SUPPLEMENTAL CASH FLOW INFORMATION (Note 16)

1. NATURE OF OPERATIONS AND GOING CONCERN

Russell Breweries Inc. (the "Company") was incorporated under the laws of the Province of British Columbia, Canada on March 23, 2000. The head office and principal address of the Company are located at #202 - 13018 80th Avenue, Surrey, British Columbia, V3W 3A8. The Company produces beer primarily for sale to provincial liquor distribution organizations and entities engaged in the food and beverage industries within Canada. The Company's shares are traded on the TSX Venture Exchange (the "TSX.V").

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. As at December 31, 2012, the Company had a working capital deficiency of $927,734 and accumulated losses since inception of $10,901,352. These factors raise significant doubt about the Company's ability to continue as a going concern. The continued operation of the Company is dependent on its ability to obtain financing sufficient to generate profitable operations in the future. There is no guarantee that the Company will be able to raise this additional financing.

2. STATEMENT OF COMPLIANCE AND BASIS OF PRESENTATION

a) Statement of Compliance

These consolidated financial statements are prepared in accordance with International Accounting Standards ("IAS") 34 *Interim Financial Reporting*. These financial statements do not include all of the information required for full annual financial statements.

These condensed consolidated interim financial statements were authorized for issuance by the Board of Directors on February 28, 2013.

b) Presentation and Functional Currency

These consolidated financial statements are presented in Canadian dollars. Under International Financial Reporting Standards ("IFRS"), the Canadian dollar is the functional currency of the Company and its wholly-owned subsidiaries, Russell Brewing Company Ltd. located in Surrey, British Columbia and Fort Garry Brewing Company Ltd. located in Winnipeg, Manitoba.

c) Basis of Measurement

Depending on the applicable IFRS requirements, the measurement basis used in the preparation of these financial statements is cost, net realizable value, fair value or recoverable amount.

d) Significant Accounting Estimates and Judgments

The preparation of the condensed consolidated interim financial statements in conformity with IFRS requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses for the reporting period. Significant areas requiring the use of management estimates may include recovery of accounts receivable, inventory valuation, the estimated useful life of long-lived assets, the recoverability of amounts recorded for long-lived assets, estimates used in impairment analysis of long-lived assets, container liabilities, valuation of deferred tax assets and liabilities and estimates used in calculating share-based compensation. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements of changes in such estimates in future periods could be significant. Actual results could differ from management's best estimates as additional information becomes available.

(Unaudited; Expressed in Canadian Dollars)

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies that have been used in the preparation of these condensed consolidated interim financial statements are summarized in the audited consolidated financial statements of the Company for the year ended June 30, 2012. These statements should be read in conjunction with the audited consolidated financial statements for the year ended June 30, 2012.

(a) On December 8, 2008, the bank made an amendment to the existing term loan in accordance with the request of the Company for six month principal postponement. Pursuant to the amendment, the remaining loan amount on December 8, 2008 of $787,500 was to be repaid by 42 consecutive monthly principal installments of $18,750 each commencing June 15, 2009 and ending November 15, 2012. The bank also granted a reduction of the interest rate on the term loan by 1%. With the exception of the amendments agreed, all terms and conditions of the term loan remain unchanged. On September 22, 2010, the bank made a further amendment to the existing term loan in accordance with the request of the Company. Pursuant to the amendment, the remaining loan amount is to be repaid by 50 consecutive monthly principal installments of $9,750 each commencing October 15, 2010 and ending November 15, 2014.

(b) On October 5, 2010, the Company’s subsidiary Fort Garry Brewing Company Ltd. accepted an offer of $100,000 pre-authorized working capital loan from Business Development Bank of Canada (“BDC”). The BDC Loan, bearing interest at floating base rate plus a variance of 1% maturing August 15, 2015, is secured by the assets of Fort Garry and supported by a guarantee made by two directors of the Company. In return for the guarantee, the Company is allowed to issue 250,000 common shares of the Company as bonus shares for an estimated fair value of $0.08 per share for a total value of $20,000, which was recorded as a discount against the value allocated to the loan. During the period ended December 31, 2012, the Company recorded interest expense of $2,499 (2011 - $3,201) related to the accretion of the discounted value of the loan, which has been recorded as interest on long-term debt in the statement of operations.

(c) On December 31, 2007, the Company entered into a loan agreement pursuant to which the lender, a shareholder of the Company, provided a discounted loan to the Company valued at $1,239,000 at maturity. Under the agreement, a notional principal amount of $965,000 was assigned to the loan. In connection with the loan, the lender was entitled to a $25,000 bonus which was deducted from the notional principal amount of $965,000, resulting in net proceeds to the Company of $940,000. The Company also issued 250,000 warrants to the lender, each warrant entitling the lender to purchase one common share of the Company at a price of $0.65 per share for a period of two years expiring on December 31, 2009. Net proceeds of $896,040 and $43,960 were allocated to the loan and warrants, respectively, based on their relative fair values on December 31, 2007. The Company incurred cash debt issue costs of $14,435 which were recorded as a discount against the value allocated to the loan.

(Unaudited; Expressed in Canadian Dollars)

9. LONG-TERM DEBT (continued)

(c) The fair values of the warrants issued in connection with the loan were computed using the Black-Scholes option-pricing model. The Company may repay the loan at any time without penalty by paying the notional principal amount of $965,000 plus accumulated interest. As at September 30, 2012, the fair value of this early settlement option was estimated to be $nil.

On December 31, 2010, the Company entered into an amendment and loan extension agreement to the loan agreement dated December 31, 2007, pursuant to which the lender extended the maturity date to July 31, 2012 and reduced the loan amount to $738,600 from $1,239,000, provided that the Company repay the loan in the amount of $619,000 on January 1, 2011 (paid). Pursuant to the amended loan agreement, the lender provides to the Company a new loan valued at maturity in the amount of $738,600. A discounted value or loan advance amount of $620,000 is calculated based on a 10% per annum interest rate, calculated semi-annually, with interest payable on maturity resulting in a total loan value at maturity of $738,600. In consideration of the lender agreeing to amend and extend the loan, the lender will also earn a bonus of $22,500 to be included in the loan amount. The term of the loan was nineteen months. The Company may repay the loan at any time without penalty by paying the discounted loan advance amount of $620,000 together with accumulated interest. The loan was guaranteed by Russell Brewing Company Ltd. and Fort Garry Brewing Company Ltd., both wholly-owned subsidiaries of the Company.

On July 27, 2012, the Company agreed to an one year extension (the “Extension”) and amendment to a loan agreement (the “Loan Agreement”) dated December 31, 2007. The Extension is for one year, maturing on July 31, 2013 and bears interest at 10% per annum, calculated semi-annually. In consideration of the Lender’s agreement to amend and extend the Loan, the Lender will earn a bonus (the “Bonus”) of $24,374. Russell may repay the Loan at any time without penalty by paying the Loan Advance Amount together with accumulated interest and prorated Bonus.

The Loan is guaranteed by Russell Brewing Company Ltd. and Fort Garry Brewing Company Ltd. both wholly-owned subsidiaries of the Company. As security for the Loan, the Company will grant to the Lender a subordinated security agreement creating a security interest and charge over all of their respective property and assets subordinate to senior debt and senior security of up to $2.5 million plus capital lease obligations incurred for future acquisitions of equipment and other capital assets.

During the period ended December 31, 2012, the Company recorded interest expense of $37,656 (2011 - $37,527) related to the accretion of the discounted value of the loan, which has been recorded as interest on long-term debt in the statement of comprehensive loss.

Excluding finance fees and discounting, the Company’s future estimated principal repayments of long-term debt are as follows:

("Russell"), completed a brokered private placement for 68,000 exchangeable, non-voting preferred shares (the "Exchangeable Shares") at a price of $10 per share for gross proceeds of $680,000 under the Equity Capital Program of the Province of British Columbia (the "Program"). In connection with the private placement, the Company issued 6,800 agent warrants allowing the holder to purchase 16.67 common shares of the Company per warrant at a price of $0.60 per common share until March 31, 2010. The Company also paid a commission of $54,400 and incurred other cash issuance costs of $60,000.

The Exchangeable Shares have a 6% per annum cumulative dividend, payable semi-annually, in accordance with rules under the Program. After five years (the "Exchange Date"), each Exchangeable Share will automatically be exchanged into 16.67 common shares of the Company, or earlier if certain events occur, including a change in control of the Company or an insolvency event in Russell. At the Exchange Date, the exchange ratio will be increased for any penalty incurred or for any unpaid dividends.

Russell will incur a penalty if it has not paid all cumulative dividends due and payable as of March 31, 2011 and for any unpaid dividends calculated each six months thereafter until the Exchange Date. The maximum penalty would result in one additional common share of the Company being exchanged for each Exchangeable Share. The exchange ratio will also increase to account for any unpaid dividends at the Exchange Date such that the additional number of the Company's common shares to be issued is equal to the unpaid dividend amount divided by $0.60. As at December 31, 2012, the unpaid dividend amount was $183,600 (June 30, 2012 - $163,200). The maximum penalty may result in an aggregate of 68,000 additional common shares of the Company being issued at the Exchange Date. During the year ended June 30, 2011, the penalty shares were recorded as shares allotted but unissued. The shares were valued at $5,440 measured using the market price of the shares on March 31, 2011, the date the penalty was incurred.

18. FINANCIAL INSTRUMENTS, FAIR VALUE MEASUREMENTS AND FINANCIAL RISKS

(a) Fair Values of Financial Instruments

The carrying values of cash and cash equivalents, accounts receivable, restricted term deposits, other assets, bank indebtedness, accounts payable, dividend payable, interest payable on convertible debentures, and due to related parties are reasonable estimates of fair values due to the relatively short periods to maturity and the commercial terms of these instruments. The carrying values of long-term debt, finance lease obligations and convertible debentures at December 31, 2012 are considered to be reasonable estimates of fair value based on current market rates for similar financial instruments.

(b) Fair Value Measurements

Certain of the Company's financial assets and liabilities are measured at fair value on a recurring basis and classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Certain non-financial assets and liabilities may also be measured at fair value on a non-recurring basis. There are three levels of the fair value hierarchy that prioritize the inputs to valuation techniques used to measure fair value, with Level 1 inputs having the highest priority. The levels and the valuation techniques used to value our financial assets and liabilities are described below:

Level 1 - Quoted Prices in Active Markets for Identical Assets
Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Cash equivalents, restricted term deposits and bank indebtedness, when applicable, are valued using quoted market prices. Accordingly, these items are included in Level 1 of the fair value hierarchy.

Level 2 - Significant Other Observable Inputs
Quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Derivative instruments are included in Level 2 of the fair value hierarchy as they are valued using pricing models or discounted cash flow models. These models require a variety of inputs, including, but not limited to, contractual terms, market prices, forward price curves, yield curves, and credit spreads. These inputs are obtained from or corroborated with the market where possible.

Level 3 - Significant Unobservable Inputs
Unobservable (supported by little or no market activity) prices.

(c) Financial Risks

(i) Credit Risk

Credit risk arises from the non-performance by counterparties of contractual financial obligations. The Company maintains substantially all of its cash and cash equivalents and term deposits classified as other assets in the balance sheet with major financial institutions. Deposits held with these institutions may exceed the amount of insurance provided on such deposits. 18. FINANCIAL INSTRUMENTS, FAIR VALUE MEASUREMENTS AND FINANCIAL RISKS (continued)

(c) Financial Risks (continued)

(i) Credit Risk (continued)

The Company has a concentration of credit risk because a majority of its accounts receivable are from provincial liquor boards, under provincially regulated industry sale and payment terms. The Company is not exposed to significant credit risk as payment in full is typically collected by provincial liquor boards at the time of sale and receivables are with government agencies. While substantially all of the Company's accounts receivable are from provincial government liquor authorities, the timing of receipts of large balances may vary significantly from period to period.

(ii) Liquidity Risk

Liquidity risk arises from the Company's general and capital financing needs. The Company continuously monitors and reviews both actual and forecasted cash flows, and also matches the maturity profile of financial assets and liabilities, when feasible.

Contractual undiscounted cash flow requirements for financial liabilities as at December 31, 2012 are as follows:

	Less Than 1 Year $	Years 2 and 3 $	Years 4 and 5 $	More Than 5 Years $	Total $
Bank indebtedness	**58,229**	–	–	–	58,229
Accounts payable and accrued liabilities	**1,335,504**	–	–	–	1,335,504
Dividend payable	**193,800**	–	–	–	193,800
Long-term debt	**69,000**	946,350	3,250	–	1,018,600
Finance lease obligations	**21,142**	108,781	27,483	–	157,406
	1,677,675	1,055,131	30,733	–	2,763,539

As at December 31, 2012, the Company had a working capital deficiency of $927,734.

(iii) Interest Rate Price Risk

Certain of the Company's long-term debt instruments, finance lease obligations and convertible debentures are subject to interest rate price risk as they carry fixed rates of interest. The Company's interest rate risk management policy is to purchase highly liquid investments with a term to maturity of three months or less on the date of purchase, when the instrument is not required as security for another financial obligation.

(iv) Interest Rate Cash Flow Risk

Certain of the Company's long-term debt instruments and bank indebtedness are subject to interest rate cash flow risk as they carry variable rates of interest. A plus or minus 1% change in market interest rates would not have a significant effect on the Company's loss and comprehensive loss for the year.
