Company is focused on adding, creating and increasing value through the acquisition and exploration of mineral resource properties in North America.

The Company continues to explore new projects and investment opportunities which can enhance shareholder value.

RESULTS OF OPERATIONS

Period Ended September 30, 2024

The Company reported a loss of \$128,431 during the current year period compared to \$174,695 during the same period in the prior year. The prior year period reported higher professional fees and administrative costs. Management has tried to minimize these costs as much as possible in the current year period in order to conserve cash.

EXPLORATION AND EVALUATION ASSETS

TT Claims

In April 2024, the Company staked 33 mineral claims under two licenses in central Labrador. The licenses are contiguous to the north and west of the Two Tom rare earth element ("REE") project. The Two Tom has an historical 43-101 resource estimate, at 0.6 TREO% cut-off, which reports an Inferred Resource of 41Mt at 1.18% TREO, 0.26% Nb205, 0.18% BeO and 0.06 ThO2% with 5% of the TREO being made up of HREOs (43-101 Technical Report by Tetra Tech Wardrop for Rare Earth Metals Inc., 2012).

The new staked licenses do not cover any portion of the historical resource area, so these results should not be relied upon as being indicative of the potential of the new licenses.

The Company is currently evaluating the next steps with regards to exploration on the TT claims.

Nine Month Period Ended September 30, 2024

RISKS AND UNCERTAINTIES

The Company is in the mineral exploration business and as such is exposed to a number of risks and uncertainties that are not uncommon to other companies in the same business. Exploration for and development of mineral properties involves a high degree of risk, and the cost of conducting programs may be substantial and the likelihood of success is difficult to assess.

Beyond exploration risk, management is faced with other possible risks which include the following:

Financial Market Risk

The Company is in part dependent on the equity markets as a source of capital for making acquisitions or completing exploration programs. Accordingly, the Company's capital resources and ability to make acquisitions or incur exploration expenditures are largely determined by the strength of the resource markets and by the status of the Company's projects in relation to these markets, and its ability to compete for the investor support of its projects.

Title Risk

The Company has investigated its right to explore and exploit its properties and, to the best of its knowledge, there are no known encumbrances. However, the results of the Company's investigations should not be construed as a guarantee of title.

Commodity risk

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for precious metals are impacted by world economic events that dictate the levels of supply and demand. The Company had no hedging contracts in place as at or during the period ended September 30, 2024.

Environmental Risk

The Company seeks to operate within environmental protection standards that meet or exceed existing requirements in the country in which the Company operates. Present or future laws and regulations, however, may affect the Company's operations. Future environmental costs may increase due to changing requirements or costs associated with exploration and the developing, operating and reclamation of mineral properties. Programs may also be delayed or prohibited in some areas.

Value Risk

There is no material risk as the Company has already previously impaired much of the value of its exploration and evaluations projects.

Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, then actual results may vary materially from those described on forward-looking statements.

Nine Month Period Ended September 30, 2024

OUTLOOK

The Company divested itself of certain exploration properties that were not financeable during 2023. The Company has staked some prospective claims contiguous to the Two Tom REE project in Central Labrador and continues to evaluate new projects and opportunities which can enhance shareholder value.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The information provided in this report, including the financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying consolidated financial statements.
